Rockhopper / Who we are

Rockhopper Exploration plc (AIM: RKH) is an oil and gas exploration and production company with key interests in the North Falkland Basin.

The Company has been operating offshore in Falkland Islands' waters since 2004 and discovered the world-class Sea Lion oil field in 2010.

Our strategic ambition

Create value for all our stakeholders through building a well-funded, full-cycle, exploration-led E&P company.

2025 Highlights

> Sea Lion Phase 1 sanctioned
> Rockhopper funded for Phase 1
> First oil targeted Q1 2028
> 110 mmbbls 2P reserves net to Rockhopper
> 211 bbls 2C resources net to Rockhopper

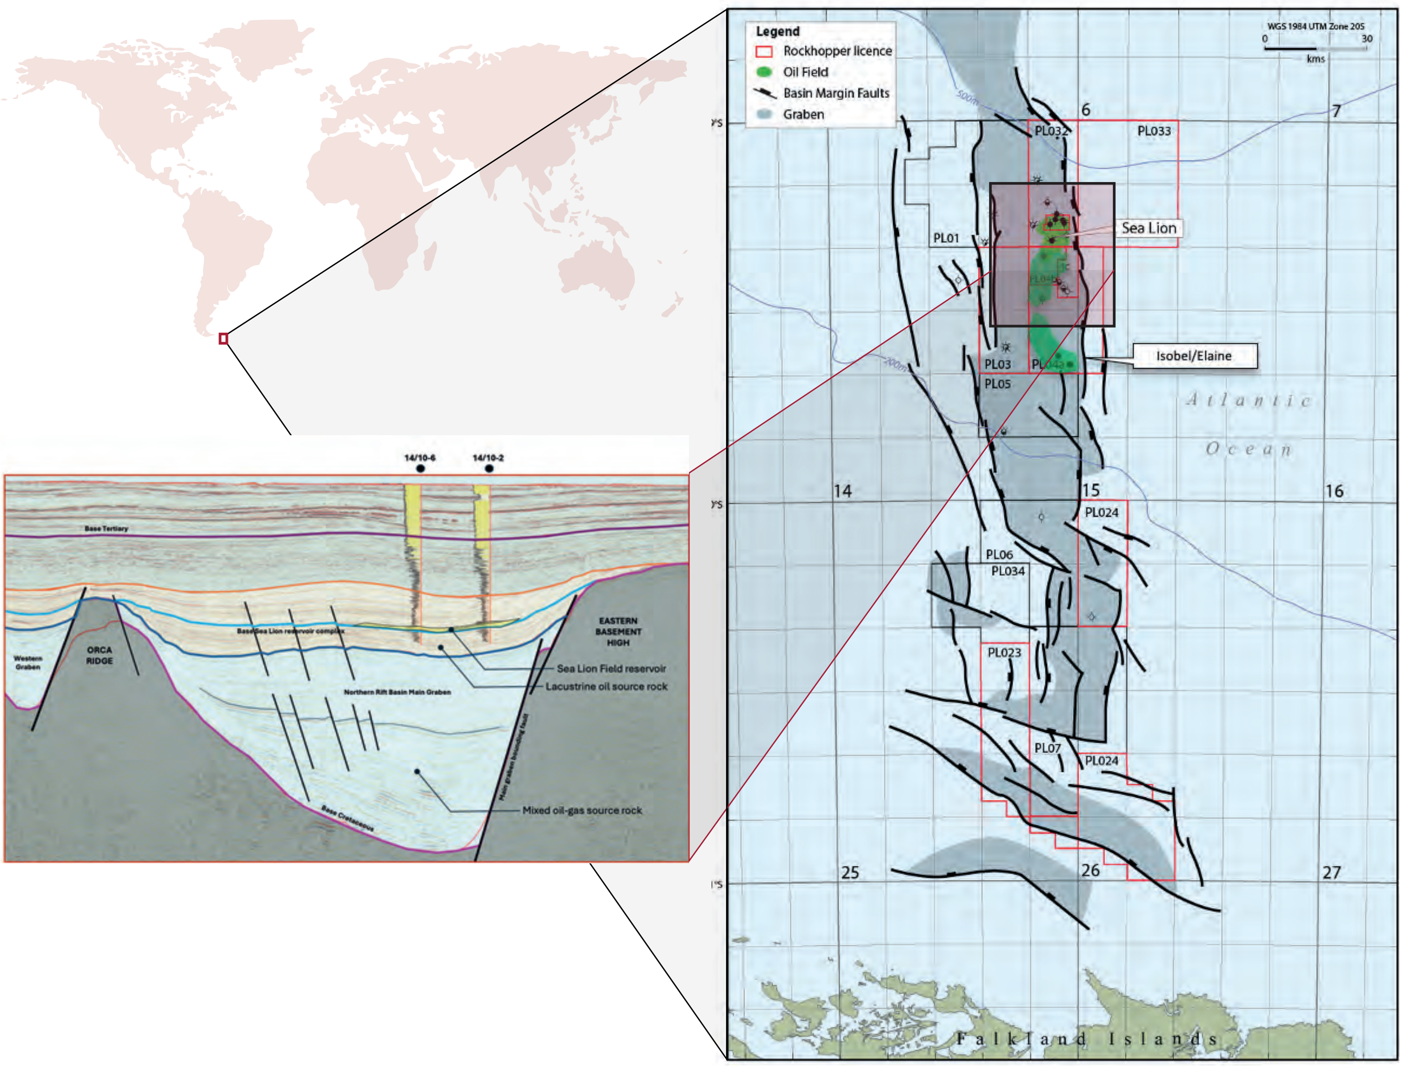
** NSAI report, 31/12/2025. Assumes development of 727 mmbbls of 2P+2C (gross resources), £/$ = 1.35, Brent crude = $73.63/Barrel flat from 31/12/28 onwards and 0% cost/price inflation. Numbers may not sum due to rounding.*

Sea Lion / Field Location and Tectonic Setting

- Situated on the southern part of the South American tectonic Plate on the Falklands Plateau
- Approx. 220km north of the Falkland Islands in the North Falkland Basin (NFB)
- The NFB is a north-south trending Atlantic failed rift filled primarily with Early Cretaceous to Tertiary sediments
- Typical half graben structure with a large (>5,000m) eastern bounding fault
- World class lacustrine source rock interval mature and generating oil from c.250m below the Sea Lion reservoirs



Sea Lion / Reservoir

Significant running room

Sea Lion Field – development sanctioned

- NSAI 2P gross reserves 313.8 mmstb in Northern Development Area ("NDA") Phase 1 & 2
- NSAI 2C unrisked gross Development
- Pending 413 mmstb in NDA Phase 3 and Central Development Area ("CDA") Phase 1 & 2

Discovered – Isobel/Elaine require appraisal

- NSAI gross Best Estimate Development On Hold 180 mmstb
- Primarily located in Isobel/ Elaine fan complex in Southern Development Area ("SDA")
- Further appraisal required

Prospective Resources – 500 mmstb prospects mapped

- NSAI 2U gross prospective resources c. 500 mmstb
- Near field tie-in opportunities to maintain plateau production in NDA and CDA
- Upside resource in the discovered Isobel/Elaine SDA
- Further higher risk prospectivity

Chairman and Chief Executive Review

Financing and FID

The period under review saw Rockhopper sanction Phase 1 of the Sea Lion Project (the "Project"), the single most important milestone we have achieved since completing our appraisal campaign in January 2012. Partner and Operator, Navitas Petroleum Development and Production Limited ("Navitas") has also taken final investment decision ("FID") relating to the Project.

Following the announcement of conditional equity placings to fund Rockhopper's project equity requirement in July 2025, a full project financing was put in place and, having received all necessary approvals and consents, FID for Phase 1 of the Sea Lion Project was announced on 10 December 2025, with Financial Close shortly after on 22 December 2025. The financing was completed on 31 December 2025 with the conditional placings raising approximately US$142 million before expenses through the issue of 201,102,976 new ordinary shares at an issue price of 53p (the "Placing"). In addition, 50,275,732 underwriting warrants were issued giving the holder the right to subscribe for one new ordinary share at a strike price of 80p per share.

An open offer was concluded in January 2026 in order to give existing shareholders the opportunity to participate in the equity raise at the same 53 pence per share level as the Placing (the "Open Offer"). This Open Offer, which was 7.8x over subscribed, raised an additional US$9.2 million before expenses through the issue of 13,188,036 Open Offer shares.

The project financing consists of US$1.0 billion of senior debt (of which US$350 million is Rockhopper debt) with the balance being provided via a combination of joint venture equity and post first oil cash flows. Rockhopper benefits from previously disclosed financing loans from Navitas in relation to the Project (with the loan balance at YE2025 at US$52.5 million) and, as a result, the net Rockhopper equity requirement was confirmed at US$102 million, in addition to the previously disclosed Rockhopper share of a 5% equity overrun support which is approximately US$10 million (therefore in aggregate US$112 million).

Additional costs of US$5.25 million net to Rockhopper arose as a result of a change in location for the work required to be undertaken on the FPSO, as detailed in the FPSO section below. Taking into account this additional equity requirement, Rockhopper remains funded for Phase 1 of the development.

Simon Thomson
Non-Executive Chair

Samuel Moody
Chief Executive Officer

The Rockhopper senior debt facility will be for US$350 million with a tenor of 7 years. First drawdown shall not be permitted until the agreed equity amount has been distributed into the Sea Lion Project. Semi-annual straight-line amortisations commence on 31 March 2029. The margin is SOFR + 525bps during the pre-completion period, moving to 425bps in years 1 and 2 post project completion, 450bps during year 3 post completion and 475bps thereafter. Mandatory hedging of 50% Proved Developed Producing reserves ("PDP") is required during year 1 post project completion, 33.3% in year 2 and 25% in year 3. A commitment fee of 30% of margin on available undrawn is payable semi-annually. The senior debt facility contains other representations, covenants and default provisions that are customary for a facility of this nature.

An additional financial requirement has been placed on the joint venture ("JV") developing Sea Lion – comprising Navitas and Rockhopper – to cover the eventuality that the project fails without producing sufficient cash flow for the JV and its funders to continue work. This Early Project Failure requirement is currently estimated at US$52.5 million net to Rockhopper. We are currently investigating the possibility of covering this via a combination of surety bond, parent company guarantees, cash or any other suitable instrument. Whilst the total net cost to Rockhopper remains uncertain, the Board believes it is unlikely to exceed US$52.5 million.

Navitas has confirmed it is advancing alternatives to accelerate the development plan for the further resources in the oil asset that are not included in the development plan, whereby production under subsequent development phases may be executed in combination with other production facilities.

As part of the acceleration alternatives, Navitas has entered into a non-binding memorandum of understanding ("MOU") during May 2026 for the acquisition of an additional FPSO with a production capacity of approximately 125,000 barrels per day, which may serve the future development phases of the Project. The completion of the transaction is subject to, inter alia, the completion of due diligence, negotiations, and the signing of binding agreements, as well as the fulfillment of customary conditions precedent. It should be noted that there is no certainty that the transaction will be completed.

Warehousing and laydown yard construction, Stanley

Resources and Reserves

Following the sanction of Phase 1 of the Sea Lion Project, Rockhopper commissioned and published an updated independent reserves and resources evaluation conducted by Netherland Sewell and Associates ("NSAI") (the "Report").

Importantly, the Report has reclassified volumes contained in the Sea Lion Field Northern Development Area ("NDA") Phases 1 and 2 from the Contingent Resources classification to the Reserves classification. This reclassification has been possible following the Company's FID on the Sea Lion field, made in December 2025. Phase 2 of the Sea Lion development is expected to be financed from cashflow generated by Phase 1. Later phases of the Sea Lion development have remained within the Contingent Resources category. *See tables page 9*

FPSO

Notice was given to disconnect the FPSO from its former location at the Lancaster field in the UK and it has begun its move to a shipyard so that a full inspection can be carried out ahead of moving the vessel to a suitable dry dock to undertake the required work ahead of commencing production. Work has commenced on the Falkland Islands, including upgrading the temporary dock facility and constructing suitable lay down, warehousing and offices. Construction of the flexibles and umbilicals has commenced and work on the FPSO turret and moorings is due to commence shortly.

Due to the commencement of the war with Iran in March 2026 and its ramifications, the Navitas decided to change the location of the FPSO upgrade and adaptation works and execute them at a shipyard in Asia, instead of the original Middle East plan. Following this change, an amount of approximately USD 45 million (100%) was added to the Project's budget. Rockhopper benefits from a loan from Navitas covering 2/3 of its 35% equity requirement for Phase 1 of the Sea Lion development. Accordingly, the net increase in Rockhopper's equity costs was US$5.25 million and Rockhopper remains funded for Phase 1 of the project.

Falklands taxation agreement

As part of the FID process, Rockhopper and the Falkland Island Government ("FIG") entered into a final settlement agreement relating to a previously disclosed disputed taxation amount on the farm out to Premier Oil in 2012, as the existing arrangement was incompatible with achieving FID at Sea Lion. The final settlement agreement also settled any tax liability in relation to the farm out to Navitas in 2022. The new arrangement provides that Rockhopper shall pay to FIG (the tax liability) in instalments, amounting to a total of £30 million on an undiscounted basis. The payment schedule is as follows:

- *£1m at signing of the final settlement agreement (paid)*
- *£2m at Phase 1 sanction (paid)*
- *£1m 30 calendar days from First Oil (the "Payment Date")*
- *£2m on the first anniversary of the Payment Date*
- *£3m on the second anniversary of the Payment Date*
- *£7m on the third anniversary of the Payment Date*
- *£7m on the fourth anniversary of the Payment Date*
- *£7m on the fifth anniversary of the Payment Date*

The final settlement provides that early payments can be made, attracting a discount of 10% per annum. If payments are made late, the agreement provides for interest to be paid at a rate of 10% per annum. FIG's existing security, including charges over certain Group subsidiary assets, was replaced by security over a dedicated Rockhopper bank account into which all of the net post financing, post Navitas loan repayment cash flows will be distributed.

Ombrina Mare annulment

On 3 June 2025, it was announced that the Republic of Italy succeeded in having the International Centre of Settlement of Investment Disputes ("ICSID") Ombrina Mare Arbitration Award (the "Award") annulled by the ad hoc Panel.

Italy submitted an application in October 2022 to the ICSID seeking to annul the Award under Article 52 of the ICSID Convention. On 14 October 2024, Rockhopper announced it had decided, in line with normal market practice, that insuring to protect shareholders against loss resulting from an annulment of the Award was the most prudent course of action.

Following the annulment of the Award, Rockhopper made a claim under terms of the insurance policy and, on 29 August 2025, confirmed it had received the full €31 million entitlement under the insurance arrangements (the "Insurance Proceeds").

The resubmission of a new request for arbitration was made in September 2025, and the new funder continues to be responsible for all costs associated with this. To the extent that Rockhopper makes a financial recovery from any new arbitration, after deductions for any reasonable costs and expenses incurred, that recovery will be utilised to reimburse the insurers in respect of the Insurance Proceeds. Further announcements will be made in due course as and when appropriate.

Reserves

Summary of Gross and Working Interest Net Recoverable Reserves and Future Net Revenue attributable to Sea Lion Field NDA Phases 1 and 2

Rockhopper holds a 35 per cent working interest in the Sea Lion field.

	Oil (MBBL) Gross (100%)	Oil (MBBL) Working Interest (35%)	Future Net Revenue Working Interest (35%) (US$000) Undiscounted	Future Net Revenue Working Interest (35%) (US$000) NPV10
Proved Undeveloped (1P)	230,672.5	80,735.4	2,134,911.1	720,915.6
Probable	83,165.3	29,107.8	968,135.7	244,866.9
Proved + Probable (2P)	**313,837.7**	**109,843.2**	**3,103,046.8**	**965,782.5**
Possible	94,326.3	33,014.2	1,399,698.4	303,227.4
Proved + Probable + Possible (3P)	**408,164.0**	**142,857.4**	**4,502,745.3**	**1,269,009.9**

Note: Oil volumes are expressed in thousands of barrels (MBBL). Gross (100%) figures represent total field reserves; working interest figures represent Rockhopper's 35 per cent share. Future net revenue is after deductions for Rockhopper's share of state royalties, capital costs, abandonment costs, operating expenses and estimates of Falkland Islands corporate income taxes. NPV10 represents future net revenue discounted at an annual rate of 10 per cent. NPV10 should not be construed as the fair market value of the properties. All figures are based on the Base Price Case. See Economic Parameters below.

Contingent Resources

The contingent resources figures below are unrisked – they have not been adjusted for the probability of commercial development. These estimates should not be aggregated with reserves without extensive consideration of the differing degrees of technical and commercial risk.

Unrisked Gross (100%) Contingent Resources – Oil (MBBL)

	Low Estimate (1C) MBBL	Best Estimate (2C) MBBL	High Estimate (3C) MBBL
Development Pending	238,736.9	412,481.3	531,242.9
Development On Hold	78,971.1	181,078.2	299,712.5
Development Not Viable	5,713.6	9,602.7	14,529.9
Total	**323,421.6**	**603,162.1**	**845,485.3**

Unrisked Working Interest (35%) Contingent Resources – Oil (MBBL)

	Low Estimate (1C) MBBL	Best Estimate (2C) MBBL	High Estimate (3C) MBBL
Development Pending	83,557.9	144,368.4	185,935.0
Development On Hold	27,639.9	63,377.4	104,899.4
Development Not Viable	1,999.8	3,360.9	5,085.5
Total	**113,197.6**	**211,106.7**	**295,919.9**

Summary of Unrisked Working Interest (35%) Contingent Cash Flows after Falkland Islands Taxes

Economic analysis has been performed on the Development Pending contingent resources only.

	Total (US$000) Undiscounted	NPV10 (US$000)
Low Estimate (1C)	1,813,859.5	554,524.8
Best Estimate (2C)	4,286,664.2	1,202,666.3
High Estimate (3C)	6,244,948.0	1,610,092.7

Economic Parameters

The Report has been prepared using the following Base Price Case oil price parameters, based on Brent Crude prices adjusted for quality, transportation fees and market differentials:

Period Ending	Oil Price (US$/Barrel)
31 December 2026	62.99
31 December 2027	64.79
Thereafter	73.63

The development scenario underlying the NPV calculation for the contingent resources aligns with the previously disclosed multi-phase, two-FPSO scheme comprising the Northern Development Area ("NDA") Phases 1, 2 and 3 and the Central Development Area ("CDA") Phases 1 and 2.

Italian Disposal

As announced on 14 October 2024, Rockhopper signed an SPA to dispose its Italian interests, other than the Ombrina Mare arbitration, to Zodiac Energy Limited ("Zodiac"), a locally run, Italian E&P company.

The SPA is for the sale of Rockhopper Civita Limited (a wholly owned subsidiary of Rockhopper Exploration Plc). Rockhopper Civita Limited holds all Rockhopper's Italian assets and liabilities with the exception of the Ombrina Mare Arbitration Award.

Under the terms of the SPA, Zodiac will pay €1 consideration to Rockhopper on Completion, with Rockhopper retaining upside participation in two undeveloped licences. Completion is conditional on Italian regulatory approval. At Completion, Rockhopper Civita Limited (the entity being sold) must hold a minimum cash balance of €5.5 million

In order to satisfy a number of additional information requests from the Italian regulator, the long-stop date for the transaction has been extended to 30 June 2026.

Board composition

We thank Alison Baker for her input since 2018 and welcomed Richard Slape to the Board just after the year end to succeed Alison as Audit Chair. With Rockhopper entering a new phase in its development having taken FID at Sea Lion, and to reflect the increasingly international nature of the shareholder register, two additional directors will be proposed at the upcoming AGM, further details will be provided in a separate RNS shortly.

Summary

Having discovered Sea Lion in May 2010 and gone on to appraise the field during 2010 and 2011, all 100% as operator, sanctioning the first phase of the Project represents the most material step since that time towards unlocking the huge value inherent in the Project for all stakeholders.

The Placing and Open Offer, combined with the senior debt and Navitas loans, ensured Rockhopper was fully funded and able to take FID.

The Navitas loan, which covers 2/3 of the net Rockhopper equity requirement, provides good insulation against any inflation in project costs and the 50 million outstanding warrants at 80 pence per share give potential access to additional funding should any be required.

Extracting numbers from NSAI Report shows a value of in excess of US$2 billion when aggregating Rockhopper's net 2P + 2C reserves and resource base of 321 mmbbls at a realised oil price of US$71.13/bbl. This increases to US$2.8 billion at a realised oil price of US$82.17/bbl. The Report also highlights the very significant running room and upside within the Rockhopper acreage.

Having sanctioned Phase 1 of Sea Lion, we look forward to continuing our work with Operator Navitas — not only toward first oil in 2028, but also to explore opportunities to accelerate the development of remaining discovered resources and exploration upside in the basin.

Simon Thomson

2 June 2026

Key Performance Indicators (KPIs)

The Board monitors the Company's progress against its Key Performance Indicators to assess performance and delivery against pre-defined strategic objectives.

KPIs have been set based on short-term targets designed to ensure the Company achieves its long-term strategy. The Company measures a number of operational and financial metrics to ascertain performance.

2026 Targets

> Achievement of key Sea Lion Project milestones
> Maintain balance sheet strength
> Effective portfolio management
> Ensure good HSSE performance

2025 Performance Summary

The key objectives for the 2025 financial year were: (1) taking a Final Investment Decision (FID) on the Sea Lion Development, and (2) strengthening and protecting the balance sheet.

The Remuneration Committee considered Group performance against these objectives for the purpose of considering Executive bonuses and further detail is provided in the Annual Bonus section of the Remuneration Report on page {xx}. A summary of their conclusions is presented below.

Category	Objective	Target	Outcome	Result
FINANCE	**Secure Debt**	Bond or alternative	Senior Debt with Lead Technical Bank in place. More competitive than high yield bond; cheapest form of capital	Exceed
	Secure Equity	Raise additional equity from existing/new shareholders to meet project initial equity contribution requirements	Conditional Equity by way of Placing with new strategic investors and Open Offer with existing holders	Exceed
TAX*	Tax Resolution	–	£30m agreed settlement in phased instalments, with a small proportion (£1m) upfront. Payment back end loaded and funded largely from production cashflows	–
COMMERCIAL	Low side	IRR > WACC	1C Phase 1 21% @ $60/bbl	Exceed
	Base Case	IRR > 15%	2C Phase 1 26% @ $60/bbl	Exceed
TECHNICAL	Field Development	Phase 1 of Northern Development Area approval	Both phases (1&2) of Northern Development Area approved	Exceed
	Project Cost & Schedule	$1.4Bn to First Oil; $1.7Bn Total First Oil Q4 2027/Q1 2028	$1.5Bn to First Oil, $1.7Bn Total H1 2028	Met
HSSE/ SUSTAINABILITY	Operate to Industry Standards	Environmental Impact Assessment (EIA) Approved	EIA Approved	Met

**The tax dispute resolution was commercially sensitive; only the outcome is disclosed.*

Finanical Review

Overview

The most significant event in 2025 was the sanctioning of the Sea Lion Development. In December 2025, the Group achieved Final Investment Decision ("FID") on Phase 1 of the Sea Lion oil field, located in the North Falkland Basin. This milestone was underpinned by a successful equity fundraise raising net proceeds of US$135 million, financial close on a US$350 million Senior Debt Facility, and approval of the Field Development Plan by the Falkland Islands Government. As a result of FID, the Group's Exploration and Evaluation assets of US$329.2 million were reclassified to tangible development and production assets.

The year also saw the conclusion of the Ombrina Mare arbitration annulment proceedings. In June 2025 the ad hoc Committee ruled in favour of Italy, annulling the Award in full. Whilst this was a disappointing outcome, the Group had in place an insurance policy that entitled Rockhopper to receive €31 million, which was received in August 2025. Separately, a new request for arbitration was submitted in September 2025, the costs of which are borne by the Group's funding partner under the Monetisation Agreement.

Results for the Year

For the year ended 31 December 2025 the Group, including discontinued operations, reported a loss of US$39.7 million (2024: profit of US$47.6 million). The swing from profit to loss is principally driven by the reduction in fair value of the Monetisation Agreement and the associated accounting for insurance proceeds following the annulment of the Award, together with a significant increase in administrative expenses in a year of exceptional corporate activity.

Discontinued Operations

The Group's Greater Mediterranean operations, held within Rockhopper Civita Limited, continue to be classified as held for sale and presented as discontinued operations in accordance with IFRS 5. The disposal remains subject to regulatory approval from the Italian regulator, and the long-stop date under the Sale and Purchase Agreement has been extended to 30 June 2026. Under the terms of the transaction Rockhopper Civita Limited is required to hold €5.5 million in cash and cash equivalents on transfer; accordingly US$8.2 million of cash held by the entity is presented within assets classified as held for sale at the year end. The loss from discontinued operations for the year was US$1.5 million (2024: profit of US$1.3 million).

Operating Costs

Exploration and evaluation expenses

Exploration and evaluation expenses of US$0.3 million (2024: US$0.4 million) represent write-offs of costs relating to areas of the North Falkland Basin and South Falkland Basin that will not form part of the Sea Lion Phase 1 project.

Administrative Expenses

Administrative expenses increased significantly to US$9.8 million (2024: US$3.3 million). The increase reflects the exceptional level of corporate activity in the year, including costs associated with the FID process, the equity fundraise and the entry into the Senior Debt Facility. Total staff costs were US$6.9 million (2024: US$3.4 million), which includes the impact of bonuses relating to the sanctioning of the Sea Lion development as well as US$1.8 million for accrued Employers National Insurance, caused by a substantial increase in share price in the period which has led to an increase in the NI provision for in-the-money employee share options. Other professional fees were US$2.1 million (2024: US$0.4 million), reflecting strategic advisory costs associated with the FID process, the Senior Debt Facility and the equity placing as well as ensuring the Group is prepared for the post first oil world.

Foreign Exchange

A net foreign exchange gain of US$3.0 million (2024: US$0.2 million) arose in the year, predominantly reflecting the strengthening of Sterling and Euro against the US Dollar and the Group's sterling and euro-denominated monetary positions.

Other Income and Expenses

Other income for the year of US$35.2 million (2024: US$79.8 million) represents the €31 million insurance proceeds receivable following the annulment of the Award by the ad hoc Committee in June 2025, received in August 2025. Other expenses of US$69.7 million (2024: US$1.0 million) comprise: a reduction in the fair value of the Monetisation Agreement of US$42.9 million; recognition of an IFRS 9 liability for the potential repayment of insurance proceeds of US$21.6 million; the write-off of the remaining insurance premium prepayment of US$3.9 million; and other costs of US$1.3 million. The net charge through other income and expenses in the year is US$34.5 million (2024: net income of US$78.8 million).

In June 2025 the ad hoc Committee issued its decision, finding in favour of Italy and annulling the Award in its entirety. As a result, the Tranche 2 payment of €65 million will not be received under the Monetisation Agreement. A new request for arbitration against Italy was submitted in September 2025, the costs of which are borne by the Specialist Fund under the Monetisation Agreement.

The Monetisation Agreement continues to be recognised as a financial instrument at fair value through profit or loss in accordance with IFRS 9. The fair value reduced from US$58.2 million to US$22.1 million in the year, through a combination of changes in fair value and foreign exchange, resulting in a loss of US$42.9 million recognised in other expenses. The fair value of US$22.1 million is presented within non-current financial assets at 31 December 2025, reflecting the expected long-term timing of any future recovery from the resubmitted arbitration.

Under the terms of the Insurance, to the extent Rockhopper makes any future financial recovery from the resubmitted arbitration or otherwise, after deducting reasonable costs and expenses, that recovery will be utilised to reimburse the insurers. Management has determined that this repayment obligation is a financial liability within the scope of IFRS 9 and has recognised a non-current liability of US$21.6 million representing its fair value, estimated on the same probability-weighted basis as the Tranche 3 proceeds and capped at an undiscounted value of €31 million.

Finance Income and Expense

Finance income for the year was US$2.1 million (2024: US$1.9 million), comprising the unwinding of the discount on the fair value of the Monetisation Agreement prior to annulment of US$1.2 million (2024: US$1.3 million) and bank and deposit interest of US$0.9 million (2024: US$0.6 million).

Finance expense increased to US$2.4 million (2024: US$0.3 million), principally reflecting interest of US$2.2 million accruing on the co-venturer loan provided by Navitas in connection with the Sea Lion pre-FID expenditure programme (2024: US$0.2 million). The cumulative balance of this loan, including accrued interest, at the year end was US$52.5 million (2024: US$15.4 million).

Cash Movements And Capital Expenditure

As at 31 December 2025, the Group had cash and cash equivalents of US$157.6 million (31 December 2024: US$0.9 million) and term deposits of US$13.4 million (31 December 2024: US$20.0 million). In addition, US$8.2 million of cash and term deposits held within Rockhopper Civita Limited is presented within assets classified as held for sale, being ring-fenced in accordance with the terms of the disposal agreement. Together with the undrawn committed Senior Debt Facility of US$350 million, total available liquidity at the year end was US$521.0 million.

Cash flows from operating activities generated US$29.5 million (net of working capital movements and before tax). Tax paid in the year was US$5.3 million, principally comprising the first two instalment payments under the FIG Settlement Deed totalling GBP3 million. The principal cash movements during the period are set out below:

	US$m
Opening cash (31 December 2024)	0.9
Cash generated from operating activities	29.5
Tax paid	(5.3)
Term deposits (net release)	8.2
Purchase of PPE and intangibles	(0.0)
Exercise of share options	0.2
Issuance of shares and warrants (net of costs)	135.0
Loan funding (co-venturer loan)	9.1
Prepaid financing costs	(12.8)
Exchange gain on cash	1.0
Closing cash per cash flow statement (31 December 2025)	**165.8**
Less: cash within assets held for sale (Rockhopper Civita)	(8.2)
Cash and cash equivalents per balance sheet	**157.6**

Additions to exploration and evaluation assets during the year of US$58.4 million (2024: US$14.7 million) relate to the Sea Lion development and were funded primarily through the pre-FID co-venturer loan facility provided by Navitas.

Following FID and financial close, all exploration and evaluation assets of US$329.2 million were reclassified to development and production assets within property, plant and equipment at 31 December 2025. An impairment assessment was performed immediately prior to reclassification in accordance with IAS 36, using a Value in Use discounted cash flow approach with a pre-tax discount rate of 8.08%, and no impairment was identified. Post-FID capital commitments of US$579 million have been approved in connection with the Sea Lion Phase 1 development programme.

Other Receivables

Other receivables at 31 December 2025 were US$18.7 million (2024: US$62.3 million). The significant decrease reflects the cash receipt of the €31 million insurance proceeds in August 2025 and the reclassification of the Monetisation Agreement fair value to non-current financial assets, partially offset by an increase in prepayments. Prepayments of US$18.0 million at 31 December 2025 principally comprise prepaid costs and loan arrangement fees relating to the Senior Debt Facility, which will be capitalised and amortised over the term of the facility.

The fair value of the Monetisation Agreement of US$22.1 million is presented as a non-current financial asset at 31 December 2025 (2024: US$58.2 million within current other receivables), reflecting the expected long-term timing of any future recovery from the resubmitted arbitration.

Taxation

On 9 December 2025 the Company and the Falkland Islands Government ("FIG") entered into a final Settlement Deed in respect of the historic tax uncertainty arising from the 2012 and 2022 farm-outs. The Settlement Deed provides for total payments of GBP30 million in eight instalments linked to the Sea Lion development timeline. The first two instalments totalling GBP3 million were paid in December 2025. The Settlement Deed also operates to settle any tax liability arising in connection with the 2022 farm-out to Navitas Petroleum.

The liability has been discounted at 10% per annum, being the rate inherent in the Settlement Deed for early payment, giving a present value of GBP15.5 million (US$20.9 million) at 31 December 2025. No further instalments fall due within twelve months of the balance sheet date, with all remaining payments linked to the timing of First Oil, which is not expected until 2028; accordingly the full carrying value is presented within non-current liabilities.

The net tax credit of US$3.8 million (2024: charge of US$30.4 million) reflects: a current tax charge of US$1.0 million, comprising a prior year adjustment of US$1.9 million mainly arising from the remeasurement of the FIG Settlement Deed liability; and a deferred tax credit of US$6.7 million reflecting the reduction in deferred tax liabilities in the year.

Equity and Financing

In December 2025 the Company completed an equity fundraise by way of a Placing and Subscription at an issue price of 53 pence per Unit, raising gross proceeds of US$142 million. Each Unit comprised one new Ordinary Share and, for every four new Ordinary Shares subscribed for, one Warrant exercisable at 80 pence per Ordinary Share. The Placing utilised a cashbox structure in accordance with section 612 of the Companies Act 2006, with the premium on the ordinary shares recognised within the merger reserve. Net proceeds received in the year, after costs of US$7.0 million, were US$135.0 million.

As a result of the fundraise and the exercise of share options during the year, total equity increased to US$347.2 million at 31 December 2025 (2024: US$248.4 million). The weighted average number of shares in issue during the year was 645.7 million (2024: 643.6 million). A basic loss per share of 6.15 cents is reported (2024: earnings per share of 7.40 cents).

Subsequent to the year end, the Company completed an Open Offer to Qualifying Shareholders at the same issue price of 53 pence per share, raising gross proceeds of approximately GBP6.9 million (approximately US$9.2 million) through the issue of 13,188,036 new ordinary shares. Admission took place on 21 January 2026, at which date the Company's total issued share capital comprised 860,504,777 ordinary shares.

Liquidity, Counterparty Risk and Going Concern

The Directors have assessed the Group's ability to continue as a going concern for a period of at least twelve months from the date of approval of the financial statements, being to 30 June 2027 (the "Assessment Period").

At 31 December 2025, the Group had cash and cash equivalents of US$157.6 million, term deposits of US$13.4 million and an undrawn committed Senior Debt Facility of US$350 million, providing total available liquidity of US$521.0 million. The Group is pre-revenue and has not yet achieved first oil.

The base case cash flow forecast, which incorporates the Sea Lion Phase 1 development programme consistent with the approved banking model together with corporate and administrative expenditures and tax obligations, indicates that the Group's existing cash resources are sufficient to meet all committed expenditure within the Assessment Period. The Directors are satisfied that, having regard to the contingencies in the approved cost estimate, the Equity Overrun Support mechanism, and the cost-sharing structure under the Co-Venturer Loan arrangements under which the Group is required to fund only one-third of its share of project capital costs prior to completion, the Group's funding position is resilient to reasonably foreseeable cost movements within the Assessment Period. Sensitivity analysis, including a reasonable downside scenario modelling gross capital expenditure increases above the base case, confirms that the Group maintains sufficient liquidity under all scenarios considered.

First drawdown under the Senior Debt Facility is forecast to occur toward the end of the Assessment Period. Management has reviewed the conditions precedent to first drawdown and considers all are reasonably capable of being satisfied in accordance with the project timeline.

The Directors do not consider that any material uncertainty exists that would cast significant doubt on the Group's ability to continue as a going concern within the Assessment Period. Accordingly, they consider it appropriate to adopt the going concern basis of accounting in preparing these financial statements.

Principal Risks and Uncertainties

A fundamental element of the internal control structure involves the identification and documentation of significant risks, the likelihood of those risks occurring, their potential impact and the plans for managing and mitigating each of those risks. These assessments are reviewed by the Board. The plans are discussed, updated and reviewed at each board meeting, and any matters arising from internal reviews or external audit are also considered.

Rockhopper's only material asset is its 35% non-operating interest in the Sea Lion Phase 1 development. All principal risks therefore relate to this single asset. A full description of each risk and the mitigating actions taken by the Board is set out in the Principal Risks and Uncertainties section of the Strategic Report.

> **Funding and capital structure:** The Group is fully funded to First Oil under its base case, supported by the US$350 million Senior Debt Facility, the Navitas Post-FID Loan and Underwriting Warrants; material cost overruns beyond the funded contingencies could require additional capital.
> **Cost overrun**: Phase 1 gross capital costs are estimated at approximately US$1.7 billion; whilst lump sum contracts have been awarded for major scopes and contingency is included, global supply chain pressures could drive costs above the current estimate.
> **Oil price**: Sea Lion has a certified breakeven below US$24 per barrel, providing significant headroom; a sustained material decline in oil prices would nonetheless reduce project returns and could affect future financing.
> **Project execution**: All Phase 1 workstreams are on track against the H1 2028 First Oil target; execution risks inherent in a large remote offshore development remain, including subsea installation, drilling and on-island infrastructure.
> **Geopolitical** — sovereignty: The sovereignty of the Falkland Islands is disputed by Argentina; whilst no operational disruption has been experienced, the dispute represents a background risk to the project environment.
> **Non-operator governance**: As a 35% non-operating partner, Rockhopper does not control day-to-day development decisions; it participates actively in JV governance and Navitas is a funded, committed operator.
> **Energy transition**: Lender appetite for oil and gas financing has narrowed; project financing has been secured and Financial Close achieved, and the Group's focus is on maintaining full compliance with the ESG commitments attached to the debt facility.
> **Physical climate**: The South Atlantic operating environment carries inherent weather risk; vessels, equipment and operations are specified for the metocean conditions and the project budget includes appropriate weather contingency.
> **Italian disposal**: Completion of the sale of Rockhopper Civita Limited remains subject to Italian regulatory approval, with the long-stop date extended to 30 June 2026.
> **HSE and security**: No HSE incidents have been recorded to date; the project complies with all applicable HSSE obligations in accordance with regulatory and project financing requirements, and execution strategies are adapted to manage geopolitical security risks.
> **People and organisation**: As a small company with a single material asset, Rockhopper is reliant on a focused team; the Remuneration Committee regularly reviews compensation to retain key individuals through the development phase.

Principal Risks and Uncertainties

A fundamental element of the internal control structure involves the identification and documentation of significant risks, the likelihood of those risks occurring, their potential impact and the plans for managing and mitigating each of those risks. These assessments are reviewed by the Board. The plans are discussed, updated and reviewed at each board meeting, and any matters arising from internal reviews or external audit are also considered.

Category	Description	Potential Impact
STRATEGIC	**Funded to First Oil — cost overruns, project delays or debt facility disruption could require additional capital** The Group is fully funded to First Oil on its base case following completion of the Capital Raising. Phase 1 gross capital costs to First Oil are estimated at approximately US$1.7 billion (excluding financing costs). The project is supported by approximately US$1.0 billion of senior secured debt. Material cost overruns, or a disruption to the debt facility arising from a covenant breach, could require the Group to raise additional capital	> Additional equity or debt financing may be required if cost overruns exhaust available resources > The senior debt facility is subject to customary covenants; a breach could result in a stop to drawdown or a requirement to prepay, placing material additional demands on the Group's resources > Further dilution of shareholders through potential future equity issuance > Delay to First Oil and associated cash flows in a severe scenario
STRATEGIC	**Falkland Islands sovereignty — strong UK government support; diplomatic risk remains** The sovereignty of the Falkland Islands is disputed by Argentina. The British Government actively defends UK sovereignty and the Falkland Islanders voted overwhelmingly to remain a British Overseas Territory in a 2013 referendum. Ongoing diplomatic tensions could nonetheless affect the availability of certain service providers, financing and logistics.	> Certain service providers and financial institutions may decline to engage with the project > Potential restrictions on logistics routes, supply chains or insurance > Adverse impact on project economics if restrictions were imposed
STRATEGIC	**Funded and committed operator — JV alignment and non-operator status** Navitas (65%, operator) is funded with committed project financing in place. As a 35% non-operating partner, Rockhopper participates actively in JV governance but does not control day-to-day development decisions. Misalignment on scope, cost or commercial matters could adversely affect Rockhopper.	> Key development decisions are made by the operator; Rockhopper retains governance rights but not operational control > The operator could carry out exclusive operations in certain circumstances, diluting Rockhopper's interest > Scope changes or cost escalation decisions made by the operator may affect Rockhopper's funding requirement

Rockhopper's most material asset is a 35% non-operating interest in the Sea Lion oil field, offshore the Falkland Islands, operated by Navitas Petroleum (65%). All of the Group's principal risks are therefore associated with the Sea Lion Phase 1 development. Final Investment Decision was taken in December 2025 and Financial Close was achieved. First Oil is targeted for H1 2028. The Group is funded to First Oil on its base case. Climate-related risks are presented separately below in accordance with the Group's commitment to transparent TCFD-aligned disclosure. The risks identified represent those considered material by the Directors as at the date of signing; they do not comprise all risks associated with an investment in the Company.

	Mitigants	Recent changes and ongoing initiatives
	> Group is fully funded to First Oil on its base case following completion of the Capital Raising > Navitas Post-FID Loan funds the majority of Rockhopper's Phase 1 equity requirement, with Navitas funding two-thirds of any cost overrun above base case > US$53.6 million of Underwriting Warrants outstanding at 80p per share provide additional funding optionality > Project budget incorporates appropriate contingencies; with contracting strategy including incentives for contractors to deliver on time and a number of contracts on fixed price basis > Active monthly monitoring of cash forecasts against project spend	> Capital Raising completed providing approximately US$140 million, with Financial Close achieved and all debt financing completion conditions satisfied > Phase 1 capital cost forecast maintained at approximately US$1.7 billion (excluding financing costs) with Phase 1 currently fully funded
	> British Government issues strong rebuttals to Argentine sovereignty claims > Regular engagement maintained with the Falkland Islands Government > Falkland Islanders voted overwhelmingly to remain a British Overseas Territory in the 2013 referendum > FIG is fully supportive of the Sea Lion development	> Argentina unilaterally cancelled the Foradori-Duncan Pact in 2023; the Argentine President has reiterated non-negotiable sovereignty claims > No material operational disruption to the project has been experienced > The British Government's position in support of the Falkland Islands' right to self-determination remains unchanged
	> Globally experienced project team recruited by the operator > Active participation by Rockhopper in JV technical and commercial meetings > Joint Operating Agreement provides legal protections, veto rights and remedies > Regular senior management engagement between Rockhopper and Navitas	> Navitas is funded and a committed operator with all Phase 1 project workstreams reporting on track at the time of signing this document > Monthly project reporting confirms active collaboration across all disciplines > All key Phase 1 contracts have been executed or are in the process of being awarded in accordance with the project schedule

Category	Description	Potential Impact
FINANCIAL	**Potential project costs could increase** Phase 1 is currently funded to the gross capital cost estimate of approximately US$1.7 billion (excluding financing costs). Global geopolitical developments and supply chain conditions create a risk that certain project costs may increase. The project team actively monitors these risks and adjusts procurement and execution strategies accordingly, including where appropriate changing approach to reduce risk; such changes may carry an associated cost impact but are expected to remain within overall project contingency.	> Rockhopper would be required to fund 11.66% of any additional gross JV equity requirement not covered by contingency > Additional Group funding could be required if the base equity requirement of approximately US$112 million is materially exceeded > Schedule delays would increase financing costs and defer cash flows > Increasing competition with offshore renewables for access to the offshore supply chain could increase capital costs or delay delivery
FINANCIAL	**Current oil price environment very supportive — price at First Oil remains uncertain** Current crude oil prices are highly supportive of Sea Lion's economics and currently significantly higher than both the banking case and the group's long-term assumptions. Sea Lion has an independently certified break even of approximately US$25 per barrel across all phases, providing significant resilience to price movements. The oil price prevailing at and following First Oil remains uncertain and a sustained material decline could reduce project returns and constrain financing capacity.	> Lower oil prices at or after First Oil would reduce expected revenues, margins, cash flows and returns > A sustained low-price environment could reduce debt capacity or create covenant pressure on project financing > Impairment of the carrying value of licence interests in a sustained low-price environment
FINANCIAL	**Falkland Islands tax position agreed and reflected in financial statements** The previously disputed tax position with the Falkland Islands Government in relation to the 2012 farm-out has been resolved and the outcome is reflected in the Group's financial statements. Changes to the broader FIG fiscal regime could nonetheless affect future project economics.	> Changes to the FIG fiscal regime could affect project returns and economics in future periods > Any future tax or fiscal disputes would require management time and legal costs to resolve

Mitigants	Recent changes and ongoing initiatives
> Robust contingencies incorporated in the project budget > Lump sum contracts awarded for major scopes to limit cost exposure > Navitas to fund two-thirds of any cost overrun equity via the Post-FID Loan > Contractor performance incentive schemes in place > Active monthly cost monitoring and reporting against budget; procurement and execution strategies adapted proactively to manage emerging risks > Continuous engagement with the operator to monitor resource availability and cost	> Total Phase 1 capital cost currently funded at approximately US$1.7 billion (excluding financing costs) > The project team proactively reviews and, where appropriate, adjusted certain procurement and execution strategies to reduce geopolitical and supply chain risk;
> Sea Lion break even under US$24 per barrel (Phase 1 to 3 average) — strong resilience to oil price movements > Phased development approach allows future phases to be calibrated to the prevailing price environment > Financial model has been stress-tested against a range of commodity price forecasts including materially lower price scenarios > Post-First Oil, the Company will implement appropriate hedging strategies to provide cash flow certainty in line with the terms of the senior debt facility > NSAI independently certified 2P reserves net to Rockhopper of approximately 110 million barrels with an NPV10 of approximately US$966 million (after Falkland Islands corporate income taxes), as of 31 December 2025, using a Brent Oil price of US$73.63/bbl	> Current oil price environment is very supportive of project economics > NSAI updated its independent resource evaluation as at 31 December 2025 (report dated 31 March 2026); 2P reserves net to Rockhopper certified at approximately 110 million barrels (NPV10 approximately US$966 million after Falkland Islands taxes) > No material change to base case price assumptions in the project Financial Model
> Agreed tax position with FIG now reflected in the Group's financial statements — historical position agreed > Ongoing constructive dialogue maintained with FIG across all fiscal and regulatory matters > Legal agreements in place to protect licence interests > Appropriate tax and legal advice obtained on an ongoing basis	> The previously disputed FIG tax position has been agreed and is fully reflected in the Group's current financial statements > Continued positive engagement with FIG on commercial, fiscal and regulatory matters

Category	Description	Potential Impact
CLIMATE — TRANSITION	**ESG credentials and access to finance and insurance — debt secured; ongoing obligations require active management** The number of banks and institutional lenders willing to finance oil and gas projects has declined as financial institutions respond to the energy transition. Remaining lenders may include ESG key performance indicators and ongoing reporting obligations within their facilities. Similarly, the availability and cost of insurance for oil and gas exploration and production activities may be affected by insurers' own ESG policies. Project financing has been secured; the Group's focus is on ensuring full compliance with all ESG commitments linked to the debt facility, and maintaining alignment with insurers' requirements.	> Cost of debt could increase on any future refinancing if the pool of oil and gas lenders continues to shrink > Available insurance capacity could be constrained or the cost of coverage could increase, affecting project economics > Negative perception from lenders, shareholders and other stakeholders if ESG commitments are not met
CLIMATE — TRANSITION	**Credible ESG strategy and reputation — active management as a non-operator** Rockhopper's reputation and key stakeholder relationships could be impacted negatively by perceptions — whether arising from the Company's own activities or those of its JV partner — that the Group does not have a credible or fit-for-purpose ESG strategy. Negative ESG perception can affect relationships with lenders, shareholders, employees and FIG. As a non-operator, Rockhopper is reliant on the operator to ensure that the JV's activities are carried out in a compliant manner. Rockhopper engages with the operator where possible and seeks to support compliance efforts, but ultimate responsibility for operational execution rests with the operator.	> Negative perception among lenders, shareholders, employees and regulatory authorities, affecting access to stakeholder support > Reputational damage if JV activities are perceived as inconsistent with the Group's stated ESG commitments > Impact on the Group's ability to attract and retain talent
CLIMATE — TRANSITION	**Shift in consumer preferences and long-term demand — Sea Lion's low break even provides resilience** The accelerating development of energy-related innovations technologies such as, sustainable aviation fuels, alongside broader shifts in consumer preferences, could reduce the long-term demand for oil and gas and exert downward pressure on commodity prices. This risk is assessed as long-term in nature, given the expected production profile of Sea Lion.	> Reduced long-term demand for oil could lower commodity prices and affect the economics of Phase 2 and subsequent development phases > Lower prices could reduce the self-funding capacity of Phase 1 cash flows for subsequent phases

Mitigants	Recent changes and ongoing initiatives
> Project debt financing has been secured; ESG obligations linked to the facility are actively monitored and managed > As a non-operator, Rockhopper is reliant on the operator to ensure that the JV's activities are carried out in a compliant manner. Rockhopper engages with the operator where possible and seeks to support compliance efforts, but ultimate responsibility for operational execution rests with the operator. > Operator conducted independent environmental and social monitoring in place in accordance with regulatory and project financing requirements	> Project financing secured and Financial Close achieved; all ESG-linked conditions satisfied at Financial Close > The project continues to actively monitor, report on and comply with all applicable ESG, environmental and HSSE obligations in accordance with project financing requirements
> As a non-operator, Rockhopper maintains a focused and effective team and remains fully compliant with all applicable ESG requirements > Active engagement with Navitas to ensure the JV's ESG activities and reporting are fit for purpose and compliant > The Group is committed to operating in an environmentally responsible manner in accordance with all applicable regulations	> The project continues to actively monitor, report on and comply with all applicable ESG and HSSE obligations > Group continues to engage constructively with FIG on all ESG matters
> Sea Lion Phase 1 production is expected to commence in Q1 2028 and the long-term demand risk is assessed as most relevant over a 10 to 20 year horizon > Sea Lion's break even below US$24 per barrel provides resilience across a wide range of demand and price scenarios, including low-demand transition scenarios > The Group's financial model is stress-tested against a range of commodity price forecasts, including scenarios where demand is significantly reduced > Phased development allows subsequent phases to be calibrated to the prevailing market environment	> NSAI independently certified 2P reserves net to Rockhopper of approximately 110 million barrels as at 31 December 2025, confirming the long-term resource base > No material change to the Group's assessment of long-term demand risk or to project financial model assumptions

Category	Description	Potential Impact
CLIMATE — PHYSICAL	**Adverse weather and physical climate risk — remote Falkland Islands location** The Sea Lion development is located in a remote offshore environment in the South Atlantic. Storms, severe weather events and other adverse physical conditions could affect marine and subsea operations, offshore installation activities and drilling campaigns. Climate change may increase the frequency or severity of extreme weather events over the life of the field.	> Health and safety risks to offshore personnel and marine vessels > Operational downtime during installation, drilling and production phases, increasing costs and potentially delaying First Oil > Supply chain and logistics disruptions affecting the delivery of critical project equipment
OPERATIONAL	**First Oil targeted H1 2028 — project on schedule across all workstreams** All Phase 1 project delivery areas are currently reporting on track against the Q1 2028 First Oil target. Execution risks inherent in a large, remote offshore development nonetheless remain, spanning marine and topside facilities, subsea installation, drilling operations and on-island infrastructure. The project team actively manages these risks through its contractor base and execution strategy.	> Delay to First Oil would increase project financing costs and defer cash flows > Sustained delays could require additional funding beyond current forecasts > Project non-completion in an extreme scenario would have a material and potentially terminal impact on the Company
OPERATIONAL	**Experienced contractor base in place — remote location execution risk remains** Proven, experienced contractors have been appointed across all key workstreams following a competitive tender process. As a non-operator in a remote location, Rockhopper is dependent on Navitas and its contractor base to deliver safely, on time and within budget. Performance risks inherent in any large offshore development remain.	> Cost and schedule overruns resulting from poor contractor performance or unforeseen technical or operational issues > HSE incidents with reputational and financial consequences > Failure to meet licence work obligations
OPERATIONAL	**Well-appraised field — reservoir performance uncertainty remains** Sea Lion is a well-appraised field with an extensive well test dataset and independently certified reserves and resources. As with all oil and gas developments, actual production and quantities of reserves and resources may differ from certified estimates due to real world reservoir and well performance differing from current model predictions. Phase 1 cash flows are expected to fund subsequent development phases	> Lower than forecast production rates could reduce revenues and Phase 2 and subsequent phases' self-funding capacity > Impairment of licence interests and potential impact on project financing covenants in a downside scenario

Mitigants	Recent changes and ongoing initiatives
> All project vessels, equipment and operations are designed and specified for the South Atlantic metocean environment, drawing on extensive field-specific data > Navitas, as a prudent operator, is required to ensure that operational conditions are managed safely and appropriate plans are in place to enable this as well as responding to any changes > Project budget and schedule incorporate appropriate contingencies for expected seasonal weather conditions and non-productive time allowances > Marine facilities are designed to remain on location and operate safely in the field's specific environmental conditions	> Metocean design criteria have been incorporated into all project contracts and equipment specifications > Adverse weather contingency plans form part of the project's overall risk management framework > No material weather-related disruptions to project activities at the time of signing this document
> Phased development approach reduces execution complexity > Marine production and offloading facilities are sourced through the redeployment of an existing vessel, providing schedule and cost certainty advantages over a newbuild > Experienced contractor base selected across all project workstreams following a rigorous tender process > Budget and schedule contingencies incorporated in project estimates	> All Phase 1 project delivery areas reporting on track at the time of signing this document > Marine and topside facilities procurement and engineering progressing in accordance with the project schedule > Subsea fabrication underway and on schedule at the time of signing this document > Drilling programme progressing; key contracts executed and long-lead equipment orders placed in accordance with the project schedule
> Active participation by Rockhopper in JV technical and commercial oversight throughout the project > Field proven technology being deployed in all areas covering wells, subsea and FPSO > Experienced contractors selected through rigorous tender processes across all key workstreams > Performance incentive structures in place with key contractors > Independent lenders' engineer providing ongoing oversight of project delivery > Monthly project reporting against key milestones and budget	> All project workstreams reporting on track at the time of signing this document > Fabrication and procurement activities underway across marine facilities, subsea equipment and drilling long-leads > Contractor performance tracking in line with expectations
> Sea Lion discovered in 2010 and extensively appraised with multiple wells and flow tests prior to FID > Independent reserve and resource certification by NSAI updated as at 31 December 2025 > Conservative subsurface assumptions used in the project financial model > Phased development approach allows operational and reservoir learnings to be incorporated into subsequent phases	> NSAI updated its independent evaluation as at 31 December 2025 (report dated 31 March 2026); 2P reserves net to Rockhopper of approximately 110 million barrels certified > Total 2C contingent resources (gross, all subclasses) of approximately 603 million barrels (best estimate) as at 31 December 2025 > Subsurface assumptions remain consistent with those used in the project financial model

Category	Description	Potential Impact
HSE & SECURITY	**Strong HSE record — remote offshore operations require continued vigilance** No HSE incidents have been recorded on the project to date. The Sea Lion development involves offshore and subsea construction and installation in a remote location. Global security and geopolitical conditions are monitored on an ongoing basis and the project execution strategy is adapted where appropriate to manage emerging risks proactively.	> Serious injury or death to personnel > Material environmental damage in Falkland Islands waters > Project suspension, regulatory penalties and significant reputational damage > Security incidents affecting project personnel, equipment or logistics > Associated project delays due to the items listed above
ORGANISATIONAL	**Experienced board and management team — key person dependency inherent in a small company** Rockhopper has an experienced and stable board and management team with deep knowledge of the Falkland Islands and the Sea Lion asset. As a small company with a single material asset, retention of key individuals is important to provide effective oversight of the development. The broader industry challenge of attracting new talent into the oil and gas sector is also noted.	> Loss of institutional knowledge and JV relationships built over many years > Disruption to board and management oversight of the project > Additional cost and time to recruit and embed suitable replacements > Unfavourable public perception of the oil and gas sector may, in time, make it more challenging to recruit certain specialist skills

Mitigants	Recent changes and ongoing initiatives
> Competent contractors with proven track records in > Regulatory compliance activities are progressing both through engagement with FIG and development of Project's internal compliance processes. > Independent environmental and social monitoring in place in accordance with project financing requirements > Global security and geopolitical risks actively monitored; execution strategies adapted as appropriate	> No accidents or incidents recorded on the project at the time of signing this document > The project continues to actively monitor, report on and comply with all applicable environmental, social and HSSE obligations in accordance with project financing requirements > Execution strategies have been proactively adapted in certain areas to manage global security and geopolitical risks, with the Group satisfied that the project remains on track and fully funded to First Oil
> CEO and senior staff have notice periods of 6 to 12 months > Succession planning considered regularly at Board level > Remuneration Committee regularly reviews compensation and incentivisation to ensure they remain appropriate and competitive > As a small, focused team, Rockhopper is well-placed to attract individuals motivated by the significance and scale of the Sea Lion project > Training and development opportunities available to all staff and Board members	> Board composition stable; senior management team fully engaged across all active Phase 1 workstreams > All senior managers retained with relevant oil and gas development and project experience

Directors' Statement under Section 172 (1) of the Companies Act 2006

Section 172 (1) of the Companies Act obliges the Directors to promote the success of the Company for the benefit of the Company's members as a whole.

The section specifies that the Directors must act in good faith when promoting the success of the Company and in doing so have regard (amongst other things) to:

a) The likely consequences of any decision in the long term;
b) The interests of the Company's employees;
c) The need to foster the Company's business relationship with suppliers, customers and others;
d) The impact of the Company's operations on the community and environment;
e) The desirability of the Company maintaining a reputation for high standards of business conduct, and
f) The need to act fairly as between members of the Company.

The Board of Directors is collectively responsible for the decisions made towards the long-term success of the Company and the way in which the strategic, operational and risk management decisions have been implemented throughout the business is detailed in this Strategic Report.

Employees

Our employees are one of the primary assets of our business and the Board recognises that our employees are the key resource which enables the delivery of the Company's vision and goals.

We ensure that:

> Health, Safety and the Environment are considered paramount throughout the organisation;
> There is competitive pay and employee benefits;
> There is ongoing training provided and development and career prospects are available;
> There are freely available company policies and procedures;
> Employees are informed of the results and important business decisions and are encouraged to feel engaged and to improve their potential; and
> Working conditions are favourable.

The Company has worked to ensure that employees are safe and well, both physically and mentally. The majority of staff work in the office on a hybrid basis.

The Remuneration Committee oversees and makes recommendations on executive remuneration and any long-term share awards. The Board encourages management to continually improve employee engagement and to provide necessary training in order to use their skills in the relevant areas in the business.

Suppliers, customers, JV partners and regulatory authorities

The Board acknowledges that a strong business relationship with suppliers, customers and JV partners is a vital part of growth. The Board upholds ethical business behaviour across all of the Company's activities and encourages management to seek comparable business practices from all suppliers, customers and JV partners doing business with the Company. We value the feedback we receive from our stakeholders and we take every opportunity to ensure that where possible their wishes are duly considered.

Community and environment

The Company fully recognises that the oil and gas industry, alongside other stakeholders such as governments, regulators and consumers, must contribute to reduce the impact of carbon-related emissions on climate change, and is committed to contributing positively towards the drive to net-zero.

Maintaining high standards of business conduct

The Company is incorporated in the UK and governed by the Companies Act 2006. The Company has adopted the QCA Code and the Board recognises the importance of maintaining a good level of corporate governance, which together with the requirements to comply with the AIM Rules ensures that the interests of the Company's stakeholders are safeguarded. The Board has directed that ethical behaviour and business practices should be implemented across the business. Anti-corruption and anti-bribery training are compulsory for all staff and contractors and the anti-bribery statement and policy is provided on the Company's website. The Company's expectation of honest, fair and professional behaviour is reflected by this and there is zero tolerance for bribery and unethical behaviour by anyone representing the Company.

The importance of making all employees feel safe in their environment is maintained and a Whistleblowing Policy is in place to enable staff to confidentially raise any concerns freely and to discuss any issues that arise. Strong financial controls are in place and are well documented. The Board regularly considers the key business risks and a risk matrix is discussed by the Board on a regular basis.

Shareholders

The Board places equal importance on all shareholders and recognises the significance of transparent and effective communications with shareholders. As an AIM listed company there is a need to provide fair and balanced information in a way that is understandable to all stakeholders and particularly our shareholders.

The primary communication tool with our shareholders is through the Regulatory News Service, ('RNS') on regulatory matters and matters of material substance. The Company's website provides details of the business, investor presentations and details of the Board and Board Committees, changes to major shareholder information and QCA Code disclosure updates under AIM Rule 26. Changes are promptly published on the website to enable the shareholders to be kept abreast of the Company's affairs. The Company's Annual Report and Notice of Annual General Meetings (AGM) are available to all shareholders.

The Interim Report and other investor presentations are also available on our website.

The Board acknowledges that encouraging effective two-way communication with shareholders encourages mutual understanding and better connection with them. Investor events are also arranged with shareholders throughout the year which present an opportunity for shareholders to speak with the Executive Directors in a formal environment and in more informal one to one meetings. By providing a variety of ways to communicate with investors the Company feels that it reaches out to engage with a wide range of its stakeholders. The Company has endeavoured to maintain communication with investors and believes that engagement has been carried out efficiently.

Board of Directors

Simon Thomson
Independent Non-Executive Chair 61

Skills and experience
Simon is a highly experienced oil and gas executive with experience in international corporate transactions, international arbitrations and legal disputes.

Simon held the position as Chief Executive of Cairn Energy plc (subsequently Capricorn Energy PLC) from 2011 until 2023, having joined Cairn in 1995.

Appointed to board:
October 2023

Committee membership:
> Nomination (Chair)
> Audit & Risk
> Remuneration

External appointments:
> Big Technologies Plc
> Ardmore Energy Ltd
> Nama Energy Group PLC
> Scottish Creel Fishermans Federation

Samuel Moody
Chief Executive Officer 56

Skills and experience
Sam is a co-founder of Rockhopper and has been responsible for building and managing the group from its formation in early 2004.

Sam previously worked in several roles within the financial sector, including positions at AXA Equity & Law Investment Management and St Paul's Investment Management.

Appointed to board:
February 2005

Committee membership:
—

External appointments:
—

Alison Baker
Senior Independent Director 55

Skills and experience
Alison has 25 years' experience in provision of audit, capital markets and advisory services.

Alison previously led the UK and EMEA Oil & Gas practice at PricewaterhouseCoopers and prior to that the UK Energy, Utilities and Mining Assurance practice at Ernst & Young.

Appointed to board:
September 2018

Committee membership:
> Audit & Risk (Chair)
> Remuneration
> Nomination

External appointments:
Director:
> Helios Towers plc
> Endeavour Mining Plc
> Capstone Copper Corp
> Central Asia Metals plc

Paul Mayland
Independent Non-Executive Director 58

Skills and experience
Paul has over 30 years' experience in the upstream oil and gas industry and has been instrumental in overseeing numerous final investment decisions.

Paul was appointed as Senior Vice President – International Gas & LNG at ADNOC in September 2023. Previously he was Chief Operating Officer of Cairn Energy Plc (subsequently Capricorn Energy PLC) and prior to that worked at BG Group and Vermilion Energy.

Appointed to board:
October 2023

Committee membership:
> Remuneration (Chair)
> Audit & Risk
> Nomination

External appointments:
Director:
ADNOC International UK Limited

Richard Slape
Independent Non-Executive Director 60

Skills and experience
Richard has extensive board level experience within the energy sector and was also an oil and gas analyst for over 25 years prior to moving into corporate roles within the industry. He has fulfilled a number of senior executive roles including Chief Financial Officer of Kistos Holdings (and its predecessor) from 2021 to 2024. Prior to joining Kistos, he was the Chief Financial Officer of RockRose Energy and he has also served on the board of Lansdowne Oil & Gas.

Appointed to board:
January 2026

Committee membership:
> Audit & Risk (Chair designate)
> Remuneration
> Nomination

External appointments:
—

Governance Report

Introduction by the Chair, Simon Thomson

Rockhopper is listed on the AIM Market of the London Stock Exchange (AIM) and as such is required to apply a recognised corporate governance code. The Board has adopted the Quoted Companies Alliance Corporate Governance Code (the "QCA Code"), which is designed for small to mid-sized companies and which has been adopted by many AIM companies.

During 2023, the QCA published an updated corporate governance code (the "2023 QCA Code") which applies to financial years beginning on or after 1 April 2024. The Company has migrated to the 2023 QCA Code and a table with the principles and associated disclosures is included on Pages 34 to 37 of the Governance Report.

Corporate Governance Statement

As Chair of the Company, I believe that strong governance supports the execution of the Company's strategy and delivery of shareholder value. Along with the rest of the Board, I am committed to ensuring that high standards of corporate governance are maintained and that the governance structures and processes are fit for purpose and support good decision making by the Board. All Board members work to ensure that the Company's values are promoted and its strategy clearly communicated across the Group and to shareholders and stakeholders.

Following progressing the Sea Lion Development to Final Investment Decision, I will continue working with the Board in our capacity as a non-operating partner alongside our operator, Navitas Petroleum, with a focus to deliver the project in an environment of good corporate governance and to grow the business in accordance with our values and principles for the benefit of all shareholders and stakeholders.

Corporate culture

The Company is committed to ensuring that there is a healthy corporate culture and that all employees are aware of the corporate culture which is overseen by the Board. The Company has put in place a number of policies and procedures which are designed to ensure that ethical and transparent behaviour is recognised and followed across the Group. These include the HSE Policy, Code of Business Conduct and Social Responsibility, Anti-Bribery and Corruption Policy and Procedures , Anti -Money Laundering Policy and Share Dealing Code.

Following the Final Investment Decision on the Sea Lion Development, the Company is in the process of reviewing and updating its corporate policies to ensure that they are appropriate for the next stage of the Company's development.

Board composition

The Board currently consists of a Non-Executive Chair, one Executive Director and three Non-Executive Directors, one of whom is the Senior Independent Director.

There were no changes to the Board's composition during 2025. Since the year end Richard Slape has been appointed as a Non-Executive Director and Alison Baker, Senior Independent Director, has announced her intention to retire from the Board at the 2026 Annual General Meeting.

The Board considers that the Chair and the Non-Executive Directors are all independent. Richard Slape, who was appointed as a Non-Executive Director in January 2026, was briefly an employee of Rockhopper over 10 years ago with responsibility for IR and new business and subsequently joined Rockrose and Kistos Energy where he became CFO. The Board has concluded that Richard Slape demonstrates independence of character and judgement and that, notwithstanding his previous employment at Rockhopper, there are no circumstances which are likely, or could be perceived to be likely, to affect his judgement.

Other than any shareholdings in the Company and the receipt of fees for acting as Directors, the Chair and Non-Executive Directors have no financial interests in the Company or business relationships that would interfere with their independent judgement. Full details of Directors' shareholdings and fees received are disclosed in the Remuneration Report of these financial statements.

Board composition during the year

Name	Role	Independent	Length of service as at 2 June 2026	Date of appointment	Date of resignation
Non-Executives					
Simon Thomson	Non-Executive Chair	Yes	2 yrs 8 mths	1 October 2023	–
Alison Baker	Senior Independent Director	Yes	7yrs 8 mths	18 September 2018	–
Paul Mayland	Non-Executive Director	Yes	2yrs 8 mths	1 October 2023	–
Executives					
Sam Moody	Chief Executive Officer ("CEO")	No	21yrs 3 mths	21 February 2005	–

All Directors stand for re-election by shareholders at each Annual General Meeting and each Director is subject to election by shareholders at the first Annual General Meeting following their appointment. Richard Slape, who has been appointed since the year end, will be standing for election at the 2026 Annual General Meeting ("AGM") and all other Directors, with the exception of Alison Baker who is retiring from the Board, will be standing for re-election.

Senior Independent Director
Alison Baker is the Senior Independent Director and will be replaced by Paul Mayland after the 2026 AGM.

The main responsibilities of the Senior Independent Director are as follows:

> to provide a sounding board for the Chair and to act as an intermediary for Board members;

> to act as a point of contact for shareholders who have concerns which have not been adequately addressed by the Chair; and

> to coordinate the Chair's appraisal.

The Group's website contains an email contact for the Senior Independent Director should shareholders have concerns which have not been adequately addressed by the Chair or Chief Executive Officer. The email address is also disclosed at the back of these accounts.

Role of the Board
The Board is collectively responsible for delivery of the strategy which is designed to promote the long-term success of the Company and to deliver shareholder value. This involves the discovery, development and production of hydrocarbons in a sustainable and responsible manner to meet global energy and market demand and is focused on the Sea Lion field in the Falkland Islands. The Board is responsible for monitoring progress against the agreed strategic objectives and ensuring that major business risks are actively monitored and mitigated where appropriate. There is a schedule of matters reserved for the Board to ensure that the Board exercises control over the key matters which could impact on delivery of the Company's strategy. Details are provided on the Company's website under the corporate governance section of the AIM rule 26 disclosure.

Board skills and responsibilities
The Directors have a wide range of experience and skills across the oil and gas industry including technical, operational, commercial and financial both in the UK and internationally. The Chair and Non-Executive Directors have held senior management, board and advisory positions in the industry and bring relevant experience from their current and previous positions which enable them to bring judgement on the strategic, operational, financial and governance matters which are vital to the success of the Company.

There is a clear division of responsibilities between the Chair and CEO which is set out in writing and has been approved by the Board. Details are given on the Company's website. A clearly defined organisational structure exists across the Group, with lines of responsibility and delegation of authority to executive management.

Board meetings and processes
The Board has around six scheduled meetings each year with other meetings held as required. Informal meetings also take place between the Chair and the Non-Executive Directors without management present.

At the beginning of each Board meeting, the Board receives an update from the CEO on key current activities and issues including an operational update on Sea Lion together with the Trading Update and HSE and Finance Reports and any papers relating to specific matters requiring consideration or approval. The Board considers any changes to the principal risks facing the Group at the start of the meeting and discussions take place in this context.

The appointment letters of the Non-Executive Directors detail the expected time commitment which is around 20 days a year. Non-Executive Directors undertake on joining the Company that they are able to allocate sufficient time to discharge effectively their responsibilities and are required to keep the Board updated of any changes in respect of their other commitments.

Governance Report

continued

2025 Board meeting attendance

Director	Number of meetings attended
Simon Thomson – Chair	11/11
Sam Moody	11/11
Alison Baker	11/11
Paul Mayland	11/11
Total meetings during year	**11**

In addition to the scheduled Board meetings, a number of Board meetings were held to deal with the capital raising, Final Investment Decision on the Sea Lion Development and an allotment of shares to the Employee Benefit Trust.

Board performance evaluation

Since the year end, an internal evaluation of the Board's performance has been undertaken. The evaluation process consists of a questionnaire which is focused on strategy, risks, performance against objectives, board processes, relationships and communication and Board structure and development. The key conclusions are tabled and discussed at a Board meeting and follow up action is agreed if necessary.

Following the latest evaluation exercise, it was concluded that the Board continued to operate effectively with appropriate focus on strategy, risk management and stakeholder relationships. A number of areas have been identified for future focus now that the Company is in the next stage of its development including risk management, policies, Board paper focus/processes and investor relations.

The Board has committed to undertaking an external independent third-party evaluation during 2027 in accordance with the 2023 QCA Code.

Chair performance evaluation

Since the year end, the Senior Independent Director and Company Secretary have facilitated a review of the Chair's performance. The evaluation process consists of obtaining feedback from each Director on the performance of the Chair across his specific areas of responsibility with any relevant feedback discussed with the Chair.

There is no process currently in place for the review of the performance of individual Directors.

Board induction, training and outside advice

There is no formal induction process in place but new Directors receive an appropriate induction according to their requirements which is coordinated by the Company Secretary. This usually includes the following:

Board	Board papers and minutes for prior 12 months Schedule of matters reserved for the Board Delegated financial authorities.
Committees	Terms of reference for all Board Committees Minutes of relevant Committee meetings for prior 12 months.
Policies	Copies of current policies and procedures including Anti-Bribery and Corruption, Code of Business Conduct, Share Dealing Code, Anti-Money Laundering, Internal Control and Financial Procedures and Market Abuse Regulation.
Organisation	Group structure chart.
Governance	Briefing on AIM obligations from the NOMAD.
Commercial	Management summaries of key transactions.
Insurance	Details of Directors' and officers' liability cover.
Shareholders	Overview of the breakdown of the share register including details of major shareholders.

New directors are also encouraged to meet with members of the senior management team to get a thorough understanding of the Group's key assets and operations.

The Board supports Directors who wish to receive ongoing training and education relating to their duties.

External directorships and interests

Executive Directors are permitted to engage in other activities and businesses outside the Group providing that there is no risk of conflict with their executive duties and subject to full Board disclosure.

Non-Executive Directors are required to advise the Chair as soon as practicable of any proposed Board appointments which could give rise to a conflict with their position as a Director of the Company. Details are circulated to other Board members who are invited to advise the Chair or Company Secretary if they have any concerns about the proposed appointment.

Conflicts of interest

The Board has in place a procedure for dealing with the consideration and authorisation of any actual or potential conflicts of interest.

All Directors are aware of the requirement to advise the Chair and Company Secretary of any situations which could give rise to a conflict or potential conflict of interest. If requested by the Chair, a Director will absent themselves from any Board discussions and decisions on matters where there is an actual or perceived conflict of interest.

Company Secretary

The Board has a qualified Company Secretary and all Directors have access to her for advice and services. The Company Secretary is responsible for ensuring that there is a good information flow within the Board and Board Committees and between the CEO and Non-Executive Directors. The Company Secretary advises the Board on corporate governance matters and provides support as required to ensure that members of the Board and Board Committees can discharge their duties properly and effectively.

Political and charitable donations
The Group made no charitable or political donations during the year (2024: £nil).

Communication with shareholders
The Company engages with shareholders in a variety of ways:

Meetings The CEO has regular discussions with major shareholders and the investment community which allows exposure to new investors. This process includes presentations, one-to-one meetings, analyst briefings and press interviews. The CEO regularly briefs the Board on these contacts and relays the views expressed. Copies of analyst research reports, press reports and industry articles are circulated to all Directors and ensures that the Board is aware of the views of its major shareholders.

Regulatory News Flow The Company releases full year and interim financial results, operational updates, releases relating to matters of material importance to the Company's business and matters of a regulatory nature.

Website The Company's website contains copies of financial reports, shareholder documents, presentations and corporate updates which ensures that existing and potential investors have access to up to date and relevant information.

Annual Report The Company's annual report gives a detailed overview of the Company's strategy, operations, financial position, risk profile and remuneration structure and is available in hard copy and on the website. This ensures that existing and potential investors are provided with the information that they need to make an assessment of the Company's performance and prospects.

AGM The AGM is attended by all Directors. The Chair gives an overview of the Company's performance in the period since the previous AGM and the CEO gives a detailed operational and financial update. The AGM is mainly attended by retail investors and gives them the opportunity to address questions to the Board.

2023 QCA Code Disclosures

The 2023 QCA Code has ten principles of corporate governance to which the Company is required to adhere and to make certain disclosures both within the Annual Report and on its website. The principles and associated disclosures are as follows:

Principle	Disclosure	Comment
Principle One Establish a purpose, strategy and business model which promote longterm growth for shareholders	Explain the Company's purpose, business model and strategy including key challenges in their execution (and how these will be addressed)	The Company's purpose is to explore for, develop and produce hydrocarbons safely and responsibly. The Company's strategy is to create value for all its stakeholders through building a well-funded, full cycle E&P company specifically through the development of the Sea Lion field. See the Strategic Report on pages 2 to 27 and the Company's website for further information.
Principle Two Promote a corporate culture that is based on ethical values and behaviours	Describe the desired company culture within the strategic report. How is the desired corporate culture supportive of the Company's purpose, strategy and business model? How is the tone from top (board, chief executive and senior management) supportive of this culture? How does the board assess and monitor corporate culture and how were any actions which notably deviated from what is expected addressed?	The Company is committed to ensuring that there is a healthy corporate culture and ethical and transparent behaviour is followed across the Group. The Board believes that strong governance is underpins delivery of the Company's strategy and business model as it supports effective decision making. The focus on building relationships with partners and stakeholders, particularly the Falkland Islands Government, and ensuring that employees are supported and empowered to contribute to the Company's strategic aims have been key to delivery of project sanction on the Sea Lion Development. The Company's corporate culture is set by the Board of Directors and is communicated to all employees by the CEO through regular, all-inclusive internal meetings and supporting policies and procedures. The relatively small size of the team and open communication between the team and the Board of Directors allow for any governance issues to be raised and addressed promptly. The Company also has a whistleblowing process which allows shareholders, employees, consultants, contractors or other interested parties to raise concerns which have not been adequately addressed by the Chair or CEO with the Chair of the Audit & Risk Committee who is the officer responsible for whistleblowing. See page 30 of the Governance Report for further details including the policies and procedures which have been put in place.
Principle Three Seek to understand and meet shareholder needs and expectations	a) Describe shareholder engagement activities, including the topics discussed and actions taken in response. b) Provide appropriate quantitative and qualitative reporting of a company's environmental and social matters to meet investor needs and expectations.	a) The CEO has primary responsibility for shareholder liason. See page 33 of the Governance Report for details of shareholder engagement activities. b) As operations develop, the Board will look to expand its environmental and social disclosures in line with regulatory expectations and applicable reporting frameworks.

Principle	Disclosure	Comment
Principle Four Take into account wider stakeholder interests, including social and environmental responsibilities and their implications for long-term success	a) Describe the environmental and social issues that the board has identified as being material to the company with reference to its purpose, strategy and business model. b) Set out any relevant associated KPIs that are used for tracking performance on such matters and, where relevant, key forward-looking targets that have been established.	a) The Board identifies environmental stewardship, health and safety, and stakeholder relations as material to the Company given its purpose, strategy and business model as an E&P company. As the Company moves into its next phase of growth, the Board is focused on ensuring its HSE procedures and policies remain fit for purpose and that there is accountability for HSE across the organisation. HSE is a core focus area in our engagements with the operator and we will challenge them to meet the highest standards of HSE, regulatory compliance and governance as operations progress. The Company is fully compliant with the requirements of Sea Lion's Environmental Impact Statement, which is available on the operator's website. The Company ensures that all personnel working on our projects, whether employees or contractors, are appropriately qualified and fully briefed on the environmental, social and health and safety requirements relevant to their role. The Company has been a committed long-term partner of the Falkland Islands since its inception. We have maintained open and constructive dialogue with the appropriate governing bodies and place particular value on in-person engagement, making regular visits to the Islands to maintain these relationships. b) As operations progress, the Board will look to formalise any relevant KPIs to track performance across its material HSE and ESG areas. These will be reported in future Annual Reports as they are established.
Principle Five Embed effective risk management, internal controls and assurance activities, considering both opportunities and threats, throughout the organisation	a) Describe how the board has embedded effective risk management and internal controls to execute and deliver on the stated corporate purpose and strategy. This should begin with clear articulation of the risk appetite of the company (how much risk is it prepared to take). Supporting disclosures should describe what the board does to ensure the identification, assessment and management of risk, both current and emerging, and how it gets assurance that the risk management and related internal controls in place are effective. b) Risk and control information should be disclosed as required in the strategic report and corporate governance statements, including the non-financial reporting narrative. Risk governance and processes should support the board's assessment of future prospects and viability/resilience considerations. c) Explain the company's governance around climate-related risks and opportunities; the process for identifying, assessing and managing climate-related risks and how these processes are integrated into the company's overall risk management framework. d) Explain how the audit committee has monitored and formally considered auditor independence during the corporate reporting cycle.	a) The Board approves the risk register on an annual basis and otherwise as required, for example as part of a fundraising. It considers any changes to the principal risks facing the Company at the beginning of each meeting and discussions take place against this background. The Audit & Risk Committee is responsible for reviewing the systems of internal control and risk management to ensure that they remain appropriate and effective and reports to the Board on such matters. b) The Company's approach to the identification and management of risk is set out in the Principal Risks and Uncertainties section of the Strategic Report contained on pages 16 to 25. c) HSE risks are incorporated into the Company's principal risks, which are set out on page 24. The Board maintains active oversight of operational risks and seeks assurance that effective control systems are in place. Employees are expected to engage in identifying and reviewing HSE risks, which are escalated to and discussed at Board level as required. The Board recognises the increasing regulatory focus on climate-related risk reporting. As the Company evolves, it will look to formally integrate climate-related risks into its principal risk register and, in due course, consider reporting in line with relevant frameworks such as TCFD. d) The Audit & Risk Committee has adopted a policy on the independence and objectivity of the external auditor which can be found on the Company's website. This includes a list of permitted and prohibited non-audit services. The Audit & Risk Committee formally assesses the auditor's independence and objectivity at the conclusion of each audit cycle.

Principle	Disclosure	Comment
Principle Six Establish and maintain the board as a well-functioning, balanced team led by the chair	a) Identify each director and describe the relevant experience, skills and capabilities that each director has brought to the board's agenda during the year. b) The statement should demonstrate how the board contains (or will contain) the necessary mix of experience, skills and capabilities – including with reference to diversity characteristics - to adequately inform and oversee the execution of the company's strategy for the benefit of the shareholders over the medium to long term. c) Identify those directors who the board considers to be independent. Where there may be grounds to question the real, or perceived, independence of a director this must be adequately addressed by the board. d) Describe the time commitment required from directors (including non-executive directors and part-time executive directors) and any restrictions on both executives and non-executives to assuming external roles. e) Include the number of meetings of the board (and any committees) during the year, together with the attendance record of each director. f) Where performance-related remuneration for non-executive directors has been introduced, the company must disclose how it has consulted its shareholders and how their support was obtained.	a) Information on each director can be found on page 29. Each director has a wide range of skills and experience including financial, operational, legal, technical and public markets. b) The experience, skills and capabilities of the Board members were key factors in ensuring that the Company met its strategic targets for 2025 of delivering a Final Investment Decision on the Sea Lion Development and strengthening and protecting the Company's balance sheet. The directors have extensive experience within the energy sector at a strategic, financial and operational level which will be key as the Company works with the operator on delivery of Phase 1 of the Sea Lion Development. Since the year end, Richard Slape has been appointed as a Non-Executive Director and brings significant experience and knowledge of the energy sector to the Board. c) The Board considers the Chair, Alison Baker (Senior Independent Director) and Paul Mayland and Richard Slape (both Non-Executive Directors) to be independent. Richard Slape was briefly employed by Rockhopper over 10 years ago. Nothwithstanding his previous position with the Company, the Board considers that Richard Slape is independent in both character and judgement. Further details are given under 'Board Composition' on page 30. d) The CEO is expected to devote substantially the whole of his time to his role with the Company. He does not currently have any outside appointments. The appointment letters of the Chair and Non-Executive Directors sets out the expected time commitment which is around 20 days a year. Non-Executive Directors undertake on joining the Board that they are able to allocate sufficient time to discharge their responsibilities effectively and are required to keep the Board updated of any changes in respect of their other commitments and any proposed appointment prior to this taking place. The Nomination Committee has considered the time required from Non-Executive Directors and has concluded that each Non-Executive Director spends sufficient time to fulfil their duties. e) See pages 32, 38 and 40 of the Governance Report and page 47 of the Remuneration Report. f) The Chair and Non-Executive Directors do not receive any performance-related pay.
Principle Seven Maintain appropriate governance structures and ensure that, individually and collectively, directors have the necessary up-to-date experience, skills and capabilities	a) Explain how each director keeps their skillset up-to-date, setting out how the company provides the necessary resources for updating and developing each director's knowledge and skills b) Set out any board sub-committees that have been established to facilitate more focussed discussions and/or oversight of particular subject matters c) Where the board or any committee has sought external advice on a significant matter, this must be described and explained d) Where external advisers to the board or any of its committees have been engaged, explain their role.	a) The Board receives an annual briefing from the Company's NOMAD on the AIM Rules and briefings on an ad hoc basis from the Company's legal advisers advisers including in relation to directors' duties and the Market Abuse Regulation. The Board has agreed to support any director who has training and development requirements. Directors attend external briefings and courses, for example on remuneration matters, to assist them in performing their roles. b) The Company has established Audit & Risk, Remuneration and Nomination Committees. Details of the role of the various committees are given in the Governance and Remuneration Reports. The terms of reference of the committees are on the Company's website. c) During the financial year, the Board received advice from various external advisers in relation to equity and debt financing for Phase 1 of the Sea Lion Development, taxation and portfolio management. During 2025, the Remuneration Committee engaged remuneration consultants to provide advice on the Company's remuneration policy and practices for Executive and Non-Executive Directors and on the structure of a new long-term incentive plan. Further details are given in the Remuneration Report. d) The Board has access to the Company Secretary, the Company's NOMAD and lawyers and can obtain advice from other external bodies as required.

Principle	Disclosure	Comment
Principle Eight Evaluate board performance based on clear and relevant objectives, seeking continuous improvement	a) Include a high-level explanation of the board performance review process. Provide a brief overview of the board performance review undertaken in the past year, how it was conducted and its results and recommendations. Progress against previous recommendations should also be addressed. Where an in-year event triggered a review, this should be similarly disclosed. b) Set out when the last externally facilitated board review took place and when the next one is planned for. c) Where an externally facilitated review has not taken place and there are no plans to have one, this must be explained. d) Provide an outline description of the succession planning process including any indicative timelines for expected appointments (to the extent practicable).	a) See page 32 of the Governance Report b) An external Board performance evaluation was undertaken previously with specific focus on the skillset and structure of the Board. The Board has committed to undertake an externally facilitated performance review in 2027. c) See above d) See the Nomination Committee Chair's report on page 40.
Principle Nine Establish a remuneration policy which is supportive of long-term value creation and the company's purpose, strategy and culture	Explain how the remuneration structure and practice supports the delivery and attainment of the company's purpose, business model, strategy, and culture	The Company's Long Term Incentive Plan, which was approved by shareholders at the 2025 Annual General Meeting, ensures that executive and senior management incentives are aligned with the Company's business strategy and shareholders' interests by linking an element of remuneration to the creation of shareholder value. The Remuneration Committee has regard to the Company's strategic objectives when setting performance targets for the LTIP. The Company operates an annual discretionary bonus scheme with targets which are directly linked to the Company's KPIs for each financial year. See the Remuneration Report on pages 41 to 50 for further details.
Principle Ten Communicate how the company is governed and is performing by maintaining a dialogue with shareholders and other key stakeholders	a) Within the corporate governance report, reflect on challenges experienced in the year and signpost to how these were addressed at the board and whether any changes were made to board structure or process b) Include an audit committee report c) Include a remuneration committee report d)If the company has not published one or more of the disclosures set out under Principles 1-9, the omitted disclosures must be identified and the reason for their omission explained.	a) During 2025, the Board was focussed on its key target of reaching FID on Phase 1 of the Sea Lion Development and ensuring that the right resources and support structures were in place to achieve this. b) See the report of the Audit & Risk Committee Chair on page 38. c) See the Remuneration Report on page 41. d) The Company has published all of the disclosures set out under Principles 1-9.

Simon Thomson
Non-Executive Chair

2 June 2026

Rockhopper Exploration PLC

Audit & Risk Committee Chair's Report

Introduction by the Audit & Risk Committee Chair, Alison Baker
I am pleased to present the report of the Audit & Risk Committee for the year ended 31 December 2025. The report includes details of the committee's activities during the financial year.

Committee composition
The members of the Audit & Risk Committee are Alison Baker as Chair, Paul Mayland, Simon Thomson and Richard Slape, who was appointed as a committee member in January 2026. Richard Slape will become Chair of the Audit & Risk Committee in place of Alison Baker following her retirement after the 2026 AGM.

The Board considers all members of the committee to be independent and is satisfied that at least two members of the committee, Alison Baker and Richard Slape, have recent and relevant financial experience.

The Company Secretary acts as secretary of the committee.

Meetings
The Audit & Risk Committee met four times during the year and informal discussions were also held both with and without management present. The external auditors had discussions with the Chair of the committee during the course of the year and also met the committee members without management present.

Only members of the committee have the right to attend the meetings of the committee but the committee can invite the CEO, the CFO and representatives of the external auditors to attend its meetings.

Following each meeting, the Chair of the committee reports formally to the Board on the main matters discussed by the committee.

Details of the meetings attended during the financial year were as follows:

2025 Audit & Risk Committee meeting attendance

Director	Number of meetings attended
Alison Baker – Chair	4/4
Paul Mayland	4/4
Simon Thomson	4/4
Sam Moody (CEO)	4/4†
Total meetings during year	**4**

† Invitee

Role
The core terms of reference of the Audit & Risk Committee include reviewing and reporting to the Board on matters relating to:

- the audit plans of the external auditors;
- the Group's overall framework for financial reporting and internal controls;
- the Group's overall framework for risk management;
- the accounting policies and practices of the Group; and
- the annual and periodic financial reporting carried out by the Group.

The committee is responsible for notifying the Board of any significant concerns that the external auditors may have arising from their audit work, any matters which may materially affect or impair the independence of the external auditors, any significant deficiencies or material weaknesses in the design or operation of the Group's internal controls and any serious issues of non-compliance. No such concerns were identified during the financial period.

The Audit & Risk Committee's terms of reference are available on the Company's website.

Key matters considered by the committee
During the year, the issues considered by the committee included:

- Group financial disclosures and accounting matters including impairment, going concern, taxation, Ombrina Mare arbitration award, asset rehabilitation and decommissioning provision;
- External auditors' audit plan and reports concerning its audit and review of the financial statements of the Group;
- Interim and full year financial statements;
- External auditors' fees and auditor independence;
- Group financial processes, systems of internal controls and risk management and effectiveness of the systems and processes pertaining to risk identification, classification and mitigation;
- Committee performance and effectiveness in respect of the 2025 financial year; and
- Whistleblowing procedures and shareholder concerns.

Going concern
As part of the year end reporting process, management prepares a detailed report including detailed cashflow forecasts with a number of potential scenarios and sensitivity assumptions. The committee reviews and challenges management's assumptions and conclusions in order that it can provide comfort to the Board that management's assessment has been challenged and is supported and that it is appropriate to prepare the financial statements on a going concern basis. Further details of the going concern considerations are contained in Note 1.5 of the Group financial statements.

External auditors
The committee recommends to the Board the appointment of the external auditors, subject to the approval of the Company's shareholders at a general meeting. Shareholders in a general meeting authorise the Directors to fix the remuneration of the external auditors.

BDO LLP have been the Group's auditors since 2021. There will be a rotation of audit partner after the conclusion of the audit of the financial statements for the year ended 31 December 2025.

The committee is responsible for the approval of the provision of all audit services and permitted non-audit services undertaken by the external auditors. The committee considers the independence of the external auditors as part of the annual audit cycle in accordance with the policy on auditor independence and objectivity which is available on the Company's website.

The committee considered the effectiveness and quality of the external auditors after the conclusion of the annual audit and has recommended to the Board the re-appointment of the auditor at the forthcoming AGM.

Audit & Risk Committee performance
The Chair of the committee and Company Secretary undertake an annual review of the committee's performance and effectiveness with reference to the Financial Reporting Council's guidance to listed companies on the composition, role and responsibilities of the audit committee. The key conclusions are discussed by the committee and follow up action is agreed if necessary.

In respect of the committee performance review undertaken for the 2025 financial year, the committee noted the key observations, proposed changes to the performance ratings and the update on actions agreed from the prior year review specifically:

- Process for assessment of the performance of the external auditors;
- Evolution of financial processes and the assessment of risks and internal controls in the light of a Final Investment Decision (FID) on the Sea Lion project.

As part of the annual performance review, the committee concluded that its constitution was appropriate for the size of the business. The committee noted that Paul Mayland had recent and relevant experience in respect of risk management from his previous position and roles at Cairn Energy plc (subsequently Capricorn Energy PLC) and that Simon Thomson brought significant industry experience to discussions.

Internal Audit
Given the stage of the Company, the committee does not believe there is currently a need for a separate Internal Audit function. As part of the overall internal control considerations this will be kept under review as the Company progresses the Sea Lion Development.

Whistleblowing and anti-bribery
The Company has in place a whistleblowing policy and procedure which encourages staff to raise in confidence any concerns about business practices and the external communications are received directly by the committee Chair.

The Company is committed to conducting all of its business dealings in a responsible, honest and ethical manner. All employees, Directors and consultants are required to have regard to the Company's Code of Business Conduct and Corporate Social Responsibility in their day to day business behaviour and dealings. The Company also has in place Anti-Bribery and Corruption Policy and Procedures and an Anti-Money Laundering Policy which applies to all employees, Directors and consultants.

Alison Baker
Audit & Risk Committee Chair

2 June 2026

Nomination Committee Chair's Report

Introduction by the Nomination Committee Chair, Simon Thomson
I am pleased to present the report of the Nomination Committee for the year ended 31 December 2025 which includes details of the committee's activities during the financial year.

Committee composition
The committee is chaired by the Chair of the Board with all the Non-Executive Directors as its members. The Board considers all members of the committee to be independent.

The Company Secretary acts as secretary of the committee.

Meetings
The committee met once during the year. Only members of the committee have the right to attend the meetings but the committee can request the attendance of the CEO.

Details of the meetings attended during the financial year were as follows:

2025 Nomination Committee meeting attendance

Director	Number of meetings attended
Simon Thomson – Chair	1/1
Alison Baker	1/1
Paul Mayland	1/1
Sam Moody (CEO)	1†
Total meetings during year	**1**

† Invitee

Role
The role of the committee is to consider Board member succession, review the structure and composition of the Board and its committees and identify and make recommendations for any changes to the Board. Any decisions relating to the appointment of Directors are made by the entire Board based on the merits of the candidates and the relevance of their background and experience, measured against objective criteria, with care taken to ensure that appointees have enough time to devote to the job.

Key matters considered by the committee
The key matter considered by the committee during the financial year was Board succession.

Succession planning
The Company is committed to appointing, retaining and developing an experienced team which can effectively manage the Company's objectives and deliver its strategy. When considering succession planning, the committee will evaluate the balance of skills and experience on the Board and make recommendations to the Board on the basis of what it considers the Company needs in order to support delivery of the agreed strategic objectives. The committee is committed to recruiting on merit measured against objective criteria and to diversity on the Board when considering future changes to Board constitution.

The committee recognises the need for progressive refreshing of the Board. In January 2026, Richard Slape was appointed as a Non-Executive Director and Alison Baker will be stepping down after the 2026 AGM after nearly eight years on the Board. The committee has considered the skills and experience needed on the Board now that the Company has entered a new phase in its development having taken FID at Sea Lion and the increasingly international nature of the shareholder register. Accordingly, two additional directors will be proposed for appointment at the upcoming AGM and details are included in the Notice of Meeting for the 2026 AGM. The committee will continue to keep succession planning for Board members and the senior management team under consideration.

The management of human resources across the Group is a matter for the executive team but the Non-Executive Directors are advised in advance of recruitment plans in respect of senior appointments.

Simon Thomson
Nomination Committee Chair

Remuneration Report

Annual Statement
Introduction by the Remuneration Committee Chair, Paul Mayland
I am pleased to present the Directors' Remuneration Report ('Report') for the year ended 31 December 2025.

The Report is divided into two sections:

A. The Policy report which sets out the current Remuneration Policy.
B. The Annual Report on Remuneration which sets out details of the operation of the Remuneration Committee and details of the Directors' remuneration packages for the year ended 31 December 2025. It also sets out details of the implementation of the Remuneration Policy for Executive and Non-Executive Directors for the year ending 31 December 2026.

2025 was an outstanding year for Rockhopper. The team were focused on delivering the very significant milestone of a Final Investment Decision (FID) on the first phase of the Sea Lion field development, with Operator Navitas. This required dogged determination, agility, commercial negotiation and pragmatism to deliver the required outcome, for which all of our key stakeholders were hoping.

We will require the same characteristics to take us to the next key milestone of first oil production from the Sea Lion field and I am confident that Sam and the team will work constructively with Navitas and the Falklands Island Government to achieve this outcome safely and on schedule. That is something all of our shareholders can now finally look forward to with anticipation.

We continue to reflect on Renumeration Policy and Practice and we have now put in place a new LTIP scheme, that was overwhelmingly supported by shareholders last year at the AGM and we have now migrated to a more conventional Bonus scheme, which you will see in the report is tied to our current strategic themes of Sea Lion project delivery, balance sheet strength, HSSE and portfolio management.

The committee is satisfied that the outcomes, in respect of the incentives and remuneration during the financial year under review, are appropriate, balanced and honour the legacy arrangements. The committee will continue to ensure that the Company's Remuneration Policy and practices are kept under review to ensure that they remain appropriate for the Company at its stage of development and that they do not encourage any unnecessary risk taking by the management team.

The committee has considered the application of the 2023 QCA Code in relation to remuneration matters. The committee has agreed that both the Remuneration Report and the Remuneration Policy will be put to an advisory shareholder vote at the 2026 AGM and for which we would hope for similar shareholder support for the new long-term incentive arrangements as received at the 2025 AGM.

Paul Mayland
Chair of the Remuneration Committee

2 June 2026

A. Remuneration Policy

This part of the Report sets out the remuneration policy for the Company. The policy for Executive Directors is determined by the committee and the committee approves any adjustments to salary and bonus awards for all employees with input from the CEO where appropriate. The committee also decides on awards to Executive Directors and employees under the Company's long-term incentive plans. External advice and benchmarking was completed during 2025 and the recommended changes implemented.

The aim of the committee is to ensure that remuneration packages are sufficiently competitive to attract, retain and motivate individuals of the quality required to achieve the objectives of the Group and thereby enhance shareholder value. The committee also aims to ensure that all employees receive rewards that fairly reflect their seniority, level of work and contribution to the Company's success.

Executive Director Policy

The summary of the remuneration policy for Executive Directors is set out below. Full details of the remuneration package of the CEO, who is currently the sole Executive Director, is given in the Report on Remuneration on page 47.

SALARY

Purpose and link to strategy	> To provide an appropriate salary level to support retention and recruitment of Executive Directors and ensure that Executive Directors are appropriately rewarded in relation to their role and responsibilities, particularly in respect of leading the Company.
Operation	> Base salaries are reviewed annually and have in recent years been increased in line with the average of the Office of National Statistics (ONS) published CPI and RPI changes in the UK over the previous 12 months.
Opportunity	> Salary increases will usually be in line with increases awarded to other employees.
Performance metrics	> Not applicable for base salaries.

BENEFITS

Purpose and link to strategy	> To provide a competitive and comprehensive range of benefits to assist in attracting and retaining the calibre of Executive Directors required for delivery of corporate and strategic objectives.
Operation	> The benefits package for Executive Directors includes private medical insurance, critical illness, income protection and life assurance cover. Benefits are administered internally and a review of providers and prices is conducted from time to time to ensure that the level of rates and cover remains competitive.
Opportunity	> The benefits package is set at a level that the committee considers is appropriate for the Company's size. > The value of benefits will vary each year according to the cost of provision.
Performance metrics	> Not applicable for benefits package.

PENSION

Purpose and link to strategy	> To provide an appropriate level of pension contribution for Executive Directors whilst minimising the administrative burden for the Company.
Operation	> Pension contributions are paid by way of a pension cash allowance due to the UK annual allowance limits. The pension cash allowance is subject to deductions for tax and national insurance.
Opportunity	> An annual contribution equal to 15% of salary which aligns with all other employees.
Performance metrics	> Not applicable for pension contributions

ANNUAL BONUS

Purpose and link to strategy	> To reward the achievement of corporate targets which the Board has agreed are key to progressing and delivering the Company's strategy.
Operation	> The bonus scheme focuses on key strategic milestones. > Targets are set as early as possible in the financial year and reflect the key strategic areas of focus and/or critical project milestones. > The bonuses are paid in cash after the end of the financial year to which they relate. > Exceptional bonus payments may be in the form of shares and/or cash at the committee's discretion and may be deferred in certain circumstances.
Opportunity	> The annual bonus award is determined as a percentage of base salary based on performance against pre-agreed objectives. When deciding on the level of bonus awards, the committee will have regard to the extent to which achievement of the objectives has contributed to progress against the Company's strategic drivers and investment expectations versus approved budgets and timelines. > The bonus is non-contractual and is discretionary. > The maximum bonus potential is 100% of base salary. > The legacy bonus arrangements in place relating to Final Investment Decision on the Sea Lion Development and the Ombrina Mare arbitration result and monetisation have now concluded.
Performance metrics	> The targets for Executive Directors may incorporate corporate, strategic, project and financial objectives agreed by the Board. > The committee uses its judgement to decide the extent to which the objectives have been achieved and will have regard to overall Company performance when agreeing the bonus payments. > The committee considers whether, in the first instance, any operations have been completed to acceptable HSSE standards and considers whether there were any significant HSSE incidents when considering the level of bonus.

LONG TERM INCENTIVES

Purpose and link to strategy	> To support alignment with shareholders through the link to creation of shareholder value over the medium to long term.
Operation	> A new Long-Term Incentive Plan (LTIP) was introduced during 2025 (2025 LTIP) to replace the 2020 Share Option Plan which was designed to cover a five year period. The 2013 Long Term Incentive Plan (2013 LTIP) was closed in 2019. > Awards of nominal cost options will be made under the 2025 LTIP on an annual basis with options vesting after three years subject to the extent to which performance targets have been achieved. > Awards for Executive Directors are subject to a one year post-vesting holding period.
Opportunity	> 150% to 200% of salary per annum.
Performance metrics	> Performance targets are set by the committee in respect of each award of options under the 2025 LTIP; these may include an absolute total shareholder return (TSR) metric and/or a relative TSR metric or revenue or earnings metric or other metrics that the Committee believe are appropriate for stakeholders, including the shareholder base.

Remuneration policy for other employees and consultation

The Company's policy for all employees is to provide total remuneration packages that help retain, motivate and reward them fairly for their contribution and role within the Company.

All employees are entitled to receive the full range of Company benefits. Employer pension contributions to the Group Personal Pension plan for all employees are aligned with pension contributions for the CEO.

All employees are eligible to receive an annual bonus. The maximum level of bonus payable is currently 100% of salary for all employees. In exceptional circumstances a higher bonus award may be made.

Employees have been granted options under the 2025 LTIP on the same terms as Executive Directors but proportionate to level of seniority. This ensures that an element of remuneration is deliverable through a scheme that directly aligns participants with shareholders.

The committee does not consult with employees on the operation of the remuneration policy but it does seek the input of the CEO.

Recruitment

In the case of recruiting a new Executive Director, the committee can use all the existing components of remuneration as set out in the policy table.

The salary of a new appointee will be determined by reference to the experience and skills of the individual, market data, internal relativities and the candidate's current remuneration. New appointees may be entitled to receive the full range of Company benefits and pension contributions on joining and, if the committee considers it appropriate, a relocation allowance.

The annual bonus would operate as outlined in the Policy for Executive Directors with the maximum potential bonus pro-rated according to the date of joining.

Long-term incentives would operate as outlined in the Policy for Executive Directors and an award of options may be granted on joining subject to the Company being in an open dealing period.

In the case of an external hire, the committee may deem it appropriate to 'buy-out' incentive or benefit arrangements which the new appointee would forfeit on leaving their previous employer, taking into account the potential value of the arrangement being forfeited. The committee would use the existing components of the Company's remuneration structure, wherever possible, to compensate the incoming director and the value of any buy-out arrangements would be capped at no higher than the awards or benefits which the individual would forfeit on leaving their previous employer.

Service contracts, exit payments and change of control provisions

The CEO has a rolling term service agreement with the Company. Details of his service contract and appointment date are as follows:

Executive Directors	Appointment date	Original contract	Revised contract
SJ Moody	21 February 2005	8 August 2005	8 March 2011
			5 October 2020

The CEO's service contract is available to view at the Company's registered office and prior to each Annual General Meeting at the venue for the meeting. The notice period for the CEO is 12 months' notice in writing by either party. The Company has the right to make a payment in lieu of notice of 12 months' salary plus the fair value of any benefits. The committee will consider any termination payments on a case-by-case basis. It will consider the circumstances of the termination and might consider making an ex-gratia payment where the circumstances and/or the Director's contribution to the Company justifies this. If an ex-gratia payment is to be made, the committee will ensure that it is satisfied that it is in the best interests of the Company to make such a payment and that there is no "reward for failure".

The committee also has discretion to settle any other amounts which it considers are reasonably due to the Director such as where the parties agree to enter into a settlement agreement and the individual is required to seek independent legal advice. The committee can approve new contractual arrangements with a departing Director covering matters such as confidentiality or restrictive covenants and/or consultancy arrangements where it believes this is in the best interests of the Company.

Treatment of incentives for leavers

a) Annual bonus

In relation to annual bonuses, a bonus payment will not usually be made if the Director is under notice at the bonus payment date or has already left. In the event of a change of control, the committee retains the right to declare a bonus in respect of the part of the year worked prior to the change of control becoming effective.

b) Share incentive schemes

i. 2020 Option Plan (closed): 1p options (granted in lieu of contractual notice periods for the reductions in base salaries in May 2020) will be retained regardless of leaver status. For market price options, all vested but unexercised options will lapse for those with 'bad leaver' status (defined as anyone dismissed for gross misconduct or who resigns unless the committee determines that a resigning employee should be treated as a good leaver).
In 'good leaver' circumstances (defined as all other circumstances except where an employee has bad leaver status) or in the case of death, all options will be exercisable for 12 months from the leaving date (or such other date that the committee shall decide) or the date of death.

ii. 2013 LTIP (closed): vested awards will be exercisable for a period of six months from the vesting date or such other period that the committee shall decide. In the case of a participant who has died, any vested LTIPs can be exercised for a period of 12 months from the date of death.

iii. 2025 LTIP: in good leaver circumstances (defined as ill health, injury, disability, redundancy, a sale of the entity that employs the participant out of the group or for any other reason at the committee's discretion), a participant's unvested award will usually continue and the award will vest on the normal vesting date or such other date as the committee decides. The committee will decide the extent to which an unvested award will vest in these circumstances and will be subject to: (i) the pro-rating of the award for the period of time that has elapsed since the start of the performance period until the date of cessation of employment and (ii) the extent to which any performance condition is satisfied at the date on which the participant ceases to be employed. In the case of death, the award will normally vest as soon as practicable following the death of the participant unless the committee determines otherwise. The committee will decide the extent to which an unvested award will vest on death, taking account of (i) the period of time that has elapsed since the start of the performance period until the date of death (unless the committee decides otherwise) and (ii) the extent to which any performance condition is satisfied at the end of any performance period or, as appropriate, at the date of death. In all of the above circumstances, awards will normally be exercisable for a period of six months after vesting or such other date as the committee decides.

iv. Share Incentive Plan (SIP): in the event of termination of employment or a change of control, shares still held under the SIP, the operation of which was suspended in 2020, will be dealt with in accordance with the SIP rules. The committee does not have any discretion in relation to the operation of the SIP in respect of leavers.

Non-Executive Director Policy

The Company's Articles of Association provide that the Board can determine the level of fees to be paid to the Non-Executive Directors within limits set by the shareholders. This is currently set at an aggregate of £500,000 per annum. The policy for the Chair and Non-Executive Directors is as follows:

Fees

Purpose and link to strategy	> To provide a competitive level of fee which will attract and retain high calibre Directors with the range of skills and experience required to support the Executive Director and assist the Company in developing and delivering its strategic objectives.
Operation	> The fees for the Chair and Non-Executive Directors are determined by the Board as a whole with Directors absenting from discussions regarding their own remuneration. > The Board has regard to level of fees paid to the Non-Executive Directors of other similar sized companies and the time commitment and responsibilities of the role. > Neither the Chair nor the Non-Executive Directors participate in any of the Company's share schemes.

Opportunity	> The current annual fees are: > Chair: £110,000 > Non-Executive Director basic fee: £45,000 > Committee Chair: £10,000 > Senior Independent Director: £2,500 > The fee levels will be reviewed on a periodic basis with reference to the time commitment of the role and fee levels in comparative companies. > No benefits or other remuneration are provide.
Performance metrics	> Not applicable to Non-Executive Directors.

Recruitment

The committee will follow the Non-Executive Director remuneration policy as set out above in relation to the appointment of a new Non-Executive Director.

Terms of appointment

The Non-Executive Directors do not have service contracts but are appointed for terms of three years. The appointment can be terminated at any time by either party giving one month's notice to the other. Details of appointments are set out below:

Director	Appointment date	Original appointment letter	Revised appointment letter
Simon Thomson – Non-Executive Chair	1 October 2023	6 September 2023	—
Alison Baker – Senior Independent Director	18 September 2018	18 September 2018	15 May 2019
			24 September 2021
			17 September 2024
Paul Mayland – Non-Executive Director	1 October 2023	6 September 2023	—
Richard Slape – Non-Executive Director	19 January 2026	19 January 2026	—

Directors are subject to annual re-election by shareholders at each Annual General Meeting and each Director is subject to election by shareholders at the first Annual General Meeting following their appointment. The Directors' letters of appointment are available to view at the Company's registered office and prior to each Annual General Meeting at the venue for the meeting.

B. Report on Remuneration

Remuneration Committee membership and meetings

The members of the Remuneration Committee are Paul Mayland as Chair, Alison Baker, Simon Thomson and Richard Slape who was appointed as a committee member in January 2026.

The committee met four times during the financial period. Details of meeting attendance during the financial year was as follows:

2025 Remuneration Committee meeting attendance

Director	Remuneration Committee meetings attended
Paul Mayland – Chair	4/4
Alison Baker	4/4
Simon Thomson	4/4
Sam Moody	3†
Total meetings during year	**4**

† Invitee.

During the financial year, the committee's main areas of activity included:

- Staff salary adjustments for 2025
- Bonus awards for the year ended 31 December 2024
- Legacy bonus awards in respect of the the Sea Lion Project and the Ombrina Mare arbitration and monetisation
- Future bonus structure and award mechanism
- Remuneration disclosures in the 2024 Annual Report
- Corporate targets for the 2025 financial year for recommendation to the Board
- Appointment of external remuneration consultants and scope of work
- New long-term incentive plan and 2025 LTIP awards including performance targets
- Notice periods for employees
- Operation of the Employee Benefit Trust

The Company Secretary acts as secretary to the committee and provides advice in relation to the operation of incentive schemes and remuneration packages. The CEO attends committee meetings by invitation.

No individual is involved in determining his or her own remuneration.

External advice

During 2025, the committee received advice from FIT Remuneration Consultants (FIT) on the Company's remuneration policy and practices for Executive and Non-Executive Directors and on the structure of a new long-term incentive plan. The fees paid to FIT were approximately £9,400.

The committee considers that the advice it received during the financial period was objective and independent.

Total remuneration

The table below reports a single figure for total remuneration for the CEO, Sam Moody:

	Salary £'000	Taxable benefits £'000	Sea Lion FID/Annual Bonus £'000	Legacy bonus(i) £'000	Long-term Incentives(ii) £'000	Pension cash allowance £'000	Total £'000
Year ended 31 December 2025	**334.8**	**5.6**	**669.5**	**295.0**	**—**	**50.2**	**1355.1**
Year ended 31 December 2024	325.0	4.9	97.5	35.0	—	48.8	511.2

(i) Represents part payment of legacy Ombrina Mare bonus in 2024 and final payment of legacy Ombrina Mare bonus in 2025

(ii) A number of options vested during the year ended 31 December 2025. The notional value of the vested options, calculated with reference to the mid-market price on the vesting date less the cost of exercise, was £1,565,917 (2024: £221,033). No LTIPs or options had been exercised as at the date of this report

The table below reports a single figure for total remuneration for each Non-Executive Director:

	Base fee £'000		Additional fees £'000		Total £'000	
	Year ended 31 December 2025	Year ended 31 December 2024	**Year ended 31 December 2025**	Year ended 31 December 2024	**Year ended 31 December 2025**	Year ended 31 December 2024
S J Thomson	**110.0**	100.0	**—**	—	**110.0**	100.0
A C Baker	**45.0**	40.0	**12.5**	12.5	**57.5**	52.5
P J Mayland	**45.0**	40.0	**10.0**	10.0	**55.0**	50.0

No fees were paid to Non-Executive Directors for membership of a committee or for attending committee meetings. Additional fees were payable of £2,500 (2024: £2,500) for acting as Senior Independent Director and £10,000 (2024: £10,000) for acting as Chair of the Audit and Risk and Remuneration Committees. The Chair of the Board does not receive any additional fees for chairing the Nomination Committee.

Additional information in respect of single figure table of remuneration for the year ended 31 December 2025

Annual bonus

In respect of the financial period, the committee agreed that the key objectives for the 2025 financial year would be taking a Final Investment Decision on the Sea Lion Development (FID) and strengthening and protecting the balance sheet. The committee had previously confirmed its commitment to honour the legacy bonus arrangement of 2018 in respect of project sanction on the Sea Lion Project, at the level of 100% to 200% of salary with the quantum of the bonus payment assessed according to metrics covering HSSE, technical, commercial and financial considerations. At the same time the maximum bonus each year subsequently had been restricted to 50%. The committee considered the FID targets and outcomes as set out in the table below and concluded that a maximum bonus of 200% of salary in respect of the 2025 financial year was warranted, recognising that overall performance was above original expectations with Exceed achieved in the majority of categories below. The committee considers that the 2025 target of strengthening and protecting the balance sheet was covered by the highly successful raising of debt and equity for the Sea Lion Project.

Category		Target	Outcome	Below/Met/ Exceed Expectations
Finance	Secure Debt	Bond or alternative	Senior Debt with Lead Technical Bank in place. Much more competitive than high yield bond; cheapest form of capital	Exceed
	Secure Equity	Raise additional equity from existing/new shareholders to meet Project initial equity contribution requirements	Conditional Equity by way of Placing with new strategic investors and Open Offer with existing holders	Exceed
Tax*	Tax Resolution	–	£30m Quantum in phased instalments, with a small proportion (£1m) upfront Mechanism – payment back end loaded	–
Commercial	Low side	IRR > WACC	1C Phase 1 21% @ $60/bbl	Exceed
	Base Case	IRR > 15%	2C Phase 1 26% @ $60/bbl	Exceed
Technical	Field Development	Phase 1 of Northern Development Area approval	Both phases (1&2) of Northern Development Area approved	Exceed
	Project Cost (excluding finance costs) & Schedule	$1.4Bn to First Oil; $1.7Bn Total First Oil Q4 2027/Q1 2028	$1.5Bn to First Oil, $1.7Bn Total H1 2028	Met
HSSE/ Sustainability	Operate to Industry Standards	Environmental Impact Assessment (EIA) Approved	EIA Approved	Met

*The tax dispute resolution was commercially sensitive and the committee concluded that it would not be appropriate to disclose anything other than the outcome.

The committee also reviewed the legacy bonus arrangement in respect of the Ombrina Mare arbitration award whereby it had been agreed that a bonus of 1% of monies received in relation to the Ombrina Mare arbitration award, capped at 200% of salary, would be awarded to the CEO. The CEO had received an initial partial bonus payment in January 2023 in respect of the successful arbitration outcome and a further partial bonus payment in July 2024 following receipt of the first tranche of payments from the purchaser of the Ombrina Mare award. During 2024, the Company put in place an insurance policy to cover the event that the Italian Republic succeeded in its attempt to have the Ombrina Mare arbitration award annulled. The committee had agreed that the balance of the CEO's bonus award would be paid either on receipt of the second payment tranche from the purchaser of the Ombrina Mare award or on an insurance payout. Following annulment of the award, the Company received its full €31m entitlement under the insurance arrangements in August 2025 and accordingly, the balance of the bonus payment due to the CEO was paid during the year.

2020 Share Option Plan and 2013 LTIP

There were no options granted to the CEO during the financial year under either the 2020 Share Option Plan or 2013 LTIP. All options and LTIP awards granted under those plans have now either vested or lapsed.

2025 LTIP

During the year, an award of nominal cost options was made to the CEO under the 2025 LTIP. The award will normally vest on the third anniversary of the start of the performance period and the percentage of awards which will vest will be dependent on total shareholder return ("TSR") measured over a three year period ending on 30 June 2028. Performance measurement for the 2025 award will be based on the Company's average share price over the 90 day dealing period to 30 June 2025 measured against the average share price for the 90 day dealing period to 30 June 2028. The percentage of awards which will vest will be dependent on TSR with 100% vesting for a 15% or greater compound annual return over the Performance Period and 20% vesting for a compound annual return of 5%, with vesting on a straight-line basis between these points. No awards will vest in the event that TSR does not exceed a compound annual return 5% over the Performance Period. In the event that the awards vest, the vested awards will normally remain exercisable for a period of seven years subject to the rules of the 2025 LTIP regarding leavers. In the case of the CEO, the award will be subject to an additional one year holding period after vesting.

Details of the number of options subject to the award are shown in the table on page 50.

Implementation of Executive Director remuneration policy for 2026

Base salaries

In line with the prior year, the committee approved a salary increase for the CEO based on the average of the December 2025 CPI and RPI numbers as reported by the Office of National Statistics. Accordingly, the CEO's salary was increased by c.3.8% with effect from 1 January 2026. This was in line with other employees.

Annual bonus

Further to advice received from FIT Remuneration Consultants, following their review of the Company's remuneration policy and practices, the committee agreed to increase the post FID, maximum annual bonus potential for the CEO from 50% to 100% based on delivery against pre-agreed objectives. This is in line with current market practices for companies of a similar size, where bonus payments range from 0% to 100% in relation to progress and delivery against the pre-agreed strategic objectives.

The committee has agreed the following objectives for the financial year ending 31 December 2026:

- Achievement of key Sea Lion Project milestones
- Maintaining balance sheet strength
- Effective portfolio management
- Ensuring good HSSE performance across the Group

Long Term Incentives

During the year, the 2025 LTIP was implemented following shareholder approval at the 2025 Annual General Meeting. It is intended that the 2025 LTIP will operate annually with options vesting after three years and subject to the extent that performance targets have been achieved.

Benefits and pension contributions

The CEO will receive the range of Company benefits and pension cash allowance in line with the policy.

Implementation of Non-Executive Director remuneration policy for 2026

Non-Executive Director and Chair fees were increased from 1 January 2025 following a review of market rates and advice from FIT Remuneration Consultants. No further review is planned during 2026. The current fees are set out in the table below:

Role	Type of fee	
Chair	Total fee	£110,000
Other Non-Executive Directors	Basic fee	£45,000
	Chair of Remuneration and Audit & Risk Committees	£10,000
	Senior Independent Director	£2,500

Statement of directors' shareholdings

The table below summarises the interests in shares (including those held in the Share Incentive Plan) of the Directors in office at the year end:

	At 31 December 2025 Ordinary 1p shares	At 31 December 2024 Ordinary 1p shares
S J Moody	**4,713,584**	4,713,584
A C Baker	**234,181**	284,181

The committee has agreed that the CEO should be encouraged to build up a stake of Rockhopper shares equivalent to two times annual base salary over a five year period. Based on the share price as at 31 December 2025, the CEO's shareholding was nearly ten times his annual base salary.

Outstanding awards under the 2020 Share Option Plan, 2013 LTIP and 2025 LTIP (the Plans)

The unvested and vested share awards outstanding as at 31 December 2025 under the Plans and held by individuals who were Directors during the year ended 31 December 2025 are set out in the following tables:

(i) Unvested Option Awards

Director	Date of grant	Options held at 31 December 2024	Granted during year	Lapsed during year	Awards held at 31 December 2025	Exercise price	Earliest vesting date
SJ Moody	30.09.25	—	887,931	—	887,931	£0.01	01.07.28
Total		**—**	**887,931**	**—**	**887,931**		

(ii) Vested Option Awards

Director	Date of grant	Vested awards held at. 31 December 2024	Lapsed during year	Vested during year	Exercised during year	Exercise price	Vested awards held at 31 December 2025
SJ Moody	16.06.17	912,000	—	—	—	£nil	912,000
	31.07.19	962,500	—	—	—	£nil	962,500
	18.05.20	1,691,048	—	—	—	£0.0100	1,691,048
	18.05.20	6,333,333	—	3,166,667	—	£0.0625	9,500,000
Total		**9,898,881**	**—**	**3,166,667**	**—**		**13,065,548**

Share price movements during year ended 31 December 2025

The mid-market closing price of the Company's shares as at 31 December 2025 was 70 pence (31 December 2024: 25.5 pence). The range of the trading price of the Company's shares during the year was between 27.55 pence and 87.7 pence.

Executive Director external appointments

SJ Moody does not have any external directorships.

Paul Mayland
Chair of the Remuneration Committee

2 June 2026

Directors' Report

Principal activity
The principal activity of the Group is the exploration, appraisal and development of its oil and gas acreage. The Group's strategy is to explore, appraise, develop and manage production from its acreage both safely and responsibly.

Results and dividends
The trading results for the year, and the Group's financial position at the end of the period are shown in the attached financial statements. The Directors have not recommended a dividend for the year (year ended 31 December 2024: £nil). A review on the operations of the Group and an indication of likely future developments of the business are included in the Strategic Report.

Key performance indicators "KPIs"
See page 11 for more details.

Substantial shareholders
As at 28 May 2026 the Company had been notified of the following interests of three percent or more of the Company's voting rights.

Shareholder/Fund manager	Number of shares	% of issued share capital
Noked Capital	79,004,742	9.16
Aedos Advisers	67,573,228	7.84
Brosh Funds	51,976,760	6.03
ION Fund Management	33,038,346	3.83

Directors
The present members of the Board are as listed in the Board composition section of the Governance Report. The interests of the Directors in office at the year end in the share capital of the Company are shown in the Remuneration Report along with details of their service contracts and terms of appointment.

Post balance sheet events
Subsequent to the reporting date, the Company completed an Open Offer to Qualifying Shareholders, as announced on 22 December 2025. The Open Offer closed for acceptances at 11.00 a.m. on 15 January 2026.

Valid acceptances were received for 101,956,821 Open Offer Shares, representing a take-up of approximately 773.1% of the 13,188,036 Open Offer Shares available. Qualifying Shareholders received their full basic entitlement, with excess applications scaled back on a pro rata basis in accordance with the terms of the Open Offer.

The Open Offer raised gross proceeds of approximately £6.9 million (approximately US$9.2 million) through the issue of 13,188,036 new ordinary shares of 1 pence each. Admission of the Open Offer Shares to trading on AIM occurred on 21 January 2026, at which date the Company's issued ordinary share capital comprised 860,504,777 ordinary shares.

On the 20 May Navitas Petroleum LP ("Navitas" or the "Operator") provided an update on Sea Lion development progress. Phase 1 remains on track for first oil in H1 2028, with drilling scheduled to commence early 2027. The Aoka Mizu FPSO (55k bopd gross; 19.25k bopd net to Rockhopper) will sail to its upgrade shipyard by end of May, following conclusion of operations by its current operator. Upgrade works have been relocated from the Middle East to Asia due to the Iran conflict, adding c.US$45m to the development budget; Rockhopper's net additional equity cost is c.US$5.25m, and the Company remains fully funded for Phase 1.

Principal risks and uncertainties
Information relating to the principal risks and uncertainties facing the Group is set out in the Strategic Report and note 27.

Related party transactions
Related party transactions are disclosed in note 26.

Financial instruments
For the period under review the Group held no financial instruments, outside of cash and receivables. Financial risk management policies are disclosed in note 27.

Political and charitable contributions
The Group made no charitable donations (year ended 31 December 2024: £nil) and no political donations (year ended 31 December 2024: £nil) during the year.

Creditor payment policy
The Group does not follow any specific code or standard on payment practice. However, it is the policy of the Group to ensure that all of its suppliers of goods and services are paid promptly and in accordance with contractual and legal obligations. Average creditor days for the year were 29 days (year ended 31 December 2024: 31 days), on the basis of accounts payable as a percentage of amounts invoiced during the year.

Qualifying indemnity provisions
The Company has entered into separate indemnity deeds with each director containing qualifying indemnity provisions, as defined at section 236 of the Companies Act 2006, under which the Company has agreed to indemnify them in respect of certain liabilities which may attach to them as a director or as a former director of the Company. At the date of this Directors' Report indemnity deeds containing qualifying indemnity provisions are in force for all of the Company's Directors.

The Company has also issued an indemnity to Directors and the Company Secretary in respect of any personal liability to Falkland Islands tax by the Company or its subsidiaries.

Directors' and Officers' insurance
The Group maintained directors' and officers' liability insurance cover throughout the period. The Directors are also able to obtain independent legal advice at the expense of the Group, as necessary, in their capacity as Directors.

Employees
The Group had 9 employees at the year end, one of whom is an Executive Director. The Group seeks to employ people on the basis of merit and ability to perform the required roles. The Group does not discriminate on any grounds including race, gender, religion, age, nationality or sexual orientation.

Environment
The Group's operations are, and will be, subject to environmental regulation (with regular environmental impact assessments and evaluation of operations required before any permits are granted to the Group) in the jurisdiction in which it operates. Although the Group intends to be in compliance with all applicable environmental laws and regulations, there are certain risks inherent to its activities, such as accidental spills, leakages or other circumstances, that could subject the Group to extensive liability. Further, the Group may fail to obtain the required approval from the relevant authorities necessary for it to undertake activities which are likely to impact the environment. The Group is unable to predict the effect of additional environmental laws and regulations which may be adopted in the future, including whether any such laws or regulations would materially increase the Group's cost of doing business or affect its operations in any area.

Statement of Directors' responsibilities to disclose information to the auditor.
The Directors who were members of the board at the time of approving the Directors' Report, having made enquiries of fellow Directors and of the Group and company auditor, each confirms that:

> So far as each director is aware, there is no relevant audit information of which the auditor is unaware.
> Each director has taken all reasonable steps to make themselves aware of any such information and to establish that the auditor is aware of it.

This confirmation is given and should be interpreted in accordance with section 418 of the companies act 2006.

Statement of Directors' responsibilities in respect of the strategic report, the Directors' report and the financial statements
The Directors are responsible for preparing the Strategic Report, the Directors' Report and the Group and Parent Company financial statements in accordance with applicable law and regulations.

Company law requires the Directors to prepare Group and Parent Company financial statements for each financial year. As required by the AIM Rules of the London Stock Exchange they are required to prepare the Group financial statements in accordance with UK adopted international accounting standards and applicable law and have elected to prepare the Parent Company financial statements in accordance with UK Accounting Standards and applicable law (UK Generally Accepted Accounting Practice), including FRS 101 Reduced Disclosure Framework.

Under company law, the Directors must not approve the financial statements unless they are satisfied that they give a true and fair view of the state of affairs of the Group and Parent Company and of their profit or loss for that period. In preparing each of the Group and Parent Company financial statements, the Directors are required to:

> select suitable accounting policies and then apply them consistently;
> make judgements and estimates that are reasonable and prudent;
> for the Group financial statements, state whether they have been prepared in accordance with UK adopted international accounting standards;
> for the Parent Company financial statements, state whether applicable UK Accounting Standards have been followed, subject to any material departures disclosed and explained in the financial statements;
> assess the Group and Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
> use the going concern basis of accounting unless they either intend to liquidate the Group or the Parent Company or to cease operations, or have no realistic alternative but to do so.

The Directors are responsible for keeping adequate accounting records that are sufficient to show and explain the Parent Company's transactions and disclose with reasonable accuracy at any time the financial position of the Parent Company and enable them to ensure that its financial statements comply with the Companies Act 2006. They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Group and to prevent and detect fraud and other irregularities.

Under applicable laws and regulations, the Directors are also responsible for preparing a Strategic Report and a Directors' Report that complies with that law and those regulations.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website. Legislation in the UK governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Jan Davies
Company Secretary

Notes to the Consolidated Financial Statements

for the year ended 31 December 2025

1. Accounting policies

1.1 Group and its operations

Rockhopper Exploration plc, the 'Company', a public limited company quoted on AIM, incorporated and domiciled in the United Kingdom ('UK'), together with its subsidiaries, collectively 'the 'Group' holds certain exploration licences for the exploration and exploitation of oil and gas in the Falkland Islands. In addition, it has operations in the Greater Mediterranean based in Italy which have been classified as discontinued operations and whose assets and liabilities are classified as held for sale. The registered office of the Company is Warner House, 123 Castle Street, Salisbury, Wiltshire, SP1 3TB.

1.2 Statement of compliance

The consolidated financial statements of the Group have been prepared on a going concern basis in accordance with UK adopted International Accounting Standards in conformity with the requirements of the Companies Act 2006. The consolidated financial statements were approved for issue by the board of directors on 2 June 2026 and are subject to approval at the Annual General Meeting of shareholders on 30 June 2026.

1.3 Basis of preparation

The results upon which these financial statements have been based were prepared using the accounting policies set out below. These policies have been consistently applied unless otherwise stated.

These consolidated financial statements have been prepared under the historical cost convention with the exception of certain items which are measured at fair value.

Items included in the results of each of the Group's entities are measured in the currency of the primary economic environment in which that entity operates (the "functional currency"). The consolidated financial statements are presented in US Dollars ($), which is Rockhopper Exploration plc's functional currency.

All values are rounded to the nearest thousand dollars ($'000) or thousand pounds (£'000), except when otherwise indicated.

1.4 Change in accounting policy

Changes in accounting standards

In the current year the following new and revised Standards and Interpretations have been adopted. None of these have a material impact on the Group's annual results.

— Lack of Exchangeability (Amendment to IAS 21);
— IFRS Practice Statement 1 Management Commentary;

New accounting pronouncements

The following amendments are effective for the period beginning 1 January 2026:

— Amendments to the Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7);
— Annual Improvements to IFRS Accounting Standards – Volume 11; and
— Contracts Referencing Nature dependent Electricity (Amendments to IFRS 9 and IFRS 7).

The following amendments are effective for the period beginning 1 January 2027:

— IFRS 18 Presentation and Disclosure in Financial Statements;
— IFRS 19 Subsidiaries without Public Accountability: Disclosures; and
— IFRS for SMEs Accounting Standard - Third Edition.

The Directors are assessing the impact of the above Standards, Amendments and Interpretations. IFRS 18 is expected to impact presentation but not measurement, and no material impact on the Group's financial position or results is expected.

Notes to the Consolidated Financial Statements

for the year ended 31 December 2025

1.5 Going concern

The financial statements have been prepared on a going concern basis which the Directors consider to be appropriate for the reasons set out below. The Directors have assessed the Group's ability to continue as a going concern for a period of at least twelve months from the date of approval of the financial statements, being to 30 June 2027 (the "Assessment Period").

Background and financial position

The Group is an oil and gas development company whose principal asset is its interest in Phase 1 of the Sea Lion field (the "Project"), located offshore to the north of the Falkland Islands within the Group's PL032 licence. The Group is currently pre-revenue and has not yet achieved first oil. The Group's strategy is to advance the Project through to first oil, following which revenue generation is expected to commence.

As at 31 December 2025, the Group had cash and cash equivalents of US$157.6 million, term deposit of US$13.4 million and an undrawn committed Senior Debt Facility of US$350.0 million (together, total available liquidity of US$521.0 million). The Group has no producing assets. The Group concluded a successful fundraising on 31 December 2025, receiving gross proceeds of US$136 million, and financial close on the Project financing was achieved on 22 December 2025.

Assessment period and base case

The Directors have assessed the Group's going concern position over the Assessment Period by reference to detailed cash flow forecasts prepared by management covering sources and uses of funds to 30 June 2027. The base case incorporates the Sea Lion Phase 1 Development programme consistent with the approved banking model together with corporate and administrative expenditures and tax obligations arising in the period.

Under the base case, the Group's existing cash resources are projected to be sufficient to meet all committed expenditure within the Assessment Period.

Senior Debt Facility

The Group has in place a Senior Debt Facility of US$350 million to part-fund the Project. The Facility was entirely undrawn as at 31 December 2025.

First drawdown under the Facility is forecast to occur toward the end of the Assessment Period, subject to the satisfaction of conditions precedent customary to a financing of this nature. Management has reviewed the conditions precedent to first drawdown and considers all are reasonably capable of being satisfied in accordance with the project timeline. The most significant condition for the purposes of this assessment is the requirement, prior to each drawdown, for an updated funding statement to confirm that no funding shortfall exists. As noted above, no funding shortfall currently exists, and management does not consider this condition to be at risk of not being met within the Assessment Period.

Key considerations within the Assessment Period

In forming their view, the Directors have considered a number of factors bearing on the Group's ability to continue as a going concern within the Assessment Period. These include the level and nature of project costs expected to be incurred, the resilience of the funding position to potential cost movements, the ongoing availability of the Senior Debt Facility, and the Group's compliance with applicable covenants and financial conditions.

The total cost estimate for the Sea Lion Phase 1 Development has been externally validated and is predominantly based on executed contracts. The majority of costs within the Assessment Period are fixed or substantially fixed in nature. The Directors are satisfied that, having regard to the contingencies included in the approved cost estimate, the additional funding buffer provided through the Equity Overrun Support mechanism, and the cost-sharing structure under the Co-Venturer Loan arrangements with the Operator (under which the Group is required to fund only one-third of its share of project capital costs prior to completion), the Group's funding position is resilient to reasonably foreseeable cost movements within the Assessment Period.

The Directors have also considered whether any circumstances are likely to arise that would require the Banking Case underpinning the Facility to be redetermined within the Assessment Period. Having assessed the relevant trigger conditions — including significant movements in proved reserves, oil price below contingency levels, significant cost escalation over the contingency levels and the results of the first producer well — the Directors consider the likelihood of Banking Case redetermination to be remote within the Assessment Period due to the long-term nature of the project. The Facility Agreement also provides that Lenders cannot refuse to fund solely because a trigger event has occurred, which provides additional assurance as to the availability of the Facility.

Sensitivity analysis has been performed, including a reasonable downside scenario modelling on gross capital expenditure increases above the base case. Under all scenarios considered, the Group maintains sufficient liquidity within the Assessment Period.

Post-Assessment Period and longer-term funding

The Assessment Period considered by the Directors for the purpose of this going concern assessment runs to 30 June 2027. Beyond that date, the Project will be at a relatively early stage of what is a substantial, multi-year development programme, and first oil is not expected to be achieved until after the Assessment Period. The Project is large in scale and, as with any development of this nature, there are a number of factors that could, over the longer term, give rise to a need for the Group to secure additional financial resources. These could include, amongst other things, movements in the oil price environment, cost escalation above current contingencies, differences in reservoir performance relative to current expectations, and the timing and terms on which the Senior Debt Facility is drawn. The nature and quantum of any such requirement, and the sources from which it might be met, would depend on the circumstances prevailing at the time. Whilst the Directors have not undertaken a detailed assessment of post-Assessment Period funding requirements — which falls outside the scope of this going concern review — they would expect, in the ordinary course, that a range of potential funding options would be available to the Group including further equity or debt financing. However, no assurance can be given that additional funding would be available, or available on commercially acceptable terms, if and when required.

Conclusion

Having considered the factors described above — in particular the Group's current liquidity position, the base case cash flow forecasts, the resilience of the funding position to reasonably foreseeable downside scenarios, and the availability of the Senior Debt Facility within the Assessment Period — the Directors are satisfied that the Group has adequate resources to continue as a going concern for the Assessment Period. Accordingly, they consider it appropriate to adopt the going concern basis of accounting in preparing these financial statements. The Directors do not consider that any material uncertainty exists that would cast significant doubt on the Group's ability to continue as a going concern within the Assessment Period.

1.6 Material accounting policies

(A) Basis of accounting

The Group has identified the accounting policies that are most significant to its business operations and the understanding of its results. These accounting policies are those which involve the most complex or subjective decisions or assessments, and relate to the capitalisation of exploration expenditure. The determination of this is fundamental to the financial results and position and requires management to make a complex judgement based on information and data that may change in future periods.

Since these policies involve the use of assumptions and subjective judgements as to future events and are subject to change, the use of different assumptions or data could produce materially different results. The measurement basis that has been applied in preparing the results is historical cost.

The significant accounting policies adopted in the preparation of the results are set out below.

(B) Basis of consolidation

The Group financial statements consolidate the financial statements of the Company and its subsidiary undertakings drawn up to 31 December 2025. Subsidiaries are those entities over which the Group has control including those held for sale. Control is achieved where the Group has the power over the subsidiary, is exposed, or has rights to variable returns from the subsidiary and has the ability to use its power to affect its returns. All subsidiaries are 100 per cent owned by the Group and there are no non-controlling interests.

The results of subsidiaries acquired or disposed of during the year are included in the income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate. Where necessary, adjustments are made to the financial statements of subsidiaries acquired to bring the accounting policies used into line with those used by other members of the Group.

All intercompany balances have been eliminated on consolidation.

Notes to the Consolidated Financial Statements

for the year ended 31 December 2025

1.6 Material accounting policies (continued)

(C) Segmental reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker as required by IFRS8 Operating Segments. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the board of directors.

The Group's operations are made up of three segments, the oil and gas exploration and production activities in the geographical regions of the Falkland Islands and the Greater Mediterranean region as well as its corporate activities mainly centered in the UK.

(D) Oil and gas assets

The Group applies the successful efforts method of accounting for exploration and evaluation ("E&E") costs, having regard to the requirements of IFRS6 – 'Exploration for and evaluation of mineral resources'.

Exploration and evaluation ("E&E") expenditure

Expensed exploration & evaluation costs

Expenditure on costs incurred prior to obtaining the legal rights to explore an area, geological and geophysical costs are expensed immediately to the income statement.

Capitalised intangible exploration and evaluation assets

All directly attributable E&E costs are initially capitalised in well, field, prospect, or other specific, cost pools as appropriate, pending determination.

Treatment of intangible E&E assets at conclusion of appraisal activities

Intangible E&E assets related to each cost pool are carried forward until the existence, or otherwise, of commercial reserves have been determined, subject to certain limitations including review for indicators of impairment. If commercial reserves have been discovered, the carrying value, after any impairment loss, of the relevant E&E assets, are then reclassified as development and production assets within property plant and equipment. However, if commercial reserves have not been found, the capitalised costs are charged to expense.

Development and production assets

Development and production assets, classified within property, plant and equipment, are accumulated generally on a field-by-field basis and represent the costs of developing the commercial reserves discovered and bringing them into production, together with the E&E expenditures incurred in finding commercial reserves transferred from intangible E&E assets.

Depreciation of producing assets

The net book values of producing assets are depreciated generally on a field-by-field basis using the unit-of-production method by reference to the ratio of production in the year and the related commercial reserves of the field, taking into account the future development expenditure necessary to bring those reserves into production.

Disposals

Net cash proceeds from any disposal of an intangible E&E asset are initially credited against the previously capitalised costs. Any surplus proceeds are credited to the income statement.

Decommissioning

Provision for decommissioning is recognised in full when the related facilities are installed. The amount recognised is the present value of the estimated future expenditure. A corresponding amount equivalent to the provision is also recognised as part of the cost of the related oil and gas property. This is subsequently depreciated as part of the capital costs of the production facilities. Any change in the present value of the estimated expenditure is dealt with prospectively as an adjustment to the provision and the oil and gas property. The unwinding of the discount is included in finance cost.

(E) Foreign currency translation Functional and presentation currency:

Items included in the results of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates, the functional currency. The consolidated financial statements are presented in US$ as this best reflects the economic environment of the oil exploration sector in which the Group operates. The Group maintains the financial statements of the parent and subsidiary undertakings in their functional currency. Where applicable, the Group translates subsidiary financial statements into the presentation currency, US$, using the closing rate method for assets and liabilities which are translated at the rate of exchange prevailing at the balance sheet date and rates at the date of transactions for income statement accounts. Differences are taken through the Statement of Comprehensive Income to reserves.

Transactions and balances:

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are expensed in the income statement, except when deferred in equity as qualifying cash flow hedges and qualifying net investment hedges.

The year end rates of exchange were:

	31 December 2025	31 December 2024
£ : US$	**1.35**	1.25
€ : US$	**1.17**	1.04

(F) Revenue and income

There is no revenue in either this or the prior period.

Investment income consists of interest receivable for the period. Interest income is recognised as it accrues, taking into account the effective yield on the investment.

(G) Non-derivative financial instruments

Financial assets and financial liabilities are recognised on the Group's balance sheet when the Group has become a party to the contractual provisions of the instrument.

(i) Other receivables

Other receivables are initially measured at fair value. Those that meet the following conditions are measured subsequently at fair value through other comprehensive income (FVTOCI):

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

By default, all other financial assets are measured subsequently at fair value through profit or loss (FVTPL).

The Group recognises an allowance for expected credit losses for all debt instruments not held at fair value through profit or loss. Expected credit losses are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate.

For intercompany loans that are repayable on demand, expected credit losses are recognised on the assumption that repayment of the loan is demanded at the reporting date. Where the borrower could not repay the loan if demanded at the reporting date, the expected manner of recovering the loan is considered in measuring the expected credit losses. This may include a repay over time strategies discounted at the loan's effective interest rate, or a fire sale of less liquid assets.

(ii) Restricted cash

Restricted cash is disclosed separately on the face of the balance sheet and denoted as restricted when it is not under the exclusive control of the Group. All amounts relate to balances held as security in relation to property leases.

Notes to the Consolidated Financial Statements

for the year ended 31 December 2025

1.6 Material accounting policies (continued)

(G) Non-derivative financial instruments (continued)

(iii) Term deposits

Term deposits are disclosed separately on the face of the balance sheet when their term is equal or greater than one month and they are unbreakable.

(iv) Cash and cash equivalents

They are stated at carrying value which is deemed to be fair value. Cash and cash equivalents comprise instant access bank balances as well as a small amount of cash in hand.

(v) Financial liabilities and equity

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities.

(vi) Account and other payables

Account payables are initially recognised at fair value and subsequently at amortised cost using the effective interest method.

(vii) Insurance liability

The Insurance Liability recognised in the year relates to an insurance policy. Under its terms the Group does not have the unconditional right to avoid delivering cash and hence it has been recognised as a financial liability under IFRS 9. As such the liability is fair valued on initial recognition and adjusted for movements in fair value through profit and loss in subsequent periods.

(viii) Equity instruments

Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

(H) Income taxes and deferred taxation

The current tax amount is based on the taxable profits or losses of the year, after any adjustments in respect of prior years. Tax, including tax relief for losses if applicable, is allocated over profits before tax and amounts charged or credited to reserves as appropriate.

Deferred taxation is recognised in respect of all taxable temporary differences that have originated but not reversed at the balance sheet date where a transaction or events have occurred at that date that will result in an obligation to pay more, or a right to pay less or to receive more, tax, with the exception that deferred tax assets are recognised only to the extent that its considered probable that there will be suitable taxable profits from which the future reversal of the underlying temporary differences can be deducted.

Deferred tax is measured on an undiscounted basis at the tax rates that are expected to apply in the periods in which temporary differences reverse, based on tax rates and laws enacted or substantively enacted at the balance sheet date.

Where there are uncertainties over how to apply the recognition and measurement requirements in IAS 12 the group applies IFRIC 23, Uncertainty over Income TaxTreatment.

(I) Share based remuneration

The Group issues equity settled share based payments to certain employees. Equity settled share based payments are measured at fair value (excluding the effect of non market based vesting conditions) at the date of grant. The fair value determined at the grant date of the equity settled share based payments is expensed on a straight line basis over the vesting period, based on the Group's estimate of shares that will eventually vest and adjusted for non market based vesting conditions.

Cash settled share based payment transactions result in a liability. Services received and liabilities incurred are measured initially at fair value of the liability at grant date, and the liability is remeasured each reporting period until settlement. The liability is recognised on a straight line basis over the period that services are rendered.

(J) Capital commitments

Capital commitments include all projects for which specific board approval has been obtained up to the reporting date. Projects still under investigation for which specific board approvals have not yet been obtained are excluded.

2. Use of estimates, assumptions and judgements

The Group makes estimates, assumptions and judgements that affect the reported amounts of assets and liabilities. Estimates, assumptions and judgements are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The key assumptions concerning the future, and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed in the relevant note as is sensitivity analysis as required. The key areas identified and the relevant note are as follows:

Fair value of Monetisation Agreement and Insurance Liability (note 10) – estimates

To calculate the fair value of the Monetisation Agreement and the directly associated Insurance Liability involved estimation. Future cash flows under the agreement are contractual and it was measured at fair value using a discounted cash flow basis. This required estimating the chance of success in proceedings, costs of proceedings as well as the amount and timing of these cash flows and the discount rate applied.

Carrying value of Development and Production assets (note 16) – judgements

During the period Management made an assessment that commercial viability and technical feasibility was achieved in the period and the asset was transferred to development and production assets. As part of the transfer the assets were assessed for impairment, as detailed in note 15 and note 16, and found that the commercially viable quantities of resources meant that the carrying amount is likely to be recovered in full.

Tax payable (note 20) – estimates

The Group recognised an estimated Non-current tax payable of $20.9 million arising from the historic farm-outs in the Falkland Islands which in the period was finalised with the Falkland Islands Tax Authority. Following this agreement the only uncertainty is the timing of future tax payments as they are all a function of first oil.

Decommissioning costs (note 21) – estimates

Estimates are made around appropriate inflation and discount rates to be applied as well as the timing of any future decommissioning. Decommissioning costs are uncertain and management's cost estimates can vary in response to many factors, including changes to the relevant legal requirements, the emergence of new technology or experience at other assets. The expected timing, work scope and amount of expenditure may also change.

Notes to the Consolidated Financial Statements

for the year ended 31 December 2025

3. Segmental information

The Group's operations are located and managed in three geographically distinct business units; namely the Falkland Islands, the Greater Mediterranean, and Corporate (includes UK and the Ombrina Mare Arbitration). Some of the business units currently do not generate any revenue or have any material operating income. The business is only engaged in one business, that of upstream oil and gas exploration and production.

Year ended 31 December 2025	**Falkland Islands $'000**	**Corporate $'000**	**Total (Continuing) $'000**	**Greater Mediterranean (Discontinued) $'000**	**Total (Continuing and Discontinued) $'000**

The total remuneration of the highest paid director was:

	2025 £'000	2024 £'000
Annual salary and bonuses	**1,299**	458
Money purchase pension schemes & pension cash allowance	**50**	49
Benefits	**6**	5
	1,355	512

Interest in outstanding share options, LTIPs and SARs, by director, are also separately disclosed in the directors' remuneration report

Notes to the Consolidated Financial Statements

for the year ended 31 December 2025

7. Auditors' remuneration

	2025 $'000	2024 $'000
Fees payable to the Company's auditors for the audit of the Company's annual financial statements	**357**	186
Fees payable to the Company's auditors and its associates for other services:		
Audit of the accounts of subsidiaries	**56**	26
	413	212

8. Charge for share based payments

The charge for share based payments relate to options granted to employees of the Group.

	2025 $'000	2024 $'000
Charge for option scheme	**146**	76
	146	76

Option scheme and Long term incentive plan

Various options have been granted in historic periods. Vesting dates and exercise prices are detailed in the table below and commentary thereto.

LTIP awards relate to a historic scheme and current year grants. During the year 2,177,456 options were granted. The awards are structured as nominal cost options and, subject to meeting specific performance criteria, will normally vest on future dates. 887,931 of these options were granted to the CEO, and will be subject to an additional one year holding period after vesting.

The percentage of awards which will vest is dependent on total shareholder return ("TSR") measured over a three year period ending on 30 June 2028 . Performance measurement for these awards will be based on the Company's average share price with the percentage of awards which will vest will being dependent on TSR between these points. The options were valued using a Monte Carlo model and the TSR performance condition is classed as a market-based performance condition which is factored in to the valuation as per IFRS 2.

The following movements occurred during the year:

Issue date	Vesting date	Exercise price	Expiry date	At 31 December 2024	Granted	Exercised	At 31 December 2025
Option Scheme							
18 May 2020	Vested	£0.01	18 May 2030	5,258,889	—	—	**5,258,889**
18 May 2020	Vested	£0.0625	18 May 2030	15,350,000	—	(2,250,000)	**13,100,000**
25 Jan 2023	Variable**	£0.07	25 Jan 2033	4,500,000	—	—	**4,500,000**
				25,108,889	—	(2,250,000)	**22,858,889**
Long Term Incentive Plan							
16 Jun 2017	Vested	£nil	16 June 2027	2,352,000	—	(960,000)	**1,392,000**
31 Jul 2019	Vested	£nil	31 July 2029	2,337,501	—	(687,500)	**1,650,001**
30 Sept 2025	01 Jul 2028	£0.01	30 Sept 2035	—	2,177,456	—	**2,177,456**
				4,689,501	2,177,456	(1,647,500)	**5,219,457**

** These options vest in three tranches of 1.5 million each at project sanction, first oil, and project completion. The value of these options was $500,000 and made with reference to services received. The cost of the options was offset against the liability in relation to the service provided.

9. Foreign exchange movement

	2025 $'000	2024 $'000
Other foreign exchange movements	**2,981**	170
Total net foreign exchange gain	**2,981**	170

10. Monetisation agreement and Insurance proceeds

Background:

In August 2022, pursuant to an ICSID arbitration against the Italian Republic, which commenced in 2017, Rockhopper was awarded approximately €190 million plus interest and costs following a unanimous decision by the ICSID appointed arbitral Tribunal that Italy had breached its obligations under the Energy Charter Treaty (the "Award").

Rockhopper submitted a letter to the Italian Republic in September 2022 formally requesting payment of €247 million, representing the Award amount plus accrued interest from 29 January 2016 to 23 August 2022 and costs.

Following Italy's request on 28 October 2022 to seek annulment of the Award, an ad hoc Committee was constituted to hear relevant arguments and ultimately make a ruling on Italy's request to annul the Award.

On 20 December 2023, Rockhopper announced its entry into a funded participation agreement (the "Monetisation Agreement") with a regulated specialist fund that has experience in investing in legal assets (the "Specialist Fund") to monetise its Award.

Under the terms of the Monetisation Agreement, the Specialist Fund agreed to make cash payments to Rockhopper in up to three tranches:

- Tranche 1 - Rockhopper retain €19 million of an upfront payment of €45million on completion. As previously disclosed, Rockhopper entered into a litigation funding agreement in 2017 under which all costs relating to the Arbitration from commencement to the rendering of the Award were paid on its behalf by a separate specialist arbitration funder (the "Original Arbitration Funder"). That agreement entitled the Original Arbitration Funder to a proportion of any proceeds from the Award or any monetisation of the Award. The Original Arbitration Funder was paid €26 million of the Tranche 1 proceeds to discharge all of Rockhopper's liabilities under the agreement with the Original Arbitration Funder.
- Tranche 2 - Additional contingent payment of €65 million upon a successful annulment outcome. Should the Award be partially annulled and the quantum reduced as a result, then Tranche 2 will be reduced such that the amounts under Tranche 1 and Tranche 2 shall be adjusted downward on a pro-rata basis. For example, if the quantum of the Award is reduced by 20%, then the amounts under Tranche 1 and Tranche 2 shall be reduced by 20%. For the avoidance of doubt, the amounts under Tranche 1 and Tranche 2 shall not reduce below €45m in any circumstance.
- Tranche 3 - Potential payment of 20% on recovery of amounts in excess of 200% of the Specialist Fund's total investment including costs.

In June 2024 the precedent conditions were satisfied and Rockhopper received its initial consideration of €19 million. Management determined that the Monetisation Agreement is a financial instrument within the scope of IFRS 9 and as such should be fair valued on initial recognition and subsequently through profit and loss. This led to a US$58.2 million current receivable in the balance sheet as at 31 December 2024.

In October 2024 the Group decided, in line with normal market practice, that insuring to protect shareholders against loss resulting from an annulment of the Award to be the most prudent course of action. The insurance arrangements (the "Insurance") ensured that in the event that the Italian Republic succeeded in having the entire Award annulled or in the event of partial annulment, the combination of the Tranche 2 payment and the insurance payout shall entitle Rockhopper to a total no less than €31 million. The total cost of the Insurance, which including applicable taxes and underwriting fees, is €4 million.

In June 2025 it was announced that Italy had been successful in its attempts to annul the Award (the "Annulment"). Under the terms of the Monetisation Agreement the Tranche 2 payment will now be €nil. As such the Group submitted claims and statements of loss under the terms of the Insurance. The lead insurer has confirmed that the loss has been triggered and, as a result, Rockhopper recognised a receivable in June 2025 for the full €31 million amount ("Insurance Proceeds") to which it is entitled under the Insurance. The money was received in August 2025 in line with terms of the Insurance.

Under the terms of the Insurance to the extent that Rockhopper makes any future financial recovery from any new arbitration ("Recovered Amounts"), through the Monetisation Agreement or otherwise, after deductions for any reasonable costs and expenses incurred, that recovery will be utilised to reimburse the insurers ("Insurance Liability") in respect of the Insurance Proceeds.

A new request for arbitration was submitted in September 2025. Under the terms of the Monetisation Agreement the costs of contesting the new request for arbitration are borne by the Specialist Fund.

Notes to the Consolidated Financial Statements

for the year ended 31 December 2025

10. Monetisation agreement and Insurance proceeds (continued)

Fair value of the monetisation agreement

Even though the claim now has been resubmitted, the Monetisation Agreement anticipated this event and includes future economic flows to the Group arising from the contractual arrangements in place. Given some or all of the future proceeds of the Monetisation Agreement will be passed through to insurers Management have considered whether the derecognition criteria IFRS 9 have been met and concluded they have not. The derecognition criteria have to be applied to the whole Monetisation Agreement as neither a part or pro rata part of a specifically identified cash flow can be identified. As noted there is a pass through obligation but Rockhopper has maintained a potential subordinated retained interest and control of the Monetisation Agreement.

As a result, Management's judgement is to continue to recognise the Monetisation Agreement as a financial asset at fair value through profit or loss.

In the period the fair value of the Monetisation Agreement reduced from $58.2m to $22.1m resulting in an overall loss through a combination of changes in fair value and foreign exchange of $36.1m recognised in the income statement.

In estimating the fair value of the Monetisation Agreement management has made the following judgements and estimates:

- As Rockhopper is not due any amounts for Tranche 2 under the Monetisation Agreement the receipts under Tranche 2 is now $nil.
- The likelihood of receipts under Tranche 3 have now increased as they are linked to the costs incurred by the Specialist Fund which has now been reduced as they will no longer have to make a payment for Tranche 2 to Rockhopper. This increases the likelihood that if a future arbitration finds in Rockhopper's favour the award recovery will be in excess of 200% of the Specialist Funds costs.
- The fair value of Tranche 3 has been estimated on the basis of probability weighted expected cash flows. This is inherently subjective and includes judgements on amongst other things, the chance of success in the resubmitted arbitration, the expected value of any recovered amounts under any new award, the cost of achieving those recoveries as well as the time taken to achieve any recovery.

Insurance receivable, liability and costs

Following the Annulment €31 million was recognised as a receivable at 30 June 2025, which was subsequently received in August 2025.

Management considered the terms of the insurance policy and determined that the Group does not have the unconditional right to avoid delivering cash and hence a financial liability should be recognised under IFRS 9. As such the liability should be fair valued on initial recognition and subsequently through profit and loss. The fair value of the insurance liability has been estimated on the basis of probability weighted expected cash flows using the same inputs as the fair value of the Tranche 3 proceeds as it represents the expected pass through of the proceeds of Tranche 3, capped at a maximum of €31 million.

The cost of the Insurance was being spread over the life of the policy (which materially exceeded the expected time to receive an outcome from the Award annulment). As such the majority of this cost was recorded as a prepayment as at 31 December 2024. Given the claim on the Insurance, during the period, the US$3.9 million balance of this prepayment has been recognised in Other Expenses in the period.

Financial impact

The impact of the above on the income statement and balance sheet is set out below.

Income statement

	2025 $'000	2024 $'000
Other income		
Insurance proceeds received	**35,179**	—
Monetisation Agreement – fair value movement	**—**	79,802
Total other income	**35,179**	79,802

	2025 $'000	2024 $'000
Other expenses		
IFRS 9 liability for repayment of insurance proceeds	**(21,645)**	—
Insurance policy cost	**(3,906)**	(232)
Other costs	**(1,301)**	(792)
Monetisation Agreement – fair value movement	**(42,874)**	—
Total other expenses	**(69,726)**	(1,024)

Balance sheet

	2025 $'000	2024 $'000
Assets		
Monetisation Agreement – fair value (non current assets Financial asset)	**22,148**	—
Monetisation Agreement – fair value (included in other receivables note 17)	**—**	58,228
Insurance prepayment (included in other receivables note 17)	**—**	3,906
Non-current liabilities		
Insurance liability – potential repayment of proceeds (other payables note 19)	**(21,645)**	—

Reconciliation of movements on Monetisation Agreement fair value

	2025 $'000	2024 $'000
Monetisation Agreement – fair value - opening	**58,228**	—
Fair value movement	**(41,682)**	81,124
Cash received	**—**	(20,556)
FX impact	**5,602**	(2,340)
Monetisation Agreement – fair value - closing	**22,148**	58,228

Cash movements

The majority of movements in the year are non cash, with only the Insurance Proceeds received and Other costs actually pertaining to cashflows in the current year.

Sensitivity

Management believe in the merits of the case but recognise that no outcome is certain. As a result, assumptions and judgements are required in the consideration of probability, timing, and of the value for the recognition of other income and expenses and associated assets and liabilities. In regard to timing, the length of time to recover any amounts is uncertain, but management note that the original arbitration process took circa 9 years, therefore management does not expect any resolution in the near term. The impact of increasing or decreasing the time to recover funds is detailed below in sensitivity one, and is impacted by both the interest that accrues on the award and the impact of discounting the award.

The valuation of the asset and liability are estimated using the same underlying inputs. The valuation is a function of various inputs including; the chance of success in proceedings, assumptions of value of future award granted and received, and the time and cost to recover any award should it be granted.

Given the repayment of the insurance proceeds is capped at an undiscounted value of €31 million, any award below this amount would have an equal and offsetting impact on the fair value of the asset and the liability, with no material net effect on the income statement or net assets. Above an undiscounted value of €31 million, any increases in the award amount received by Rockhopper would result in a net benefit to the Group. The impact of changes to the value of the award is detailed below in sensitivity 2. To provide some context, under the Tranche 3 proceeds mechanics, had an amount been received on the 31 December 2025 equivalent to the original Award plus accrued interest this would have increased the net asset position by $21.1 million.

Sensitivity 1: Impact of discounting

Impact of increasing the time to recover the award by one year on net assets: decrease in net asset position $13 thousand

Impact of decreasing the time to recover the award by one year on net assets: increase net asset position $16 thousand

Sensitivity 2: Impact of fair value of Award

Impact on net assets in the event no award is received by Rockhopper: $0.5 million

Impact on net assets of decreasing the fair value of the award received by Rockhopper by 5%: $0.5 million

Impact on net assets of increasing the fair value of the award received by Rockhopper by 5%: $3.2 million

Notes to the Consolidated Financial Statements

for the year ended 31 December 2025

11. Finance income and expense

	2025 $'000	2024 Restated $'000
Unwinding of discounts on fair value of Monetisation Agreement (see note 10)	**1,192**	1,323
Bank and other interest receivable	**894**	604
Total finance income	**2,086**	1,927
Unwinding of discount on decommissioning provisions (see note 21)	**83**	91
Co-venture loan interest	**2,173**	203
Other	**98**	2
Total finance expense	**2,354**	296

12. Taxation

	2025 $'000	2024 $'000
Current tax:		
UK tax	**1,012**	—
Overseas tax	**—**	1,840
Adjustment in respect of prior years	**1,902**	22,300
Total current tax charge	**2,914**	24,140
Deferred tax:		
Overseas tax	**(6,739)**	6,281
Total deferred tax (credit)/charge – note 22	**(6,739)**	6,281
Tax on (loss)/profit on ordinary activities	**(3,825)**	30,421

The reasons for the difference between the actual tax charge for the year and the standard rate of corporation tax applied to profits for the year are as follows:

	2025 $'000	2024 $'000
(Loss)/profit on ordinary activities before tax	**(42,004)**	76,780
(Loss)/profit on ordinary activities multiplied at 24% (31 December 2024: 26%)	**(10,091)**	19,963
Effects of:		
Income and gains not subject to taxation	**—**	(15,750)
Expenditure not deductible for taxation	**11,559**	127
Losses utlilised	**—**	(3,120)
Adjustments in respect of prior years (see Note 20)	**1,902**	22,300
Deferred taxes (credit)/charge on temporary differences	**(6,739)**	6,421
Other (including changes to, and differences in, tax rates)	**(456)**	480
Current tax (credit)/charge for the year	**(3,825)**	30,421

The total carried forward losses and carried forward pre trading expenditures in the Falkland Islands potentially available for relief are as follows:

	2025 $'000	2024 $'000
UK	**71,405**	85,631
Falkland Islands	**638,034**	640,979
Italy	**52,077**	42,568

Deferred tax assets are only recognised on losses carried forward to the extent it is deemed probable that they will be utilised in the future. No deferred tax asset has been recognised in respect of temporary differences arising on losses carried forward, outstanding share options or depreciation in excess of capital allowances where there is uncertainty in the timing of profits and hence future utilisation. Losses carried forward in the Falkland Islands includes amounts held within entities where utilisation of the losses in the future may not be possible. For the entity that holds the Sea Lion licences the total carried forward pre trading expenditures form the tax basis in the capitalised asset. Because this is lower than the carrying amount, it gives rise to a deferred tax liability (note 22) available for relief on commencement of trade.

13. Discontinued operations

In October 2024, the Group announced the disposal, subject to conditions precedent, of its 100% interest in Rockhopper Civita Limited which holds the Group's remaining operations in the Greater Mediterranean geographical segment ("the disposal group"). The transaction had not completed at the year end, but the assets and associated liabilities continue to be classified as held for sale on the balance sheet. Under the terms of the transaction Rockhopper Civita Limited must have €5.5 million in cash and cash equivalents on transfer. The US$ 8,161 thousand of term deposits and cash and cash equivalents disclosed below is equivalent to €6,951 thousand. Whilst currently held in accounts in the name of Rockhopper Civita Limited immediately prior to any transaction completion the Group would transfer any excess cash funds over and above the agreed €5.5 million out of the entity.

Due to the fact that the disposal group has been classified as held for sale and represents a geographical area of operations it has also been treated as a discontinued operation in line with IFRS 5.

The results of the discontinued operations, which have been included in the profit for the year, are the same as the Greater Mediterranean segment as disclosed in Note 3.

Completion of the disposal of the Group's Italian operations remains subject to regulatory approval from the Italian regulator. The Group continues to engage with the regulator and has provided further information as required. To allow sufficient time for the approval process to conclude, it was agreed by both parties to extend the long-stop date in the SPA to 30 June 2026.

Cash flows from discontinued operations

	2025 $'000	2024 $'000
Net cash from operating activities	**111**	(312)
Net cash from investing activities	**(225)**	(88)
Net cash from financing activities	**—**	—

The costs of disposal of Rockhopper Civita Limited are expected to be substantially less than the carrying amount of the related net liabilities and accordingly no impairment losses have been recognised on the classification of these operations as held for sale. The major classes of assets and liabilities comprising the operations classified as held for sale are as follows:

	2025 $'000	2024 $'000
Exploration and evaluation assets	**666**	441
Other receivables	**778**	745
Term deposits	**6,340**	—
Cash and cash equivalents	**1,821**	17
Assets classified as held for sale	**9,605**	1,203
Other payables	**1,836**	1,692
Provisions	**15,605**	12,587
Liabilities associated with assets held for sale	**17,441**	14,279

14. Basic and diluted (loss)/profit per share

	2025 Number	2024 Number
Weighted average number of Ordinary Shares	**648,238,819**	644,879,070
Weighted average of shares held in Employee Benefit Trust	**(2,505,093)**	(1,304,500)
Weighted average number of Ordinary Shares for the purposes of basic earnings per share	**645,733,726**	643,574,570
Effects of Share options and warrants	**13,801,401**	10,498,279
Weighted average number of Ordinary Shares for the purposes of diluted earnings per share	**659,535,127**	654,072,849

	Continuing operations 2025 $'000	**Discontinued operations 2025 $'000**	**Total 2025 $'000**	Continuing operations 2024 $'000	Discontinued operations 2024 $'000	Total 2024 $'000
Net (loss)/profit after tax for purposes of basic and diluted earnings per share	**(38,179)**	**(1,502)**	**(39,681)**	46,359	1,253	47,612

Notes to the Consolidated Financial Statements

for the year ended 31 December 2025

14. Basic and diluted (loss)/profit per share (continued)

The weighted average number of Ordinary Shares takes into account those shares which are treated as own shares held in trust. As at the year end the Group had 2,505,093 Ordinary shares held in an Employee Benefit Trust (2024: 1,304,500) which have been purchased to settle future exercises of options.

3.0 million options (2024: 4.5 million) have not been included in the calculation of diluted EPS because their exercise is contingent on the satisfaction of certain criteria that had not all been met at 31 December 2025. The total number of options in issue is disclosed in note 8.

As the Group is reporting a loss in the current year then in accordance with IAS33 the share options are not considered dilutive because the exercise of the share options would have the effect of reducing the loss per share.

15. Exploration and evaluation assets

	Falkland Islands $'000	Greater Mediterranean $'000	Total $'000
At 31 December 2023	256,847	381	257,228
Additions	14,656	78	14,734
Written off exploration costs	(393)	—	(393)
Foreign exchange movement	—	(18)	(18)
Reclassified to assets held for sale	—	(441)	(441)
At 31 December 2024	271,110	—	271,110
Additions	58,382	—	58,382
Written off exploration costs	(254)	—	(254)
Foreign exchange movement	—	—	—
Reclassification to tangible fixed assets (development and production assets)	(329,238)	—	(329,238)
At 31 December 2025	**—**	**—**	**—**

Falkland Islands Licences

The amounts for intangible exploration and evaluation assets represent active exploration and evaluation projects. The additions during the year of US$58.1 (2024 $14.7) million relate to the Sea Lion development.

Reclassification of Sea Lion E&E Asset to Tangible Fixed Assets

During the year ended 31 December 2025, the Company reclassified the carrying value of its Exploration and Evaluation assets in respect of the Sea Lion oil field, located in the North Falkland Basin, to tangible fixed assets (property, plant and equipment). The reclassification was effected on 31 December 2025 at a carrying value of $329.2 million (2024: $nil), being the date that commercially viability was obtained through the successful placement.

The reclassification reflects Management's conclusion that, as at 31 December 2025, the technical feasibility and commercial viability of extracting the mineral resource from the Sea Lion field are demonstrable. In reaching this conclusion, Management had regard to the following key milestones, each of which was achieved during the period leading up to and including 31 December 2025:

> Independent Competent Person's Report (CPR) – Proved Reserves;
> Approval of Field Development Plan by the Falkland Islands Government:
> Final Investment Decision (FID):
> Securing of Debt Financing:
> Securing of Equity Financing – Parent Company Placing

Basis for Selection of Reclassification Date

Management determined that 31 December 2025 is the appropriate date of reclassification, being the earliest date on which all criteria required to demonstrate technical feasibility and commercial viability were simultaneously satisfied. Whilst a number of the above milestones were achieved prior to 31 December 2025, Management concluded that commercial viability was not fully demonstrable until the Company's equity funding requirement had been met in full. The receipt of Placing proceeds by the parent company on 31 December 2025 represented the final element of the funding structure and removed the residual funding risk that had, in Management's judgement, previously prevented commercial viability from being regarded as demonstrable in its entirety.

Impairment Assessment
In accordance with IFRS 6, Management performed an impairment assessment of the Sea Lion E&E assets immediately prior to reclassification. No impairment loss was identified prior to reclassification – further details of the impairment assessment are set out in Note 16 –Property, plant and equipment. As a result, the full carrying value of the E&E assets of $329.2 million was transferred to tangible fixed assets as at 31 December 2025. Written off exploration costs during the year US$254 thousand (2024: US$ 393 thousand) relate to costs associated with the licences to the south of those included in the current Field Development plan. In 2020, costs of US$222.5 million were written off in respect of these licences as they did not have a committed capital plan. Given there is still no committed capital investment plan Management does not consider there to be a indication of impairment reversal.

16. Property, plant and equipment

	Development and production assets $'000	Other assets $'000	Total $'000
Cost			
At 1 January 2025	—	157	157
Additions	—	—	—
Reclassification from intangible fixed assets	329,238	—	329,238
At 31 December 2025	**329,238**	**157**	**329,395**
Depreciation and impairment			
At 1 January 2025	—	(147)	(147)
Depreciation charge in the year	—	(8)	(8)
At 31 December 2025	**—**	**(155)**	**(155)**
Carrying value			
At 31 December 2025	**329,238**	**2**	**329,240**
At 31 December 2024	—	10	10

Sea Lion Development Asset
The Sea Lion development asset of $329.2 million (2024: $nil) represents the carrying value of E&E assets reclassified from exploration and evaluation assets during the year ended 31 December 2025 (see Note 15 – Exploration and Evaluation Assets). The asset comprises all exploration, appraisal, and pre-development expenditure capitalised in relation to the Sea Lion field since the date of discovery.

The Sea Lion development asset is not yet subject to depreciation as the field had not commenced production as at 31 December 2025. Depreciation will be charged on a unit-of-production basis, calculated by reference to the ratio of production in the period to the estimated total Proved Developed Reserves of the field, commencing from the date of first production.

Impairment Review
Management performed an impairment assessment of the Sea Lion development asset as at 31 December 2025 in accordance with IAS 36 – Impairment of Assets. The Sea Lion CGU, comprising RKH's 35% working interest in the Sea Lion development project located in licences PL032 in the North Falkland Basin, is required to be assessed for impairment prior to reclassification from intangible E&E assets to tangible D&P assets following the Final Investment Decision taken in December 2025. The recoverable amount was determined on a Value In Use (VIU) basis, using a discounted cash flow approach in line with how market participants would value the asset (and corresponding to how the Group would value similar assets), with the estimate therefore being classified as Level 3 in the fair value hierarchy due to a number of unobservable inputs used in the estimate. Costs of disposal were considered to be immaterial for the purposes of the impairment test. The key assumptions used in the valuation were as follows:

For oil price, RKH has used a long-term flat Brent oil price based on market consensus, adjusted for a fixed quality differential. Production are based on the independent reserves assessment conducted by NSAI, with volumes reflecting the 2C resource for the North Development Area Phase 1. Cost estimates were consistent with those used in the Senior debt banking model. The pre-tax discount rate applied is 8.08% (WACC). Sensitivity analysis has been performed on four scenarios: (i) a 10% reduction in oil price; (ii) reducing production to 90% of the 2C estimate; (iii) increasing the discount rate by 1%; and (iv) a 10% increase in capital expenditure. In none of those cases does an impairment arise.

Notes to the Consolidated Financial Statements

for the year ended 31 December 2025

17. Other receivables

	2025 $'000	2024 $'000
Current		
Receivables	**460**	193
Prepayments	**18,026**	3,906
Other	**223**	58,231
	18,709	62,330

As at 31 December 2025 prepayments relate to prepaid costs including prepaid capital expenditure and loan arrangement fees relating to a senior debt facility entered into subsequent to year end. Financing fees related to the facility will be capitalized and amortised over the term of the debt facility. As at 31 December 2024 other receivables included $58,228 thousand in relation to the fair value of the monetisation agreement, in the current year this has been presented as a Non current asset due to the expected timing of realisation following annulment of the original award during 2025 (note 10).

18. Term deposits

	2025 $'000	2024 $'000
Maturing after the period end		
Within three months	**13,429**	19,969
	13,429	19,969

Term deposits relate to amounts placed on fixed term deposit with various A rated deposit banks.

19. Other payables and accruals

Current liabilities

	2025 $'000	2024 $'000
Accounts payable	**102**	225
Accruals	**48,138**	6,289
Other creditors	**556**	2
	48,796	6,516

All amounts are expected to be settled within twelve months of the balance sheet date and so the book values and fair values are considered to be the same. Accruals include $38.8 million (2024: $4.7 million) amounts owed to Navitas in relation to Sea Lion. These amounts are expected to be invoiced and then either settled 100% using the pre-FID loan facility or 2/3 to the post-FID loan facility as appropriate.

Non current liabilities

	2025 $'000	2024 $'000
Other payables	**21,645**	—
Co-venturers loan	**52,493**	15,354
	74,138	15,354

Other payables amounts reflect the recognition of the potential insurance proceeds repayment resulting from any future receipts under the Monetisation Agreement in the year (note 10).

The movement on Co-venturers loan can be analysed as follows:

	$'000
Opening balance	**15,354**
Proceeds from loans (cash)	**9,135**
Proceeds from loans (non-cash)	**25,831**
Accrued interest (non-cash)	**2,173**
	52,493

20. Tax payable

	2025 $'000	2024 $'000
Current tax payable	**1,012**	1,806
Non current tax payable	**20,873**	22,300
Total tax payable	**21,885**	24,106

On 9 December 2025, the Company and the Falkland Islands Government ('FIG') entered into a final settlement agreement (the 'Settlement Deed') in respect of an uncertain tax liability. The uncertainty arose from capital gains taxes assessed by FIG on the farm-out of interests in the Sea Lion field to Premier Oil plc in 2012 (the '2012 Farm-Out').

The Settlement Deed also operates to settle any tax liability arising in connection with the farm-out to Navitas Petroleum in 2022 (the '2022 Farm-Out').

Payment Terms
The Settlement Deed provides for the Company to pay FIG a total of GBP 30 million on an undiscounted basis, payable in instalments as follows:

Instalment	Amount (GBP)	Timing/Condition
1	GBP 1 million	At signing of the final settlement agreement (paid December 2025)
2	GBP 2 million	At Phase 1 sanction / Financial Close (paid December 2025)
3	GBP 1 million	30 calendar days from First Oil (the 'Payment Date')
4	GBP 2 million	First anniversary of the Payment Date
5	GBP 3 million	Second anniversary of the Payment Date
6	GBP 7 million	Third anniversary of the Payment Date
7	GBP 7 million	Fourth anniversary of the Payment Date
8	GBP 7 million	Fifth anniversary of the Payment Date
Total	GBP 30 million	(undiscounted)

The Settlement Deed contains the following provisions in respect of the timing of payments:

— Early payment: the Company is entitled to settle any instalment before its contractual due date, attracting a discount of 10% per annum calculated on the amount settled early.
— Late payment: interest accrues on any overdue instalment at a rate of 10% per annum from the contractual due date until the date of actual payment.

(a) Measurement - Discounting of Financial Liability
First Oil from the Sea Lion Phase 1 development is expected in the first half of 2028, as such the liability has been discounted.

The discount rate applied is 10% per annum, being the rate inherent in the Settlement Deed at which the Company may prepay instalments.

Applying a discount rate of 10% per annum to the scheduled instalment cash flows, the present value of the remaining liability as at 31 December 2025 is GBP 15.5 million. Translated at the closing exchange rate at 31 December 2025, the carrying value of the tax settlement creditor is $20.9 million.

(b) Adjustment in Respect of Prior Periods
The carrying value of the tax creditor recognised at 31 December 2024 was $22.3 million. Following the execution of the Settlement Deed and revision of the payment profile and applicable discount rate, the carrying value has been remeasured to US$20.9 million. The resulting credit of US$1.4 million is recognised as an adjustment in respect of prior periods within the current tax charge for the year ended 31 December 2025. This has been offset by the initial payments paid during the year of equivalent to US$4.0 million leading to a net current year tax charge of US$2.5 million.

(c) Balance Sheet Classification
The remaining tax settlement liability of $20.9 million is classified in full as a non-current liability at 31 December 2025. No instalments under the Settlement Deed are contractually due until 30 calendar days after First Oil, which is not expected until 2028. As no amounts fall due within 12 months of the balance sheet date, the entire carrying value is presented within non-current liabilities.

Notes to the Consolidated Financial Statements

for the year ended 31 December 2025

Key Assumptions and Sensitivities

The principal assumption underlying the present value calculation is the expected First Oil date. A change in the expected timing of First Oil would affect the payment dates of instalments 3 to 8 and, consequently, the present value of the liability.

The 10% per annum discount rate is considered appropriate as it is the rate inherent in the Settlement Deed. Changes in prevailing market rates would not affect the measurement of the liability as the effective interest rate is fixed at inception.

21. Provisions

	Decommissioning provision $'000	**2025 $'000**	2024 $'000
Brought forward	1,600	**1,600**	19,132
Changes in estimate	457	**457**	(5,400)
Amounts arising in the year	—	**—**	3
Unwinding of discount	83	**83**	392
Foreign exchange	—	**—**	60
Reclassified to liabilities held for sale	—	**—**	(12,587)
Carried forward at year end	2,140	**2,140**	1,600

The decommissioning provision relates to the Company's temporary dock facility in the Falkland Islands.

Judgements are made based on the long term economic environment around appropriate inflation and discount rates to be applied as well as the timing of any future decommissioning. In the Falkland Islands costs are most likely to be in $US or GB£. Management consider the UK economic environment is best when informing these judgements due to probable contractor base likely to be used.

The Company believe it appropriate to use the following inflation and discount rates;

	2025 $'000	2024 $'000
Inflation	**2.0%**	1.6%
Discount	**4.9%**	5.2%
Period (years)	**28**	30

The changes in estimate in the year all relate to the change in relative discount and inflation rates.

Decommissioning costs are uncertain and management's cost estimates can vary in response to many factors, including changes to the relevant legal requirements, the emergence of new technology or experience at other assets. The expected timing, work scope and amount of expenditure may also change. Therefore, significant estimates and assumptions are made in determining the costs associated with the provision for decommissioning. The estimated decommissioning costs are reviewed annually, and the results of the most recent available review used as a basis for the amounts in the Consolidated Financial Statements. Provision for environmental clean-up and remediation costs is based on current legal and contractual requirements, technology and price levels. However, actual decommissioning costs will ultimately depend upon future market prices for the necessary decommissioning works required which will reflect market conditions at the relevant time.

The estimated costs associated with the decommissioning works are those that are likely to have a material impact on the provision. Given the facilities in the Falkland Islands are to be utilised during the Sea Lion development any changes in the provision would have been capitalised in the intangible asset. A 10% increase in these estimates would increase both the provision and the tangible assets in the year by US$214,000. Similarly, a 10 per cent reduction in these estimated costs would decrease both the provision and the intangible assets in the year by US$214,000.

22. Deferred tax

The following are the major deferred tax liabilities and assets recognised by the group and movements thereon during the current and prior reporting period.

	Accelerated tax depreciation $'000	Revaluation of financial assets $'000	Tax losses $'000	Total $'000
At 1 January 2024	(39,137)	(16,779)	10,611	(45,305)
Foreign exchange	—	(1,553)	982	(571)
Movement in period	—	18,332	(11,593)	6,739
At 31 December 2025	**(39,137)**	**—**	**—**	**39,137**

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the group intends to settle its current tax assets and liabilities on a net basis.

Total carried forward losses and carried forward pre-trading expenditures available for relief on commencement of trade at 31 December 2025 are disclosed in note 12 Taxation. Deferred tax assets are only recognised in relation to these losses to the extent it is probable that future suitable taxable profits will be available against which these losses can be utilised.

23. Share capital

	2025		2024	
	$'000	**Number**	$'000	Number
Authorised, called up, issued and fully paid: Ordinary shares of £0.01 each	**12,209**	**847,316,741**	9,455	640,578,764

	2025 Number	2024 Number
Shares in issue brought forward	**640,578,764**	620,229,436
Shares issued		
– Issued on placing	**201,102,976**	—
– Issued on exercise of warrants and share options	**2,250,000**	20,349,328
– Issued to EBT	**3,385,001**	—
Shares in issue carried forward	**847,316,741**	640,578,764

The shares issued to the EBT were to ensure that the EBT had sufficient shares to issue to the holders of the nil cost LTIP options.

During the year Rockhopper raised funds by way of a Placing and Subscription, in each case at an issue price of 53 pence per Unit (the "Issue Price"). Each Unit offered comprises one New Ordinary Share and, for every four New Ordinary Shares subscribed for, one Warrant. Each Warrant gives the holder the right to subscribe for one new Ordinary Share at a price of 80 pence per Ordinary Share (the "Strike Price").

The Placing utilised a cashbox structure and therefore the premium on the ordinary shares and associated costs have in accordance with section 612 of the Companies Act 2006 been recognised within the merger reserve. In relation to the shares, $129.6m was raised of which $2.6m is classified as Share Capital with the remaining balance in the Merger Reserve. The Warrants issued totaled $12.5m and were recognised in Share options and warrants reserve. The above are net of costs of $6.7m.

Notes to the Consolidated Financial Statements

for the year ended 31 December 2025

24. Reserves

Set out below is a description of each of the reserves of the Group:

Share premium	Amount subscribed for share capital in excess of its nominal value.
Share options and warrants	The share incentive plan reserve captures the equity related element of the expenses recognised for the issue of options, comprising the cumulative charge to the income statement for IFRS2 charges for share based payments less amounts released to retained earnings upon the exercise of options. It also includes the value of warrants that have been classified as Equity.
Own shares held in trust	Shares held in trust by the Employee Benefit Trust which have been purchased to settle future exercises of options.
Merger reserve	The difference between the nominal value and the fair value of shares issued on acquisition of subsidiaries.
Foreign currency translation reserve	Exchange differences arising on consolidating the assets and liabilities of the Group's subsidiaries are classified as equity and transferred to the Group's translation reserve.
Special reserve	The reserve is non distributable and was created following cancellation of the share premium account on 4 July 2013. It can be used to reduce the amount of losses incurred by the Parent Company or distributed or used to acquire the share capital of the Company subject to settling all contingent and actual liabilities as at 4 July 2013. Should not all of the contingent and actual liabilities be settled, prior to distribution the Parent Company must either gain permission from the actual or contingent creditors for distribution or set aside in escrow an amount equal to the unsettled actual or contingent liability.
Retained losses	Cumulative net gains and losses recognised in the financial statements.

25. Capital commitments

As part of taking Final Investment Decision on Sea Lion Phase 1 the Group approved a multi-year work programme and budget. As at 31 December 2025 capital commitments under that budget totaled US$579 million. Part of these costs are to be funded through the Post-FID Loan arrangements with Navitas. Under these arrangements Navitas fund 2/3 of the Group's share of post sanction Sea Lion Phase 1 capital costs to the extent they are not covered by the Senior Debt Facility.

In the prior year significant capital expenditure for at the end of the reporting period but not recognised as liabilities were US$0.6 million relating to the Company's intangible exploration and evaluation assets.

26. Related party transactions

Transactions between the Company and its subsidiaries, which are related parties, have been eliminated on consolidation and are not disclosed. Subsidiaries are listed in notes of the Company financial statements.

The remuneration of directors, who are the key management personnel of the Group, is set out below in aggregate. Further information about the remuneration of individual directors, including deferred salary and bonus amounts, is provided in the Directors' Remuneration Report on pages 41 to 50.

	Year ended 31 December 2025 $'000	Year ended 31 December 2024 $'000
Short term employee benefits	**2,061**	918
Share based payments	**50**	48
	2,111	966

Alison Baker, Senior Independent Director, sold a total of 50,000 ordinary shares of £0.01 each in the Company ("Shares"). The sale of Shares completed on 4 June 2025. Alison Baker retains 234,181 Shares in the Company, representing of the 0.036% of the issued share capital of the Company.

27. Financial instruments – Fair values and risk management

A. Accounting classifications and fair values

The only assets classified at fair value through profit and loss is the Agreement as disclosed in note 10 Other income and expenses. The only liabilities classified as at fair value through profit and loss is the Insurance Liability as disclosed in note 10 Other income and expenses.

B. Measurement of fair values

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are recognised and measured at fair value in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the group has classified its financial instruments into the three levels prescribed under the accounting standards. An explanation of each level follows underneath.

Financial asset/liability	Level	Valuation technique/key inputs	Significant unobservable input(s)	Relationship and sensitivity of unobservable inputs
Monetisation Agreement and Insurance Liability (Note 10)	3	Most likely outcome, discounted cash flow Future cash flows based on expected award value, costs to recover and time to recovery. These were then discounted at market observable rates.	Timing of cash flows, outcome of arbitration.	Sensitivity analysis is provided in the note.

C. Financial risk management

The Group has exposure to the following risks arising from financial instruments:

- Market risk see Note 27 C i
- Credit risk see Note 27 C ii
- Liquidity risk see Note 27 C iii
- Capital risk see Note 27 C iv

i. Market rate risk

Foreign exchange risks: The Group is exposed to foreign exchange movements on monetary assets and liabilities denominated in currencies other than US$. A number of the Group's subsidiaries have a functional currency other than US$, where this is the case the Group has an exposure to foreign exchange differences with differences being taken to reserves.

The Group has cash and cash equivalents and term deposits of US$201.4 million of which US$144.2 million was held in US$ denominations. The Group has expenditure in GB£ and Euro and accepts that to the extent current cash balances in those currencies are not sufficient to meet those expenditures they will need to acquire them. The following table summarises the split of the Group's assets and liabilities by currency:

Currency denomination of balance	$ $'000	£ $'000	€ $'000
Assets			
31 December 2025	**498,212**	**19,165**	**33,372**
31 December 2024	275,536	4,575	75,426
Liabilities			
31 December 2025	**135,491**	**28,624**	**39,421**
31 December 2024	60,815	23,932	22,413

Notes to the Consolidated Financial Statements

for the year ended 31 December 2025

27. Financial instruments – Fair values and risk management (continued)

C. Financial risk management (continued)

i. Market rate risk (continued)

The following table summarises the impact on the Group's pre-tax (loss)/profit and equity of a reasonably possible change in the US$ to GB£ exchange rate and the US$ to euro exchange:

	Pre tax profit/(loss)		Total equity	
	+10% US$ rate increase $'000	–10% US$ rate decrease $'000	+10% US$ rate increase $'000	–10% US$ rate decrease $'000
US$ against GB£				
31 December 2025	**(945)**	**945**	**(945)**	**945**
31 December 2024	(194)	194	(194)	194
US$ against euro				
31 December 2025	**(604)**	**604**	**(604)**	**604**
31 December 2024	5,301	(5,301)	5,301	(5,301)

Interest rate risks: the Group's only external debt is the Pre and Post-FID loan from Navitas. It is at a fixed rate of interest and the Group does not account for this at FVTPL so a change in interest rate at the reporting date would not affect profit or loss. Therefore exposure to interest rates is limited to finance income it receives on cash and term deposits. The Group is not dependent on its finance income and given the current interest rates the risk is not considered to be material.

ii. Credit risk

The Group recharges partners and third parties for the provision of services. Should the companies holding these accounts become insolvent then these funds may be lost or delayed in their release. The amounts classified as receivables as at the 31 December 2025 $459,000 (31 December 2024: $193,000).

Other receivables relates to the fair value of the Agreement to monetise the Group's Award. The counter party to the Agreement is a specialist fund with significant funds under management.

Credit risk relating to the Group's other financial assets which comprise principally cash and cash equivalents and term deposits arises from the potential default of counterparties. Investments of cash and deposits are made within credit limits assigned to each counterparty. The risk of loss through counterparty failure is therefore mitigated by the Group splitting its funds across a number of banks.

iii. Liquidity risk

The Group monitors the liquidity position by preparing cash flow forecasts to ensure sufficient funds are available. Further information can be found in the going concern assessment contained in Note 1.5.

Maturity of financial liabilities

The table below analyses the Group's financial liabilities, which will be settled on a gross basis, into relevant maturity groups based on the remaining period at the balance sheet to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. The Co-venturers loan balance of $52,493,000 (2024: $15,354,000) included in non-current payables has been excluded from the analysis as its repayment is to be made from the Sea Lion development. Whilst it is expected that the project will be continue in the future there is no guarantee on timing so the date of any repayment is yet to be determined.

At 31 December 2025	Within 1 year $'000	2 to 5 years $'000	More than 5 years $'000	Total contractual cashflows $'000	Carrying amount $'000
Other payables	48,796	—	—	48,796	48,796
	48,796	**—**	**—**	**48,796**	**48,796**

At 31 December 2024	Within 1 year $'000	2 to 5 years $'000	More than 5 years $'000	Total contractual cashflows $'000	Carrying amount $'000
Other payables	6,516	—	—	6,516	6,516
	6,516	**—**	**—**	**6,516**	**6,516**

iv. Capital risk

The Group manages capital to ensure that it is able to continue as a going concern whilst maximising the return to shareholders. The capital structure consists of cash and cash equivalents and equity. The board regularly monitors the future capital requirements of the Group, particularly in respect of its ongoing development programme. Further information can be found in the going concern assessment contained in Note 1.5.

28. Events after the reporting period end

Subsequent to the reporting date, the Company completed an Open Offer to Qualifying Shareholders, as announced on 22 December 2025. The Open Offer closed for acceptances at 11.00 a.m. on 15 January 2026.

Valid acceptances were received for 101,956,821 Open Offer Shares, representing a take-up of approximately 773.1% of the 13,188,036 Open Offer Shares available. Qualifying Shareholders received their full basic entitlement, with excess applications scaled back on a pro rata basis in accordance with the terms of the Open Offer.

The Open Offer raised gross proceeds of approximately £6.9 million (approximately US$9.2 million) through the issue of 13,188,036 new ordinary shares of 1 pence each. Admission of the Open Offer Shares to trading on AIM occurred on 21 January 2026, at which date the Company's issued ordinary share capital comprised 860,504,777 ordinary shares.

On the 20 May Navitas Petroleum LP ("Navitas" or the "Operator") provided an update on Sea Lion development progress. Phase 1 remains on track for first oil in H1 2028, with drilling scheduled to commence early 2027. The Aoka Mizu FPSO (55k bopd gross; 19.25k bopd net to Rockhopper) will sail to its upgrade shipyard by end of May, following conclusion of operations by its current operator. Upgrade works have been relocated from the Middle East to Asia due to the Iran conflict, adding c.US$45m to the development budget; Rockhopper's net additional equity cost is c.US$5.25m, and the Company remains fully funded for Phase 1.

Separately, Navitas has signed an MOU for an additional FPSO targeting acceleration of subsequent phases, which could add a further 125k bopd gross (43.75k bopd net to Rockhopper) of production capacity. No binding agreements are in place.

Notes to the Company Financial Statements

for the year ended 31 December 2025

1 Accounting policies

Company and its operations

Rockhopper Exploration plc, the 'Company', a public limited company quoted on AIM, incorporated and domiciled in the United Kingdom ('UK'), together with its subsidiaries, collectively 'the 'Group' holds certain exploration licences for the exploration and exploitation of oil and gas in the Falkland Islands. It also has operations in the Greater Mediterranean based in Italy. The registered office of the Company is Warner House, 123 Castle Street, Salisbury, Wiltshire, SP1 3TB.

Authorisation of financial statements and statement of compliance with financial reporting standard 101 reduced disclosure framework (FRS 101)

The financial statements of Rockhopper Exploration plc. for the year ended 31 December 2025 were approved and signed by the Group Chief Executive Officer on [date] having been duly authorised to do so by the board of directors. The Company meets the definition of a qualifying entity under Financial Reporting Standard 100 (FRS 100) issued by the Financial Reporting Council. Accordingly, these financial statements were prepared in accordance with Financial Reporting Standard 101 Reduced Disclosure Framework (FRS 101) and in accordance with the provisions of the Companies Act 2006.

In these financial statements, the Company as permitted by FRS101 has taken advantage of the disclosure exemptions available under that standard in relation to accounting standards issued but not yet effective or implemented, share-based payment information, financial instruments, capital management, presentation of comparative information in respect of certain assets, presentation of a cash-flow statement and certain related party transactions. Where required equivalent disclosures are given in the consolidated financial statements.

Basis of accounting

These financial statements are prepared on a going concern basis. The financial statements have been prepared under the historical cost convention with the exception of Share Based Payments and a portion of non-current payables related to an insurance liability. Historical cost is generally based on the fair value of the consideration given in exchange for the assets. As permitted by Section 408 of the Companies Act 2006, the profit and loss account of the Company is not presented as part of these financial statements. The accounting policies set out below have, unless otherwise stated, been applied consistently to all periods presented in these financial statements.

All values are rounded to the nearest thousand dollars ($'000), except where otherwise indicated.

Where required, the equivalent disclosures are given in the consolidated financial statements. Key sources of estimation uncertainty disclosure are provided in the Accounting Policies and in relevant notes to the consolidated financial statements as applicable.

Going concern

The financial statements have been prepared on a going concern basis. Further information relating to the going concern assumption is provided in note 1.5 of the consolidated financial statement.

Investments

The investments in the subsidiary undertakings are included in the Company financial statements at cost. The Company assesses investments for impairment whenever events or changes in circumstances indicate that the carrying value of investment may not be recoverable. If any such indication of impairment exists, the Company makes an estimate of its recoverable amount. Where the carrying amount of an investment exceeds its recoverable amount, the investment is considered impaired and is written down to its recoverable amount.

Property, plant and equipment and depreciation

Tangible fixed assets are stated at cost less depreciation. Depreciation is provided at rates calculated to write off the cost less estimated residual value of each asset evenly over its expected useful life as follows:

Office equipment	Over 3 years
Leasehold improvements	Over 5 years

USE OF ESTIMATES, ASSUMPTIONS AND JUDGEMENTS

The key assumptions concerning the future, and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed in the relevant note as is sensitivity analysis as required. The key areas identified and the relevant note are as follows:

Carrying value of investments and receivables from group undertakings (note 2 and 3) – judgements

Fair value of insurance liability (note 5) – judgements and estimates

Notes to the Company Financial Statements

for the year ended 31 December 2025

2. Investments

	2025 $'000	2024 $'000
Cost		
Cost brought forward	**113,099**	113,099
Cost carried forward	**113,099**	113,099
Provisions		
Provision brought forward	(113,099)	(113,099)
Provisions carried forward	**(113,099)**	(113,099)
Net book value carried forward	**—**	—

All amounts relate to subsidiary undertakings. Managaement considered impairments in line with IAS 36 which requires a reversal of impairment "if, and only if, there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised." In Management's judgement those circumstances do not exist at 31 December 2025 for any of the investments above, for the reasons set out below.

Rockhopper Mediterranean Limited (cost $47.2 million) was impaired in 2015 following the Italian regulator's refusal to grant a production concession for the Ombrina Mare field, rendering the licence value irrecoverable at that time. The underlying regulatory position has not changed. The Ombrina Mare arbitration has been ongoing since that date and, whilst probable of recovery, its outcome remains contingent on the decision of a legal tribunal. This does not constitute a change in the estimates that caused the original impairment.

Falkland Oil and Gas Limited (cost $65.5 million) was impaired in 2020 following the decision to impair the exploration and evaluation intangible assets in Desire Petroleum Ltd, Falklands Oil and Gas Ltd's subsidiary) in respect of licences not forming part of Sea Lion Phase 1. Those licences remain unsanctioned and the underlying intangible assets remain fully impaired.

Rockhopper Resources Limited (cost $0.4 million) is a dormant entity with an expired licence and no residual value.

Expected route to reversal

Management expects that impairments will be recovered through: (i) recoveries from through the Monetisation Agreement in relation to the Ombrina Mare arbitration, which would represent a change in the recoverable amount of the investment in Rockhopper Mediterranean Limited; and (ii) reversal of the underlying exploration and evaluation intangible asset impairments in Desire Petroleum Ltd

Details of the direct subsidiaries (investments) and indirectly held subsidiaries at the year end were as follows:

Company	Direct/indirect subsidiaries	Incorporated	Class of share	Percentage held %
Rockhopper Resources Limited	Direct	England & Wales	Ordinary	100
Rockhopper Exploration (Oil) Limited	Direct	England & Wales	Ordinary	100
Rockhopper Exploration (Hydrocarbons) Limited	Direct	England & Wales	Ordinary	100
Rockhopper Exploration (Petrochemicals) Limited	Direct	England & Wales	Ordinary	100
Rockhopper Exploration (Oil) Limited	Indirect	Falkland Islands	Ordinary	100
Rockhopper Mediterranean Limited	Direct	England & Wales	Ordinary	100
Rockhopper Civita Limited	Indirect	England & Wales	Ordinary	100
Rockhopper Italia Srl	Indirect	Italy	Ordinary	100
Falkland Oil and Gas Limited	Direct	Falkland Islands	Ordinary	100
Desire Petroleum Limited	Indirect	England & Wales	Ordinary	100

All companies incorporated in England & Wales have their registered address at Warner House, 123 Castle Street, Salisbury, SP1 3TB, United Kingdom. All companies incorporated in the Falkland Islands have their registered address at 45 John Street, Stanley, Falkland Islands, FIQQ 1ZZ.

Rockhopper Italia Srl has its registered address at Via Venti Settembre 1 Roma, 00187 Rome, Italy.

Notes to the Company Financial Statements

for the year ended 31 December 2025

3. Receivables from group undertakings

	2025 $'000	2024 $'000
Group undertakings	**497,797**	476,480
Provisions	**(17,437)**	(161,680)
	480,360	314,800

The Company is required to recognise expected credit losses ("ECL") for all financial assets held at amortised cost, which includes intercompany loans. Given the quantum of these balances, judgements in relation to ECL could have a material impact on the financial statements and are therefore considered a key source of estimation uncertainty.

The intercompany loans are repayable on demand. As at the year end, group undertakings would not have had sufficient liquid resources to repay outstanding amounts immediately. Management has therefore assessed the expected manner of recovery by reference to the realisable value of the underlying assets in a distressed sale scenario. Under IFRS 9, where a borrower cannot immediately repay a loan on demand, the lender's assessment of expected credit losses should reflect the most likely form of repayment, which in this case is the proceeds that would be realised from the immediate sale of the borrower's assets.

Key judgements

The material movement in the ECL provision in the year – from $161.7m to $17.4m – principally reflects the fact that the majority of the gross receivable balance is due from the subsidiary holding the Sea Lion Phase 1 development, which received Final Investment Decision in December 2025.

The remaining ECL provision relates to group undertakings holding unsanctioned licence interests for which no Field Development Plan has been approved as at 31 December 2025. For these balances, management has assessed the recoverable amount by reference to benchmark values for discovery-stage oil and gas assets applied to each subsidiary's net attributable resources. Where the resulting recoverable amount is less than the carrying value of the intercompany balance, an ECL provision is recognised for the difference.

Sensitivity

The ECL provision in respect of the unsanctioned licence interests is sensitive to the benchmark value applied to each subsidiary's net attributable resources. Management considers the benchmark adopted to be appropriate based on available market information for comparable assets; however, a reasonably possible change in that benchmark would have the following effect on the provision and on net assets.

If the benchmark were $0.50/bbl lower than the base case, the ECL provision would increase by approximately $14.8m, with a corresponding reduction in net assets of the same amount. If the benchmark were $0.50/bbl higher than the base case, the ECL provision would decrease by approximately $14.7m, with a corresponding increase in net assets. At a benchmark $0.50/bbl above the base case or higher, the recoverable amount would exceed the gross intercompany balance and the provision would be nil. The sensitivity is not symmetrical at higher benchmark values because the net carrying value of the receivable cannot exceed its gross balance.

4. Other receivables

	2025 $'000	2024 $'000
Receivables	**500**	193
Prepayments	**—**	3,906
	500	4,099

5. Other payables

Current	2025 $'000	2024 $'000
Trade creditors	**571**	78
Accruals	**7,312**	1,554
Other creditors	**1,328**	—
Group undertakings	**20,926**	21,019
	30,137	22,651

Non-current	2025 $'000	2024 $'000
Insurance Liability	**21,645**	—
	21,645	—

Amounts with Group undertakings are subject to loan agreements, repayable on demand. Non current liabilities relate to the Insurance Liability discussed in Note 10 of the Group financial statements.

6. Salaries and directors' remuneration

	2025 $'000	2024 $'000
Average number of employees	**7**	7
Salaries and fees	**3,838**	2,127

Disclosures in relation to directors' remuneration are given on a consolidated basis in the directors' report and note 6 of the Group financial statements.

7. Auditors' remuneration Salaries and directors' remuneration

Note 7 of the Group financial statements provides details of the remuneration of the Company's auditors on a Group basis.

8. Option and warrants reserve

Note 8 of the Group financial statements provides details of share based payments of the Group. The amounts disclosed are the same as those of the Company.

9. Share capital

Note 23 of the Group financial statements provides details share capital of the Company.

10. Capital and reserves

For description of each of the reserves of the Company please see Note 24 of the Group financial statements.

11. Related parties

Note 26 of the Group financial statements provides details on remuneration of key management personnel of the Group. The amounts disclosed are the same as those of the Company.

Independent auditor's Report to the Members of Rockhopper Exploration plc

Report on the audit of the financial statements

Opinion

In our opinion:

- the financial statements give a true and fair view of the state of the Group's and of the Parent Company's affairs as at 31 December 2025 and of the Group's loss and the Group's cash flows for the year then ended;
- the Group financial statements have been properly prepared in accordance with UK adopted international accounting standards;
- the Parent Company financial statements have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- the financial statements have been prepared in accordance with the requirements of the Companies Act 2006.

We have audited the financial statements of Rockhopper Exploration plc (the 'Parent Company') and its subsidiaries (the 'Group') for the year ended 31 December 2025 which comprise of the following:

Group	Parent Company
Consolidated Income Statement	Company Balance Sheet
Consolidated Statement of Comprehensive Income	Company Statement of Changes in Equity
Consolidated Balance Sheet	Notes to the Company Financial Statements
Consolidated Statement of Changes in Equity	
Consolidated Statement of Cash Flows	
Notes to the Consolidated Financial Statements	
A summary of material accounting policies	Material accounting policy information

The financial reporting framework that has been applied in the preparation of the Group financial statements is applicable law and UK adopted international accounting standards. The financial reporting framework that has been applied in the preparation of the Parent Company financial statements is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 101 Reduced Disclosure Framework (United Kingdom Generally Accepted Accounting Practice).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remain independent of the Group and the Parent Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard as applied to listed entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the Directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate. Our evaluation of the Directors' assessment of the Group and the Parent Company's ability to continue to adopt the going concern basis of accounting included:

- We used our understanding of the Group and the industry in which it operates to identify the inherent risks impacting its ability to continue operations through the going concern period. We consider the risks most impactful on the Group's and Parent Company's ability to continue as a going concern to be cost overruns in the construction of the Sea Lion project that prevent satisfaction of the conditions precedent required to make the initial drawn down on the Groups $350 million Senior Debt Facility, that was put in place to part-fund the project. The first draw down is expected to occur in the going concern period.
- We obtained the Directors' Group cash flow forecast to 30 June 2027, and evaluated the assumptions in respect of funding in place, future capital expenditure and other operating costs.
- We tested the cash and term deposits balance position close to the date of approval of these financial statements, by tracing the cash positions in the model to bank statements.

- We assessed the timing of the first debt draw down, which is expected during the going concern period.
- We considered the key terms and conditions of the undrawn senior debt facility and assessed the likelihood of conditions precedent and trigger events occurring that could prevent first drawdown.
  - The conditions precedent that have yet to be satisfied include demonstrating no funding shortfall exists and the satisfaction of project execution milestones.
  - The trigger events include significant downward movements in proved reserves, oil price below contingency levels, significant cost escalation over the contingency levels and adverse results from the first producer well.
- We assessed the cost-sharing structure under the Co-Venturer Loan arrangements with the Operator (under which the Group is required to fund only one-third of its share of project capital costs prior to completion) and considered the Operators ability to meet its share of funding under the cost-sharing agreement.
- We assessed the assumptions in relation to capital expenditure used in preparing these forecasts by reference to approved funding models and external reports surrounding the reasonability of capital expenditure assumptions. We further tested the contingency amounts included in the capital expenditure forecasts and ability for management to support cost overruns with existing cash resources.
- We tested the mathematical accuracy and integrity of the forecast model and assessed their consistency with approved budgets and the funding model used for obtaining the external debt facility.
- We reviewed management sensitivity analysis including stress testing the model to assess whether any circumstances are likely to arise that would require the Banking Case underpinning the Facility to be redetermined within the Assessment Period of the cashflows.
- We considered the going concern disclosures included in the financial statements against the requirements of the relevant accounting standards, and our knowledge and understanding of the underlying business.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Group and the Parent Company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue. However, because not all future events or conditions can be predicted, this statement is not a guarantee as to the Group and the Parent Company's ability to continue as a going concern.

Our responsibilities and the responsibilities of the Directors with respect to going concern are described in the relevant sections of this report.

Overview

		2025	2024
Key audit matters	Uncertain tax positions	✗	✓
	Valuation of the Ombrina Mare monetisation award	✓	✓
	Uncertain tax positions is no longer considered to be a key audit matter following the settlement of the tax dispute with the Falkland Islands Government.		
Materiality	*Group financial statements as a whole* $5.5m (2024: $3.5m) based on 1% (2024: 1%) of Total assets		

An overview of the scope of our audit

Our Group audit was scoped by obtaining an understanding of the Group and its environment, the applicable financial reporting framework and the Group's system of internal control. We identified and assessed the risks of material misstatement of the Group financial statements including with respect to the consolidation process. We then applied professional judgement to focus our audit procedures on the areas that posed the greatest risks to the group financial statements. We continually assessed risks throughout our audit, revising the risks where necessary, with the aim of reducing the group risk of material misstatement to an acceptable level, in order to provide a basis for our opinion.

Components in scope

From the above risk assessment and planning procedures, we determined which of the Group's components were likely to include risks of material misstatement relevant to the Group's financial statements. We then determined the type of procedures to be performed at these components, and the extent to which component auditors were required to be involved. In determining components, we have considered how components are organised within the Group, the commonality of control environments, the legal and regulatory framework, and level of aggregation associated with individual entities. Whilst there is relative commonality of controls across the Group, differences in jurisdictional risk, and the legal and regulatory frameworks under which the entities operate, prevent the further amalgamation of components.

As part of performing our Group audit, we have determined the components in scope as follows:

	2025
Audit procedures on entire financial information of the component	2
Specific audit procedures	2
	4

For components in scope, we used a combination of risk assessment procedures and further audit procedures to obtain sufficient appropriate evidence. These further audit procedures included:

- procedures on the entire financial information of the component, including performing substantive procedure;
- procedures on one or more classes of transactions, account balances or disclosures; and specific audit procedures.

Procedures performed at the component level

We performed procedures to respond to group risks of material misstatement at the component level that included the following.

Component	Component Name	Group Audit Scope
1	Rockhopper Exploration Plc	Statutory audit and procedures on the entire financial information of the component.
2	Rockhopper Exploration (Hydrocarbon Limited)	Audit procedures on the entire financial information of the component.
3	Rockhopper Civita Limited	Specific audit procedures
4	Rockhopper Italia SpA	Specific audit procedures

The Group engagement team has performed all procedures directly and has not involved component auditors in the Group audit.

Procedures performed centrally

We considered there to be a high degree of centralisation of financial reporting and commonality of controls. We therefore designed and performed procedures centrally across the group.

Locations

Rockhopper's operations are spread over a number of different geographical locations which include the United Kingdom, Falkland Islands and Italy. Our team conducted procedures in the United Kingdom.

How Climate change affected the scope of our audit

The Group has determined that the most significant future impact from climate change on its operations include: its future ability to access financing from banks and institutional lenders in response to the energy transition; the impact on the Group's reputation and on key stakeholder relationships of not having a credible ESG strategy, and the accelerating development of energy-related innovation technologies, alongside broader shifts in consumer preferences, which could reduce the long-term demand for oil and gas and exert downward pressure on commodity prices.

Our work on the assessment of potential impacts of climate-related risks on the Group's operations and financial statements included:

- Enquiries and challenge of management to understand the actions they have taken to identify climate-related risks and their potential impacts on the financial statements and adequately disclose climate-related risks within the annual report;
- Review of the minutes of Board and Audit Committee meetings and other papers related to climate change and performed a risk assessment as to how the impact of the Group's commitment as set out in the principal risks and uncertainties section of the strategic report on pages 20-23 , which may affect the financial statements and our audit.

We challenged the extent to which climate-related considerations have been reflected, where appropriate, in the Directors' going concern assessment and in management's judgements and estimates in relation to the carrying value of the property, plant and equipment in relation to the Sea Lion project.

The management disclosures on pages 20-23 form part of the "Other Information," rather than the audited financial statements. Our responsibilities in relation to the "Other Information" are described in the relevant section of this report and our procedures on these disclosures therefore consisted solely of considering whether they are materially inconsistent with the financial statements or our knowledge obtained from the audit or otherwise appear to be materially misstated.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) that we identified, including those which had the greatest effect on: the overall audit strategy, the allocation of resources in the audit, and directing the efforts of the engagement team. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter		How the scope of our audit addressed the key audit matter
Valuation of the Ombrina Mare Monetisation Award and Insurance repayment See note 2 and 10 to the financial statements	The Group was awarded approximately €190 million plus interest and costs in August 2022 following a unanimous decision by an arbitral tribunal under the International Centre for Settlement of Investment Disputes (ICSID), in relation to Italy's breach of its obligations under the Energy Charter Treaty. In June 2025, the Italian Republic succeeded in annulling the award. Subsequently, in September 2025, the Group resubmitted its claim against the Italian Government. In December 2023, the Group Entered into a funded participation agreement with a specialist fund to monetise the award. In October 2024, the Group also entered into an insurance policy which provided coverage in the event of annulment. Following the annulment in June 2025, the Group received an insurance payout. Under the terms of the policy, any future recoveries from arbitration proceedings are subject to reimbursement of the insurer up to the policy limit of €31 million. Management has recognised a financial asset of $22 million in respect of the funded participation greement and a financial liability of $21 million relating to the associated obligations. Given the significant judgement and estimation involved in determining the fair value of the financial asset and liability, including the uncertainty associated with the outcome of ongoing arbitration proceedings and potential insurance reimbursement, we identified this as a key audit matter.	Our audit procedures in relation to the valuation of the Ombrina Mare award monetisation and related insurance reimbursement included the following: > We obtained and reviewed the funded participation agreement with the Specialist Fund to ensure that the key terms and conditions were appropriately understood and reflected in management's assessment. This included verifying that all relevant conditions precedent had been satisfied, including the Deed of Release signed by FIG in June 2024. > We obtained and reviewed the insurance agreement documentation with the insurer to ensure that the key terms and conditions were appropriately understood and reflected in management's assessment. This included confirming the clawback of the insurance monies paid in the financial year should further receipts be received in subsequent years. > We assessed the recognition and measurement of the financial asset and financial liability arising from the monetisation arrangement and insurance reimbursement against the requirements of IFRS 9 *Financial Instruments*. This included evaluating the reasonableness of key assumptions used in management's valuation models with supporting evidence from management's legal expert. This included: – **Quantum of award and interest:** we compared the quantum of the award in managements model to the original proceedings amounts awarded to Rockhopper in August 2022, including interest. – **Timing:** we compared the timing assumptions in management's model to their experts assumptions, which were based on historical data on the duration of ICSID annulment and arbitration proceedings;

Key audit matter	How the scope of our audit addressed the key audit matter
	– **Discount rate:** we benchmarked the discount rate applied to the award in managements model against observable external market data; – **Probability weightings:** we compared the assumptions used in management's model to their experts assumptions, which included an assessment of the likelihood of each possible outcome, and with assistance from our internal auditor expert we assessed the reasonableness of the assumptions, including performing sensitivity analysis on them. > We assessed the independence, objectivity and competence of management's expert. • With the assistance of our internal valuation specialists, we assessed the methodology applied in managements valuation model against applicable financial reporting standards. > We reviewed the adequacy and completeness of the disclosures and sensitivities of key inputs in the financial statements relating to the financial asset and financial liability recognised. **Key observations:** Based on the procedures performed, we do not consider impact on net assets of the Ombrina Mare monetisation award asset and insurance liability to be unreasonable.

Our application of materiality

We apply the concept of materiality both in planning and performing our audit, and in evaluating the effect of misstatements. We consider materiality to be the magnitude by which misstatements, including omissions, could influence the economic decisions of reasonable users that are taken on the basis of the financial statements.

In order to reduce to an appropriately low level the probability that any misstatements exceed materiality, we use a lower materiality level, performance materiality, to determine the extent of testing needed. Importantly, misstatements below these levels will not necessarily be evaluated as immaterial as we also take account of the nature of identified misstatements, and the particular circumstances of their occurrence, when evaluating their effect on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements as a whole and performance materiality as follows:

	Group financial statements		Parent company financial statements	
	2025 $	2024 $	2025 $	2024 $
Materiality	5,500,000	3,500,000	5,225,000	3,100,000
Basis for determining materiality	1.0% of total assets	1.0% of total assets	95% of the group materiality	1.0% of total assets
Rationale for the benchmark applied	We considered total assets to be the most significant determinant of the Group's financial performance for users of the financial statements, given the Group's focus on the construction of the Sea Lion project.		The materiality has been based on total assets as the Company is a holding company.	
Performance materiality	3,400,000	2,400,000	3,200,000	2,100,000
Basis for determining performance materiality	62.5%	70%	62.5%	70%
Rationale for the percentage applied for performance materiality	In reaching our conclusion on the level of performance materiality to be applied we considered a number of factors including the expected total value of known and likely misstatements (based on past experience) and our knowledge of the Group's and Company's internal controls.			

Component performance materiality

For the purposes of our Group audit opinion, we set performance materiality for each component of the Group, apart from the Parent Company whose materiality and performance materiality are set out above, based on a percentage of between 63% and 80% (2024: 32% and 67%) of Group performance materiality dependent on a number of factors including potential significant risks of material misstatements at the component, relative size of components, extent of disaggregation of the financial information across components, control environment and our assessment of the risk of material misstatement of those components. Component performance materiality ranged from $2,312,000 to $5,225,000 (2024: $770,000 to $1,600,000).

Reporting threshold

We agreed with the Audit Committee that we would report to them all individual audit differences in excess of $275,000 (2024: $170,000). We also agreed to report differences below this threshold that, in our view, warranted reporting on qualitative grounds.

Other information

The Directors are responsible for the other information. The other information comprises the information included in the 'Annual Report' other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Other Companies Act 2006 reporting

Based on the responsibilities described below and our work performed during the course of the audit, we are required by the Companies Act 2006 and ISAs (UK) to report on certain opinions and matters as described below.

Strategic report and Directors' report	In our opinion, based on the work undertaken in the course of the audit: > the information given in the Strategic report and the Directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and > the Strategic report and the Directors' report have been prepared in accordance with applicable legal requirements. In the light of the knowledge and understanding of the Group and Parent Company and its environment obtained in the course of the audit, we have not identified material misstatements in the strategic report or the Directors' report.
Matters on which we are required to report by exception	We have nothing to report in respect of the following matters in relation to which the Companies Act 2006 requires us to report to you if, in our opinion: > adequate accounting records have not been kept by the Parent Company, or returns adequate for our audit have not been received from branches not visited by us; or > the Parent Company financial statements are not in agreement with the accounting records and returns; or > certain disclosures of Directors' remuneration specified by law are not made; or > we have not received all the information and explanations we require for our audit.

Responsibilities of Directors

As explained more fully in the Directors' report, the Directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the Directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Directors are responsible for assessing the Group's and the Parent Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Group or the Parent Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

However, the primary responsibility for the prevention and detection of fraud rests with both those charged with governance of the Parent Company and management.

Extent to which the audit was capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud is detailed below:

Non-compliance with laws and regulations

Based on:

> Our understanding of the Group and the industry in which it operates;
> Discussion with management and those charged with governance and the Audit Committee; and
> Obtaining and understanding of the Group's policies and procedures regarding compliance with laws and regulations.

We considered the significant laws and regulations to be the applicable accounting framework, UK and Falkland Islands tax legislation, the UK Companies Act 2006, employment laws and data protection regulations and AIM Listing Rules.

The Group is also subject to laws and regulations where the consequence of non-compliance could have a material effect on the amount or disclosures in the financial statements, for example through the imposition of fines or litigations. We identified such laws and regulations to be the Falkland Islands Offshore Minerals Ordinance.

Our procedures in respect of the above included:

> Review of minutes of meeting of those charged with governance for any instances of non-compliance with laws and regulations.

- Review of correspondence with regulatory and tax authorities for any instances of non-compliance with laws and regulations; and
- Review of financial statement disclosures and agreeing to supporting documentation.

Fraud

We assessed the susceptibility of the financial statements to material misstatement, including fraud. Our risk assessment procedures included:

- Enquiry with management and those charged with governance and the Audit Committee regarding any known or suspected instances of fraud;
- Obtaining an understanding of the Group's policies and procedures relating to:
  - Detecting and responding to the risks of fraud; and
  - Internal controls established to mitigate risks related to fraud.
- Review of minutes of meetings of those charged with governance for any known or suspected instances of fraud;
- Discussion amongst the engagement team as to how and where fraud might occur in the financial statements;
- Performing analytical procedures to identify any unusual or unexpected relationships that may indicate risks of material misstatement due to fraud; and
- Considering remuneration incentive schemes and performance targets and the related financial statement areas impacted by these.

Based on our risk assessment, we considered the areas most susceptible to fraud to be the risk of fraud in management override of controls, in particular in relation to key judgments and estimates.

Our procedures in respect of the above included:

- Performing unpredictability testing on accounts balances which were considered to be at a greater risk of susceptibility to fraud;
- Testing the appropriateness of journal entries made throughout the period which met a specific risk-based criteria through agreement to corroborative supporting evidence;
- Performing a detailed review of the Group's year end adjusting entries and investigating any that appear unusual as to nature or amount by agreeing to underlying support and calculations;
- Assessing the judgements made by Management when making key accounting estimates and judgements, and challenging Management on the appropriateness of these judgments, specifically around key audit matters as discussed above;
- Reviewing minutes from board meetings of those charged with governance and RNS announcements to identify any instances of non-compliance with laws and regulations; and
- Performing a detailed review of the Group's consolidation entries, and investigating any that appear unusual with regards to nature or amount to corroborative evidence.

We also communicated relevant identified laws and regulations and potential fraud risks to all engagement team members who were all deemed to have appropriate competence and capabilities and remained alert to any indications of fraud or non-compliance with laws and regulations throughout the audit.

Our audit procedures were designed to respond to risks of material misstatement in the financial statements, recognising that the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery, misrepresentations or through collusion. There are inherent limitations in the audit procedures performed and the further removed non-compliance with laws and regulations is from the events and transactions reflected in the financial statements, the less likely we are to become aware of it.

A further description of our responsibilities is available on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the Parent Company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the Parent Company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Parent Company and the Parent Company's members as a body, for our audit work, for this report, or for the opinions we have formed.
